Deeds Depth: 0.10
Comments: Permiabie cover and imperm. cover above has the following specific meanings: Soil Cap: a layer of sand, geosynthetic clay liner layer (GCL) and topsoil on top of GCL in Closed Cell. Solidified Sediment and Soils: Solidified to 10 to the negative 5th cm/sec permeability in the Closed Cell. Thickness is 17.45 ft in the center and 13.34 feet at perimeter in the closed cell. Subaqueous Cap: Composed of granular sand amended with organic carbon installed in the Open Cell. Sheet Pile Wall b/w cells

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/05/2019	Telephone: 703-603-8704
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 07/03/2019
Number of Days to Update: 39	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/19/2019	Source: EPA
Date Data Arrived at EDR: 07/30/2019	Telephone: 800-424-9346
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 10/02/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/28/2019
	Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/19/2019	Source: EPA

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (212) 637-3660

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (212) 637-3660

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

NY PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

CA HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

NY COOLING TOWERS: Registered Cooling Towers

This data includes the location of cooling towers registered with New York State. The data is self-reported by owners/property managers of cooling towers in service in New York State. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

APPENDIX G

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Carly Gazze

Environmental Scientist

Carly Gazze is a geologist with approximately 1 year of experience working on environmental projects specializing in environmental due diligence, site investigations, and remediation. She is technically experienced in various field activities related to subsurface investigation and has experience with data management, interpretation, and technical report preparation.

Ms. Gazze's technical expertise includes the following:

- *Soil, Groundwater, Soil Vapor, and Indoor/Ambient Air Quality Sampling*
- *Surface Water Sampling*
- *Experience calibrating, troubleshooting, and using field screening equipment*
- *Report Preparation*
- *Environmental Site Assessments*
- *Data Analysis and Management*

Education

B.S., Geosciences; The
Pennsylvania State
University (2018)

Training

OSHA 10-Hour Construction
Training
OSHA 40-Hour
HAZWOPER Training (2019)

Computer Skills

ArcGIS

NYCSCA Hazardous Materials Consulting Services – Field Technician

Ms. Gazze prepared Phase I Environmental Site Assessments (ESAs) in accordance with ASTM International (ASTM) E 1527-13 for at least ten properties located throughout the five boroughs of New York City. Based on recommendations provided in the Phase I ESA reports, Ms. Gazze prepared scopes of work for subsurface investigations and indoor air quality surveys. Ms. Gazze's responsibilities also include performance of soil, groundwater, and soil vapor sampling during implementation of Phase II Environmental Site Investigations (ESI) and performance of pre-sampling building inspection and indoor air sampling in support of an IAQ surveys. Ms. Gazze's responsibilities included calibration of applicable field equipment (i.e., photoionization detector, Horiba U-52), providing instruction and direction to subcontractors, collection of environmental samples, and completion of the associated chain-of-custody form. Ms. Gazze has also assisted with data management and contributed to preparation of Phase II ESI and IAQ Investigation reports. (11/18 – Present).

NYCT On-Call Environmental Consulting Services - Environmental Scientist

In support of identifying locations for construction of new substations, Ms. Gazze assisted with preparation of the Alternatives Evaluation Report. Her responsibilities included incorporation of field data and photographs into the Alternatives Evaluation Reports. Ms. Gazze's responsibilities also included review of client comments, and incorporation of revisions into the final Alternatives Evaluation Reports. (1/19 - Present)

Metro-North Railroad, Harlem Line - Environmental Scientist

Ms. Gazze performed a review of soil analytical data for purposes of waste characterization prior to transport off-site to an approved disposal facility. Her review was conducted in accordance with the design specifications. Following review of the analytical data, Ms. Gazze prepared a summary of her evaluation, which included a recommended waste classification. (1/19 - Present)

Elizabeth R. Scheuerman

Environmental Scientist

Ms. Scheuerman is an environmental scientist with experience conducting environmental investigations to determine the risk and extent of soil contamination and hazardous materials on a variety of sites and buildings, as well as providing design solutions for environmental remediation. She has furnished a range of environmental services under on-call contracts with the New York City School Construction Authority (NYCSCA) and New York City Transit (NYCT), including authoring Phase I Environmental Site Assessments (ESAs); contributing to Phase II Environmental Site Investigations (ESIs); performing and overseeing sampling services; and managing contractor activities during construction to make sure environmental plans are executed properly. Ms. Scheuerman is well versed in federal, New York State, New Jersey, and New York City environmental compliance regulations and health and safety requirements.

Project Experience

AIRPORTS

PANYNJ Newark Liberty International Airport Terminal One Redevelopment Design-Build - Environmental Scientist

Assisted in the design of a sampling program to investigate the potential presence of methane contamination in environmental media for the new Terminal One at Newark Liberty International Airport (EWR) in Newark, NJ, which is replacing the airport's aging Terminal A. This \$1.4 billion design-build project for the Port Authority of New York and New Jersey (PANYNJ), following LEED® Silver guidelines, encompasses a 1 million-sf, 33-gate, common-use terminal; phased demolition of Terminal A; and a variety of new construction and renovation efforts to support airside and landside redevelopment. To support development of the sampling program, Ms. Scheuerman researched and summarized historical reports and databases pertaining to the environmental, geographical, and hydrological history of the area to assess the potential environmental impact on the redevelopment. She also coordinated among engineers, scientists, and contractors of various disciplines to effectively communicate findings to the project team. (5/18 - 10/18)

COMMERCIAL

S. Hekemian Group Montvale Redevelopment - Environmental Scientist

Managed the remedial investigation and action of a 25-acre commercial farm in northern New Jersey. She advanced 35 soil borings to various depths to delineate the extent of impacted soils. Ms. Scheuerman conducted synthetic precipitation leaching procedure sampling to calculate a site-specific impact to

groundwater standard and made remedial decisions based on this standard. She identified “hotspot” areas and coordinated the excavation and disposal of these impacted soils. In addition, she monitored and maintained a mobile dust meter to regulate the amount of dust leaving the site during soil movement activities. Upon completion, Ms. Scheuerman assisted with administering documentation for a New Jersey Department of Environmental Protection (NJDEP) response action outcome (RAO) to verify the remediation of the site and recommend a lift of environmental restrictions. (10/15 - 7/16)

Garden Homes Dry Cleaner Investigation and Remediation - Environmental Scientist

Conducted a site investigation in preparation for the redevelopment of a dry cleaning facility in Lacey Township, NJ. The purpose of the investigation was to assess potential impacts to the environment associated with the facility’s dry cleaning operations. Soil borings were advanced using direct push technology, which reported elevated concentrations of tetrachloroethene in the soil. Ms. Scheuerman screened the soil with a photoionization detector, and classified and logged all soil borings using the Burmister Soil Classification Method. Once delineation was achieved, she coordinated the excavation and disposal of the impacted material, conducted post-excavation verification sampling, and directed contractors in backfilling the excavation with certified clean fill material. Ms. Scheuerman assisted with the design of a soil vapor extraction system and managed the on-site installation to make sure all potential vapors are directed outside of the building. Ms. Scheuerman summarized the events of this environmental investigation and submitted a technical report to the NJDEP, which allowed the redevelopment activities to proceed. (1/16 - 12/16)

EDUCATION

[consolidated entry]

NYCSCA Environmental Consulting/Hazardous Material Services- Environmental Scientist

Performing a range of environmental consultation and hazardous materials abatement services for an on-call contract with the New York City School Construction Authority (NYCSCA). Ms. Scheuerman has contributed to a wide variety of projects, including Phase I ESAs to support acquisition or leasing of new properties; sampling of potable water sources for lead contamination and subsequent treatment for bacterial disinfection; review of contractor Excavated Materials Development Plans (EMDPs) ; and Phase II Environmental Site Investigations (ESIs) to confirm the presence and extent of potential contamination in environmental media. She has authored approximately 25 Phase I ESA reports, performed and supervised more than 50 sampling programs, sampled and delineated contaminated and/or hazardous materials, and prepared and executed plans for the proper removal and disposal of impacted material in accordance with NYCSCA directives and environmental regulatory requirements. (8/16 - Present)

[individual entry]

NYCSCA Due Diligence Assessments - Environmental Scientist

Contributing to multiple Phase I ESAs as part of an on-call environmental services contract with the New York City School Construction Authority (NYCSCA). Ms. Scheuerman has been the primary author of approximately 25 Phase I ESA reports concerning various sites for new school buildings and school additions, including former industrial/manufacturing properties, (i.e., brownfields) as well as properties to purchase or lease to adapt for future school use. Her due diligence responsibilities include analyzing historical documents and maps; researching databases to identify former site operations; and performing site reconnaissance surveys to prepare comprehensive Phase I ESA reports and recommendations for further action (including Phase II Environmental Site Investigations [ESIs] and Indoor Air Quality [IAQ] Survey). Furthermore, Ms. Scheuerman coordinates and performs Indoor Air Quality Assessments and Phase II ESIs. (1/18 - Present)

[individual entry]

NYCSCA Potable Water Testing and Disinfection - Environmental Scientist

Supporting water disinfection projects at multiple public schools citywide under an environmental on-call services contract with New York City School Construction Authority (NYCSCA). These projects have included oversight of disinfection processes; testing of newly installed potable-water fixtures and/or piping systems; and oversight of post-disinfection bacteriological sampling. For more than 25 disinfection initiatives, Ms. Scheuerman has performed sampling services, as well as post-disinfection lead sampling in cases where it is seen as necessary for new piping systems. She is also translating technical field data into presentable formats for the client and end users. In addition, Ms. Scheuerman is monitoring site-worker adherence to general health and safety protocols. (8/16 - Present)

[individual entry]

NYCSCA P.S. 62 Environmental Investigation and Remediation - Environmental Scientist

Participated in an investigation to determine the cause of blue-discolored water from recently installed potable water fixtures at P.S. 62 (Kathleen Grimm School) in Staten Island, NY, for the New York City School Construction Authority (NYCSCA). Ms. Scheuerman collected more than 200 drinking water samples, oversaw activities by the plumber to disassemble and inspect components of the plumbing system, and collected plumbing piping samples for analysis. To develop a remedy for the blue water conditions, Ms. Scheuerman assisted with bench-scale testing using extracted corroded copper piping samples. She then assisted with the execution of the newly developed remedial process in the field. Follow-up testing has demonstrated that acceptable drinking water is provided throughout the school, and a potable water system exercising program is underway to support the formation of a protective patina in the piping. (6/17 - 8/18)

[individual entry]

NYCSCA Citywide Lead in Water Testing Program - Project Coordinator

Coordinated the collection and testing of more than 6,300 samples from potable water sources at more than 70 New York City public schools as part of a citywide program to check for the presence of lead contamination in drinking water. This fast-track New York City School Construction Authority (NYCSCA) project required environmental testing of water fountains, sinks, and other potable water fixtures to identify the presence of lead above applicable drinking water standards and implement disinfection and other remedial actions, as appropriate. Field sampling and disinfection activities were conducted outside of school hours, which necessitated complex scheduling and communications with school administrative and custodial staff. Ms. Scheuerman coordinated among project stakeholders, field workers, and laboratory facilities to implement timely and accurate reporting and decision making. She was responsible for communicating with the NYCSCA to arrange access to schools, discuss project progress, and keep abreast of updated protocols for data production. In addition, Ms. Scheuerman performed daily quality control (QC) measures to verify consistency with scope requirements and client standards. (10/16 - 10/17)

South Brunswick School District Water Testing Services - Environmental Services

Conducted an investigation to assess the presence of lead and copper contamination in drinking water at the two oldest schools in South Brunswick School District in South Brunswick, NJ. Ms. Scheuerman collected drinking water samples by first drawing a sample of the stagnant water in the system, followed by a flush sample when the water had been allowed to flow from the outlet throughout the system. She tabulated and analyzed the data in compliance with the Environmental Protection Agency (EPA) action levels to determine the integrity of the pipes and any necessary remedial actions. (1/16)

MIXED USE

DVL, Inc. Toch Park Redevelopment - Environmental Scientist

Managed sampling activities and coordinated field efforts for the concrete sampling of a 6-story, brick-and-concrete warehouse in Kearny, NJ, which was originally erected in the late 1800s and operated as a linoleum flooring manufacturing facility. Ms. Scheuerman collected in-situ concrete grab samples on the third and sixth floors of the building as part of an effort to collect more than 800 concrete samples to test for PCBs. Ms. Scheuerman was also responsible for overseeing all decontamination procedures and maintaining inventory. She coordinated all field equipment and bottle ware for a 6-person sampling team and ensured health and safety rules were followed throughout. (1/15 - 7/16)

RAIL

MTACC/NYCT Second Avenue Subway Phase 2 - Environmental Scientist

Contributed to subsurface investigation field activities for Phase 2 of the MTA Capital Construction (MTACC)'s Second Avenue Subway on the East Side of Manhattan. Phase 2 will extend this new New York City Transit (NYCT) line north of the tail tracks at 105th Street to stations at 106th Street and 116th Street on Second Avenue and a terminus at 125th Street and Lexington Avenue, where it will connect with the Lexington Avenue Line and Metro-North Railroad. Ms. Scheuerman conducted on-site soil and groundwater sampling, soil classification, contractor oversight, and soil disposal. She was also responsible for assigning environmental consultant staff to perform on-site activities, liaising with the drilling contractor to verify they had sufficient staff and equipment for daily scoped drilling activities, and communicating daily field activities to the project team. She was also responsible for ordering and cataloguing field equipment and lab media. (8/17 - 2/19)

RESIDENTIAL

NYCHA Physical Needs Assessment and Energy Audit - Quality Control Inspector

Analyzed more than 200 field reports to assess the overall quality and accuracy of site inspections during a \$23 million physical needs assessment and energy audit of 2,413 buildings on 318 New York City Housing Authority (NYCHA) developments. Ms. Scheuerman worked with a team of approximately 20 scientists, engineers, and architects to facilitate efficient and thorough quality control reviews. In this capacity, she reviewed field reports and revised them as needed to display information in an organized, consistent, and accurate manner. These field reports contained information regarding the presence asbestos, mold, damaged building materials, and other such hazards. (5/17 - 6/17)

Garden Homes UST and Transformer Investigation and Remediation - Environmental Scientist

Conducted soil sampling to evaluate the potential release of three former transformers and two existing No. 2 diesel fuel underground storage tanks (UST) in Berkley, NJ. The results of sampling indicated the presence of soils impacted with PCB and fuel oil Ms. Scheuerman delineated these impacted soils vertically and horizontally to quantify the contamination. She directed contractors in excavating these areas and screened the excavation sidewalls with a photoionization detector to note any visual or olfactory evidence of contamination. She also collected post excavation soil samples and ran contingency analyses to meet the requirements of the NJDEP. Additionally, Ms. Scheuerman coordinated the disposal of approximately 900 cubic yards of impacted soil that was stockpiled on the site, collecting waste classification samples to determine proper disposal. Upon completion, she submitted a technical report to the NJDEP to discuss the remedial investigation and action. (1/15 - 7/16)

Garden Homes Flume Remediation - Environmental Scientist

Directed excavation to collect buckets of soil from specific locations within a flume at a site in Bloomfield, NJ. Ms. Scheuerman ensured proper decontamination procedures were carried out throughout the project in compliance with the NJDEP Technical Regulations for Site Remediation (TRSR). The scope of work included soil sampling within the porous and non-porous sections of the flume and determining the appropriate disposal facility for the bulk PCB remediation waste and the non-porous elements of the flume. (1/15 - 12/16)

RESILIENCE

NYCDEP Owl's Head WWTP Resilience Upgrades - Sustainability Officer

Assisted in determining sustainability goals to support \$30 million in flood protection improvements at the Owl's Head Wastewater Treatment Plant (WWTP) located along Bay Ridge Channel in Brooklyn, NY. The New York City Department of Environmental Protection (NYCDEP) project aims to protect critical equipment in 10 buildings and process areas at the 120-mgd Owl's Head WWTP. Resilience measures include elevating pumps, actuators, and controls; protecting substations and motor control centers with flood walls and stop-logs; protecting buildings with flood doors, flood windows, and elevated secondary access points; and evaluating drainage patterns and protecting storm drains. Ms. Scheuerman identified opportunities for the implementation of sustainable practices throughout the project, which involved reduction of greenhouse gas emissions and energy usage throughout mechanical, electrical, and structural equipment; waste reduction methods; material recycling and reuse; use of regional materials; and water conservation techniques. She also recommended the use of permeable surfaces and optimal utilization of site topography to efficiently manage stormwater runoff and prevent flooding, as well as permeable surfaces and daylight-maximizing techniques for site landscaping to help reduce energy usage. Ms. Scheuerman coordinated with the project team to evaluate these opportunities and incorporate them into the project's facility plan report, which summarizes the need for the project and discusses the impact that each project component will have on the surrounding environment. (9/17 - 2/18)

TRANSPORTATION FACILITIES

NYCT Environmental Documentation and Air Permit Support for the Reconstruction of Jamaica Bus Depot - Environmental Scientist/Field Scientist

Contributed to an extensive field investigation to document the extent of contaminated soil at a 5.6-acre parcel that New York City Transit (NYCT) is considering leasing for temporary bus parking associated with the reconstruction and expansion of the Jamaica Bus Depot in Queens, NY. The

depot, built in 1939, is used to store, maintain, and service approximately 196 buses. Ms. Scheuerman oversaw a geophysical survey and adjusted field sampling locations based on this information utilizing a GPS Trimble and general site knowledge. She collected more than 500 soil samples from soil borings and test pits; evaluated results of laboratory analyses to provide soil classification; and supervised the installation of seven temporary groundwater/soil vapor collection points. Ms. Scheuerman was in charge of managing three subcontractors responsible for geophysical surveys, utility mark-outs, and operation of ground-intrusive heavy machinery. She also prepared daily project update reports for project managers and the client. In addition, she prepared a Phase II ESI report, created a PowerPoint presentation to summarize findings and display comprehensive results, and provided recommendations for remediation to the client. (4/18 - 12/18) [CM-1519 Task #12]

NYCT Mets/Willets Point Station Renovation Environmental Due Diligence Assessment - Environmental Services

Assisted with the preparation of an Environmental Due Diligence Assessment (EDDA) consistent with the requirements of SEQRA and CEQR for planned major renovations at New York City Transit (NYCT)'s Mets/Willets Point station on the No. 7 Line in Queens, NY. Ms. Scheuerman consolidated the data from soil and groundwater sampling events and analyzed for sources of contamination and potential remedial actions prior to construction. In addition, her assessment included the potential impact of noise vibrations and other construction activities on the surrounding environment. (9/16 - 2/18) [CM-1519 Task #7]

Matthew Mankovich

Environmental Project Manager

An environmental professional for more than 18 years, Mr. Mankovich has a portfolio of successful environmental projects specializing in due diligence services. Mr. Mankovich is technically proficient in environmental site assessments and investigations, project management, scoping, budgeting, and project closeout. He has performed, reviewed, and managed staff in connection with hundreds of site assessments/investigations in accordance with current ASTM International, New York State Department of Environmental Conservation (NYSDEC), New York City Office of Environmental Remediation (NYCOER), New York City Department of Environmental Protection (NYCDEP), and client-specific standards.

Mr. Mankovich's technical expertise includes the management and completion of Phase I Environmental Site Assessments (ESAs), Phase II Environmental Site Investigation (ESIs), Phase II ESI Work Plans and Cost Estimates, Soil Vapor Intrusion (SVI) Investigations, Indoor Air Quality (IAQ) Investigations, Underground Storage Tank (UST)/Aboveground Storage Tank (AST) Investigations, NYSDEC spill investigations, Remedial Investigations and Work Plans, and other client-specific assessments and investigations.

A summary of Mr. Mankovich's employment history is presented below.

- *Inspector/Technician, ACA Engineering, Inc.
(October 1999 – March 2002)*
- *Environmental Scientist, GC Environmental, Inc.
(March 2002 – May 2004)*
- *Senior Environmental Scientist/Project Manager, The Louis Berger Group
(May 2004 – January 2007)*
- *Senior Project Manager, ATC Group Services LLC
(January 2007 – July 2013)*
- *Senior Project Manager, TRC Engineers, Inc.
(July 2013 – June 2017)*
- *Environmental Project Manager, STV Inc.
(February 2018 - present)*

Project Experience

NYCSCA Environmental Consulting/Hazmat Services – Senior Project Manager

Provide technical assistance for environmental due diligence site assessments and investigations as part of a task order on-call Hazardous Materials Services Contract with the New York City School Construction Authority (NYCSCA). At a prior consulting firm, Mr. Mankovich served in a senior role on an on-

Education

call Hazardous Materials Services Contract with responsibilities inclusive of project management, client consultation and coordination; project scoping and schedule forecasting, budget review and management; project staffing and supervision; subcontractor and contractor coordination; and invoicing and payment monitoring. Technical experience included site assessments and investigations, subsurface investigations, work plans and cost estimates, SVI investigations, IAQ investigations, remedial investigations, and other client-related assessments and investigations. Additionally, served as Project Manager on a NYCSCA on-call Asbestos, Lead, Mold & PCB Environmental Services Contract related to PCB surface soil investigations and remediation for public schools. From March 2016 to June 2017, on assignment as Contingent Staff at the NYCSCA Industrial & Environmental Hygiene Division in Long Island City, Queens, Mr. Mankovich provided in-house technical assistance and support services for due diligence efforts related to property acquisitions, new leases, and lease renewals for new and existing public schools. Mr. Mankovich also served as a project manager for an on-call Hazardous Materials Services Contract at another prior consulting firm and was responsible for the management and completion of Phase I ESAs, Phase II ESIs, IAQ Investigations, UST Investigations, and spill investigations. (5/04 – 1/07 and 7/13 – 6/17)

NYC Economic Development Corporation Environmental Testing, Remediation & Monitoring Services Retainer Contract – Senior Project Manager

Provided technical assistance for environmental tasks relating to Petroleum Bulk Storage Tank compliance and the assessment, investigation, and closure of spill sites. The properties were located throughout the New York City metropolitan area. (7/13 – 6/17)

NYC Department of Design and Construction On-Call Environmental Consulting Services Contract – Senior Project Manager

Managed and prepared Corridor Assessment Reports, Limited Subsurface Corridor Investigations, Phase I ESAs, Phase II ESIs, and other environmental assessments and investigations in accordance with ASTM International and NYC Department of Design and Construction standards. (1/07 – 7/13)

Developers, Non-Profit Organizations & Financial Institutions, Environmental Site Assessments and Investigations and Environmental Remediation Management – Senior Project Manager

Provided overall project management and technical assistance for a wide range of due diligence site assessments and investigations. Project management responsibilities included development of new and existing clients; bid on new work opportunities; project scoping and budget management; interoffice project consultation and coordination; project staffing and mentoring; insurance and subcontractor agreement coordination; and client invoicing and payment monitoring. Technical experience included the performance of Phase I ESAs, Phase II ESIs, SVI Investigations, Remedial Investigations and Work Plans, Vapor Barrier Inspections, IAQ investigations, UST/AST Investigations, Risk Management Plans, and QA/QC of work products produced by colleagues. Transactions/properties included commercial, residential, industrial, manufacturing, acquisitions, loan/financial assistance

for redevelopment, regulatory oversight including E-Designated properties and Voluntary Cleanup Program properties under the supervision and approval of the NYCOER or NYCDEP (prior to 2009). The projects also included properties in the NYSDEC spills program that required assessment, investigation, and spill closure. (1/07 – 7/13)

The Port Authority of New York and New Jersey, Former World Trade Center Site and Transportation Hub – New York, NY

Provided assistance with oversight of the sampling plan for the excavation and disposal of soils from the eastern “bathtub” of the former World Trade Center Site and Transportation Hub. (1/07 – 7/13)

NYC Economic Development Corporation, Environmental Site Assessments, Staten Island, NY – Project Manager

Prepared Phase I ESAs in accordance with ASTM International and client standards. Results and interpretations of the assessments were used to prepare the Hazardous Materials Chapter of the Environmental Impact Statement. (5/04 – 1/07)

NYC Transit Authority, Environmental Site Assessments – Number 7 Subway Extension and Hudson Yards Rezoning and Development Program – Project Manager

Prepared Phase I ESAs and Phase II ESIs reports in accordance with American Society for Testing and Materials and client standards. The Phase II ESIs included collection of soil and groundwater samples for laboratory analysis. Results and interpretations of the assessments and investigations were used to prepare the Hazardous Materials Chapter of the Environmental Impact Statement. (5/04 – 1/07)
