Contact Name: PLANT CHEIF ANDREW KITTLE
DEC Memo: "10/02/09-HRAHMED-Spoke to DEP Kapadia (718 447 1100). As per him,

Remarks:

Clean Fuel who is the contractor for ACCESS-A-Ride is pumping contaminated water into Vankull. Access-A-Ride facility is next to DEP plant. Clean Fuel is probably excavating a tank.
10/05/09-Hiralkumar Patel. visited site (5 PM on 10/02/09). met Mr. Kittel. Mr. Kittel mentioned that he observed black material being dumped into creek from adjacent property. Mr. Kittel did not observed any sheen/rainbow on water. visited site at 1959-1963 Richmond Terrace. met Tom Spinelli, manager of the property and Jerry (347-838-6278) from True Blue Environmental (contracto installing new tank). Mr. Spinelli mentioned that they are installing 10,000 gal diesel tank for Access-a-ride, which occupies building # 1963. they used hydrant water to test tank and filled entire tank with water. during test, leak was found in tank, so they pumped out 10,000 gal water onto property parking lot. this water ran into plant area along creek and picked up some dirt before hitting creek and that was the reason for black color on water. there was no oil in tank. found water in excavation for new tank. no sheen observed in excavation. no odors in area. dispenser for diesel tank will be located on parking lot, in rear of building # 1963. Terrace Development LLC. Tom Spinelli **manager** Ph. (347) 992-3495 could not find PBS record. 1:44 PM:- spoke with Tom and asked him to confirm that correct paper work has filed for PBS registration. spill address changed from intersection of Richmond Terrace and Bodine Street to 1863 Richmond Terrace. based on observations during the site visit, case closed."
"Working for Access-a-ride and are pumping contents of fuel tank in to VanKull Creek. Please contact NYCDEP."

Spiller Company: 001
Contact Name: JIMMY FOX
DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 141-329 Con Ed notes: 2/12/02 @ 1540 hrs Mike Capone reports 6 ounces of gear oil spilled from truck 60520 in front of guard shack at 1 Davis Ave. Leak is contained, no smoke or fire, no sewers or waterways affected. Facilities was called at 1545 hrs to do cleanup. Ed Louis did cleanup with speedy dry, less than a bag of non hazardous waste. Cleanup complete at 1550 hrs. Vincent Reneo (81202) EGS Update 2/13/02 0750 Hrs. This report is updated to include the following: 1) the spill was on asphalt, 2) the waste was disposed of at Davis Avenue, 3) the vehicle was being towed by Apple Towing and 4) the vehicle was brought to Victory Boulevard by vendor....G. Triolo, #01868.

===== Update

... John Gaglio reports that the contractor Apple Towing, may have caused this spill from 1 Davis Avenue to 4400 Victory Boulevard (E2MIS #141335), depending on the amount of gear oil remaining in the vendor's vehicle. A total amount of 1qt. 6 ounces of gear oil leaked at both Con Edison locations combined. ERT to be notified by J. Gaglio. A in depth investigation will be performed by Bill Stretkovic as per John Gaglio. G.Catalano #47582 13FEB2002 1500 ERT Comments: CIG called this spill in as third party (Apple Towing) spill to DOT. CIG called NRC because that is who they report DOT incidents to. NRC however passed it on to the Coast Guard who called asking how much went into the water. I explained to them what happened and that some could have reached the sewer. CIG did not have phone numbers for City or State DOT. ERT found numbers on the web and made the calls: I spoke with NYS DOT Bureau of Environment who stated that her department they did not take or require spill reports and didn't think that such reports were required to DOT. I then called the NYSDOT trucking and hazmat department number listed on the web site and got a personal voice mail box. I didn't leave a message. New York City DOT said they only take road spill reports if they are on a Highway (they are not responsible for roads) and if they are a safety hazard. They said we should call sanitation if it needs to be cleaned up and they said we might want to call NYPD if we think it is violation. I didn't call sanitation because it happen yesterday, was a small amount and we don't where it is, and it probably doesn't need cleaning. I didn't call the police because there was no evidence of a violation. W. Capune #85485"

Remarks: "caller states 6oz leaked out out of their tow truck onto the ground - not cleaned up - con ed #141329"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 4/3/97 1445 HS. J.DEROSA TRANSPORTATION REPORTS THAT ON HIS WAY INTO THE VBSC HE NOTICED ANTIFREEZE LEAKING FROM A PRIVATE VEHICLE IN THE VBSC EMPLOYEE PARKING LOT. THE OWNER IS ON LOAN TO WESTCHESTER FOR STORM RESTORATION. HE NOTIFIED THE ENVIRONMENTAL GROUP AT VBSC OF HIS FINDINGS AND PROCEEDED TO CLEAN THE SPILL. HE USED SPEEDI-DRI AND ABSORBENT PADS TO ACCOMPLISH THIS. UPON COMPLETION OF THIS TASK HE NOTICED THAT THE ANTIFREEZE WAS DRIPPING FROM THE RADIATOR SO HE INSTALLED ABSORBANT PADS AND A 3 GALLON DRIP PAN UNDER THE VEHICLE AND LEFT A NOTE INFORMING THE OWNER OF THE SITUATION. THE CLEAN UP WAS COMPLETED AT 1530 HRS. AND DISPOSED OF THE DEBRIS ACCORDING TO COMPANY PROCEDURES. GG 27365. 4/4/97 2125 HRS UPDATED TO REFLECT CHANGE IN SITE FROM DAVIS TO VBSC. GG 27365. REPLACEMENT REPORT # IS 105993."

N.Y. 10314 Phone # (718) 761-2222 PBS# 2-240648 9/14/2005. J.Krimgold reviewed a letter report submitted by Controled Combustion, Inc. According to the report, the top of the tank was excavated to expose the connections for further testing. It was discovered at that time that the top of the tank was deteriorated and had holes in the steel shell. There were no visible evidance of any oil on or around the tank. This tank will be closed in-place and a new 8000 gal tank installed. Results of subsurface investigation will be submitted to the Department. 10/17/05. J.Krimgold reviewed the letter report submitted by Miller Environ. dated Sept. 21, 2005. They performed subsurface investig and found the contaminants levels below or marginaly above TAGM levels. NFA. "

DEC Memo: "TTF letter sent - see eDocs Green Card receipt shows mailing was accepted by B. Schnetzler at NYC DCS on 8/13/08 see eDocs 07/16/13 - Spill Case is transferred from Moses Ajoku (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 09/25/2013 - V. Brevdo Reviewed Spill Case and Records as well as PBS records. There are two 10,000 gal tanks - one closed in place and one operating. Tank that was closed in place received DEC PBS notification of closing dated April 3, 2012. This tank was properly closed in place. Operating tank was certified by DEC and received PBS certificate issued on 11/06/2012 expiring on 10/15/2017. Operating tank and piping system were tested in 2012 and passed the

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON - MANHOLE 51 (Continued)

1016960536

Owner/Op start date: 07/07/2013
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 08/07/2013
Site name: CON EDISON MANHOLE: 51
Classification: Not a generator, verified

Date form received by agency: 07/07/2013
Site name: CON EDISON MANHOLE: 51
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

Violation Status: No violations found

Issued a letter (certified mail) to owner and requested to contact me within 30 days with the proof of activities under taken in respect to that spill. 12/05/2005: Received reply from the owner with 4 pages of documents. 3 of them were tickets from ABC tank cleaning & Repair for cleaning activities. Another one is a copy of letter wrote to Attorney at Law by James Tizio (owner)explaining that Mr. Bepin of the Dept. of Environmental Conservation (718 337 4357) - this number is for the NYC Dept. of Environmental Protection. Letter stated that documentation provided by the ABC Tank Cleaning Inc., showing procedure used for removal of tank was adequate. No samples taken to confirm there was no contamination. (Sadique)"
Remarks: "test method NDE 1000 - excavation will be done and the tank will be retested"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004435371

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/28/09 - Raphael Ketani. I spoke to James Robinson at Penn Maritime (917) 539-2596. He said that 1 quart of slop (a combination of heavy oil residue and water) spilled onto the wooden dock. The slop is generated by the burning of the heavy oil in the engine of the tug boat. After the residue is generated, it is stored in a holding tank on the tug boat until it can be off loaded. Somehow, the one quart of slop landed on the dock. They cleaned it up with pads. It was not apparent that any slop had entered the surface water. I closed the spill case. "

Remarks: "CALLER STATES THAT DUE TO A SLUDGE REFILL ABOUT LESS THAN A QUART SPILLED TO THE DOCK. CLEAN UP WAS DONE."

Edgar, but could only leave a message. 4/3/07 - Raphael Ketani. I sent a CSL to the new owners, New York Prime, LLC, 1163 Forest Avenue, S.I., 10310-2408. Mr. Edgar called to say that the new contact for the project is Kevin Cretella (201) 761-0025, ext 11. He believes that Mr. Cretella works for the company that bought the building. 4/11/07 - Raphael Ketani. The CSL came back unopened with NOT DELIVERABLE AS ADDRESSED. I tried calling up Mr. Cretella, but could only leave a message. Mr. Cretella called me back. He said he was out on sick leave, but now he's back. He added that he will work to get the issue resolved. He said that he is about to sign a contract with Island Tank to have the spill investigation and cleanup done. He said that nothing has been done at the site as of today. Mr. Cretella said that his company is New York Prime, LLC and they do own the site, but their address is 675 Garfield Avenue, Jersey City, NJ 07305. 7/23/07 - Raphael Ketani. I contacted Mr. Cretella. He said that he was negotiating a contract to agree on the plan of work. He said that he didn't know when the contract will be signed, but as soon as it is work will start. I told him that he has until 8/6/07 to get started. 8/17/07 - Raphael Ketani. I spoke with Mr. Cretella and told him that the 8/6/07 had passed and I asked him whether the work had started. He said that a contract was set up with EWMA, but he doesn't know when they will start. I told him that work should start as soon as possible and to call me today when he knows the start date. He said he will. 10/11/07 - Raphael Ketani. I received a call from Brad Chupick of Environmental Waste Management Associates (973) 560-1400, ext 160. He said that his company is going to hire another company to do the tank pull or abandonment and EWMA will do the investigation and remediation of the contamination. He added that the tank company will do the registration of this 550 gal. tank (AST) and the other one which was abandoned in place with just water in the 1980s or 1990s (UST). I told him that he needs to let DEC know 30 days in advance of the date of the tank pull. He said he will. 11/30/07 - Raphael Ketani. I spoke to Mr. Chupick. He said that the owner had been procrastinating regarding resolving the tank and contamination issues. However, the owner was finally convinced to get started again on the project. Mr. Chupick said that he hired an expeditor to get the permits to pull the tank. This person is Daniel Ash (718) 474-3400 at Walter T. Gorman, PE, PC. I told Mr. Chupick that the tanks hadn't been registered and that the 1,000 gal. abandoned UST needed soil borings around it and a line test. He said he will have this done and get the expeditor to register the tanks. 1/9/08 - Raphael Ketani. I tried to contact Mr. Chupick (973) 560-1400, ext 160, but could only leave a message. 1/11/08 - Raphael Ketani. I received a message from Mr. Chupick. He said that he should receive the signed PBS application from the owner and the local building work permit to do the tank removal on monday. 1/31/08 - Raphael Ketani. I tried to contact Mr. Chupick, but could only leave a message. 2/4/08 - Raphael Ketani. I spoke to Mr. Chupick (973) 560-1400, ext 160. He said that his company will remove the 1000 gal. active UST. The abandoned 550 gal. UST will not be removed. Mr. Chupick is doing an investigation only on the site of the 1000 gal. UST. I spoke to Mr. Cretella. He said the two new 275 gal. tanks are coming today and will be installed. I called Mr. Chupick back and told him to add the 275 gal. tanks to the PBS registration. He said he will. 2/13/08 - Raphael Ketani. I tried to contact Mr. Chupick regarding the actual contamination remediation, but could only leave a message. 4/4/08 - Raphael Ketani. I tried to contact Mr. Chupick

and Mr. Cretella (201) 761-0025, ext 11, but could only leave messages. There still is no PBS registration. I found another address for the site in Property Shark. It is Frank Cretella, New York Prime, LLC, 2946 Richmond Terrace, S.I., 10303. Also, 1388 Richmond Terrace has a prime address of 1 Elm Street and another alternate address of 13 Elm Street. Frank Cretella's phone is (201) 761-0025, ext 13. Mr. Chupick called me back. He said that Mr. Cretella had been out sick again for a little while. He said that the PBS form is partially filled out, but he doesn't know the status of the tanks (whether certain ones have been installed or such). So he didn't complete the form. I told him to get the form completed as soon as possible and to send it up to Albany. Mr. Chupick said that the spill was generated by a tank system failure, but no one knows where the failure occurred. I told him that it might be easier to finish the remediation job if it is determined where the system failed. I suggested doing specific isolation tests. I asked him what the correct ownership information is. He said it's Frank Cretella, New York Prime, LLC, 675 Garfield Avenue, Jersey City, NJ, 07305. I told him I will correct the address and send out the corrected CSL. He added that Mr. Cretella hasn't paid EWMA for thousands of dollars. So the work is on hold. I sent out a strongly worded CSL. 5/5/08 - Raphael Ketani. I checked the PBS database. The site still hasn't been registered. I sent a STIP package to Kevin Cretella in New Jersey. 5/7/08 - Raphael Ketani. Fernando Fernandes of New York Prime, LLC cell (908) 477-1993/FAX (201) 761-0026 called. His boss is Frank Cretella, who is also Kevin's boss. He said he didn't know about the need to do more work at the site until he was just told. He said that things hadn't been moving partially because Kevin Cretella (cousin to Frank) is in the hospital again. He said Kevin used to do the paperwork, but he is very sick and may apply for disability. Mr. Fernandes said that he is the Construction and Project Manager and he will take care of everything. He added that an application was needed to be submitted to the NYC Dept. of Buildings for a permit to remove the tanks. However, the engineer who was supposed to file the paperwork hadn't been paid. So the application wasn't submitted. Now, though, the engineer has been paid, deposits have been made to the various contractors for their work, and all of the contracts have been signed. So the application will be sent to the NYC DOB either this friday, next monday or next teusday. DOB has 21 days to approve the application and issue the permits. I told Mr. Fernandes that I had sent a STIP agreement to Kevin. He said that he will sign it. I told him that it's a legal document and shouldn't be signed lightly. I told him that if he wishes to sign it, he should first show it to the company lawyer. However, I added that if New York Prime is going to move forward on the project and do the investigation and give DEC weekly updates, then the STIP isn't necessary. Mr. Fernandes said he will give the DEC weekly updates, keep the project moving, and he will keep after the DOB to get the permits. I told him that would be fine and to hold off signing the STIP. 5/14/08 - Raphael Ketani. Mr. Chupick contacted me. He said that he has filled out the PBS Application and he will send it with the deed and a check to the PBS Unit at Albany DER. 5/20/08 - Raphael Ketani. Mr. Fernandes called and left a message. He said that the engineer submitted the application for removing the tank. He is now just waiting for approval of the application before the work is done. Mr. Fernandes said that Precision Plumbing (908) 447-1993 will do the actual removal. 5/22/08 - Raphael Ketani. Mr. Chupick called (973) 560-1400,

ext 160 and asked what the fee should be for registering the tanks. He said that one of the 1000 gal. tanks is coming out and will be replaced by three 275 gal. ASTs. He said this will give the site (1) 1000 gal. UST, (3) 275 gal. ASTs, and (1) 550 gal. AST. I told him to talk to Nick Lombardo, in the PBS Unit. Mr. Lombardo sent me a message on a piece of paper stating that since each of the tanks are fuel oil and under 1100 gals., they are unregulated and they don't have to be registered. 6/9/08 - Raphael Ketani. I spoke to Mr. Fernandes. I asked him whether the work has started. He said that as far as he knew, the permit still hadn't been issued. I told him to check on it and get the ball rolling. He said that he had an emergency in Portugal and had to be away for 2 weeks. I told him I understood, but that the work has to start. He said he will look into the matter and get back to me. 7/15/08 - Raphael Ketani. Mr. Fernandez called to say that he just got the permits and he is nailing them to the wall. He said that Prestige Plumbing is finishing up their work on the tanks and Waste Management has finished their work. 7/22/08 - Raphael Ketani. Mr. Chupick (973) 560-1400, ext 160 called and left a voice message. He said that he submitted the tank registration form and fees. However, the contractor he was going to use to pull the tank couldn't do it. So he hired another contractor and he will reschedule the pull. 8/18/08 - Raphael Ketani. The DEC needs to receive the investigation/remediation report and a revised PBS registration. 10/13/08 - Raphael Ketani. I received a call from Mr. Chupick today stating that the fuel had been removed from the formerly active tank and that they were going to pull out the fuel tank tomorrow. 10/15/08 - Raphael Ketani. Mr. Chupick left another message today. He stated that they cleaned out the tank and pulled it. Soil samples were taken from the north, south, east, and west sidewalls. They also took 2 samples from the centerline of the tank grave and from the trace of the fuel pipe. The fill box was the site of leakage and soil was removed from this location. Then they dug 2 feet down and took additional samples. Mr. Chupick wanted to know what analyses to run on the soil samples. 12/17/08 - Raphael Ketani. Today I received the 12/9/08 UST removal and tank grave remediation report from EWMA. I reviewed the report and found the analytical results to be almost entirely below TAGM or non-detect. I spoke to Mr. Chupick and told him that DEC will issue an NFA letter. I also told him that the PBS registration is missing information for some of the tanks. I explained that he must submit a revised registration with the missing information, or else DEC will consider the tanks not to be registered and in violation. He said that he will submit the necessary information. 12/18/08 - Raphael Ketani. I sent out the NFA letter with a copy of the PBS record, and a statement that EWMA has to correct the PBS registration where circled. Based upon the data in the 12/9/08 UST removal and tank grave remediation report, I am closing the spill case."

Hazardous Waste Summary:

- . Waste code: B004
- . Waste name: PCB articles containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs, excluding small capacitors. This includes oil-filled electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

- . Waste code: B007
- . Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

Violation Status: No violations found

DEC Memo:

Remarks:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 6/14/2002 - Sangesland spoke with Kathy at Grandview Structural Steet. She said it appears that someone dropped oil in the center of the street in front of her company's building. The oil rolled to the curb and is now moving down the block. Weather today is 60°F and heavy rain Sangesland called NYC Sanitation and requested that the area be sanded. Sanitation stated that if the spill was large (their judgement) the area would be sanded and then swept up. Sangesland requested that Sanitation speak with Kathy at 243 Grandview when they go to the scene."
"yesterday afternoon they noticed a large spill of diesel ifo their office...some powder was put on it. nfd."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ e2mis no. 149878: Approx. 1 qt. of unknown oil mixed with approx. 800 gallons of water. A sample was taken and sent to the Chem Lab for analysis. Lab analysis show oil contains less than 1 ppm PCB (LS# 03-06821-001) and presence of substance similar to lubricating oil (LS# 03-06847-001). This is considered a Third Party Spill because the substance found in the manhole does not resemble oil typically found in the Company's manole electrical equipment. There was a similar incident happened in MH 83 back in 3/23/01 (e2mis # 136069. DEC spill # 00-13432). Sheen (Oil ID - Lub Oil) was found in MH 83 and it kept reappeared after many cleanup attempts. As a result, the NYSDEC recognized that the souce of oil did not come from the Company and agreed that the Company could stop the cleanup and submitted the report to the DEC for closure approval. Copy of the old e2mis report 136069 was submitted to and was accepted by the DEC for closure. This new incident appeared identical to the incident happened back in 2001 with the exception that lots of fresh water was found gushing into the manhole through the cracks. This was suspected that this water might come from a water main break. As a result,

MANHOLE #83 (Continued)

S106017332

possible water main break was reported to the NYCDEP through the CIG. Cleanup contractor Clean Venture was summoned to continue pumping water (with sheen) from MH 83 into the frac tanks in order to maintain a level that was low enough to allow the UG crew to perform replacement of the cable. There was no evidence that any of the cable inside MH83 was leaking oil. As a result, a total of approx. 29,000 gallons of oily water was generated. Approx. 11,000 gallons of such water was shipped to Con Ed's Astoria water treatment facility as PCB waste because a hard copy of the PCB lab report was not yet available at the time of the waste shipment; and approx. 18,000 gallons of such water was shipped by Clean Venture to Lorco Inc. located at Elizabeth, NJ for disposal as non-hazardous oily water based on the result of the analysis. In addition to pumping water from the manhole into the frac tanks, Clean Venture also pressure washed the manhole (cable, walls, and floor) with citrus cleaner. After the cleanup was completed, it was evidenced that there was always an oil sheen flowed on top of the water whenever the pumping stopped and the water arised inside the manhole. 9/22/03 Ann Ip discussed with Jane O'Connell of the NYSDEC regarding this incident. Since the Oil ID result indicates oily substance in MH 83 resembles lubricating oil, this is considered the Third Party Spill (almost identical to the incident happend in 3/01). As a result, Ms. O'Connell agreed that we may stop cleaning this manhole and submit this incident report to the NYSDEC for closure approval."

Remarks:

"1 QT OF UNKNOWN OIL ON 800 GLS OF WATER, WATER LEVEL KEEPS CHANGONG AS THERE MAY BE A FRESH WATER LEAK."

DEC Memo: "08/18/09 - See eDocs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC Inspector Notes: 4/11/01 O'Connell met with Ann Ip. Crew opened manhole which had a think layer of oil on top of the water. Oil has been identified as lube oil. Adjacent to auto wrecking yard. Con Ed will pump down manhole, clean it and seal ducts to prevent further infiltration of oil. 4/12/01 Referred to Rommel for reassignment to Spills staff. 10/23/01 No furthur actions required of Con Ed. Con Ed e2mis Notes: 3/23/01 CDUG pumped out 15570gal of water then found oil in manhole. Treating as 50-499ppm PCB. 5gal oil and 700gal water in manhole. Sample returned <1ppm PCB and similar to lubricating fluid. Flashpoint 210 deg F. 4/11/01 Ann Ip met with Jane O'Connell. Manhole is next to an abandoned railroad track in middle of a junk pile. When the manhole cover was removed, approx 2-3gal oil was found on top of water. A slight sheen was found on top of adjacent manhole #82 (250 ft east of MH#83). DEC agreed that Con Ed seal/plug the conduits or waterproof the manhole to stop oil/water from reaching hole. 5/1/01 S&D Environmental pumped liquid down in order to perform inspection. Approx 2150gal oil/water mixture was pumped out. 7/26/01 Clean Venture pressure washed manhole with citrus clean on 7/16/01. 8/23/01 Tried to inspect manhole and could not locate. 9/28/01 Survey was performed to locate manhole. Found on 9/25/01. 10/23/01 UG Construction removed soil and debris piled on top of manhole. During inspection of hole, found light sheen was on top of water. Absorbant pads were used to remove sheen and were unsuccessful. "

Remarks: "5 gallons of unknown oil and 700 gallons of water. no active fire or smoke. samples taken. cleanup pending test results. ref #136069. "

Spiller Name: NYC FIRE DEPT
Spiller Company: CHEMICAL BUILDING
Spiller Address: 14 VAN STREET
Spiller Company: 001
Contact Name: NYC FIRE DEPT
DEC Memo: "Major event - Fire/explosion - 1 fatality Tipple responded to the site. Site manufactured Bio-Diesel Fluid and Glycerin water No PBS or CBS found for this address Per NYC Tax Database - Contact Address: 14 Van Street Corp. 14 Van St. Staten Island, NY 10310-1311; block 00187,lot 0148 Phone directory (prior to fire) Plating System Inc., 14 Van St - 718-720-6646 4/27/06 - Austin - Spill inadvertently assigned to CO staff (Keating) - reassigned to Ketani 4/28/06 - Raphael Ketani. I tried to find out more information about the explosion, but could only reach the Headquarters of the NYCFD (718) 999-2000. I went through the menu and reached the Fire Records office. The person answering the phone told me to send a FAXed record request (718) 999-0422 on official letterhead requesting a copy of the FD investigation report for the site and date in question. I sent the FAX and a CSL to the owner. 5/15/06 - Raphael Ketani. I received the FD investigation report on 5/4/06. It told me about the Fire Department's response to the explosion, but nothing else. It's not clear whether there was and still is oil contamination of the soil. Also, the April 28, 2006 CSL letter was returned due to the addressee being unknown. 5/22/06 - Raphael Ketani. I visited the site today and took many pictures. The site consists of the left half of a building which also contains a car repair shop, and a yard filled with tanks of all kinds, 2 cars on the left, and a gray cargo container. There are several tanks that look like they had burst open. I thought I saw some residue in the bottom of a large silver horizontal tank. There are rectangular plastic tanks about 4 feet high which appear to have some type of liquid in them. There is what an old AST on site which is 3/4 full and is rusting badly at one end. There are 2 derelict cars on site and a gray shipping container with unknown contents. There are other large plastic(?) tanks on site and I couldn't see into the storage area below the office of the former factory. No liquids were visible on the ground. I did detect a propane like odor on site. However, I couldn't find a gas cylinder. Mr. Jeremy Gaeta of Gaeta Inc. at 22 Van Street next door came up to me at the site and told me that the owner of the property is Marty and he moved his operations to Secaucus, NJ. He didn't know Marty's last name or his company's name. 5/24/06 - Raphael Ketani. I spoke to Pete Williamson of NYC DEP Hazmat (718) 595-4646 regarding the case. He said that he was the responder at the scene after the explosion happened. He said that DEP identified the materials, did over packing, and other work. He said that all of the chemicals were removed. I asked him who the owner was or the renter. He said he didn't know that off hand. I

asked him whether this was an active case with DEP. He said he didn't know that either. Mr. Williamson said that he will get back to me with additional information. 5/25/06 - Raphael Ketani. I tried to reach Mr. Williamson, but he wasn't in. So I left a message with the receptionist stating the Spills FAX number where he can send the DEP report for the site. 6/2/06 - Raphael Ketani. I contacted Mr. Williamson and he asked whether someone from DEP had called me. I said No. He said I should get the cleanup report within the hour. Mr. Williamson called me back later and said that the report isn't finished and wont be for a week or so. He said he will send it as soon as it is finished and approved. 6/22/06 - Raphael Ketani. I left a message for Mr. Williamson. 7/5/06 - Raphael Ketani. I spoke to Mr. Williamson. He said the report is still be reviewed and revised. He said they haven't forgotten about DEC. It's just that these things take time. I told him to get it to me as soon as it is in its final form. 8/18/06 - Raphael Ketani. I tried to reach Mr. Williamson, but could only leave a message with his secretary. I reached Mr. Williamson. He said that Mr. John Wilson, Chemist was supposed to give me a call regarding the site and the report. I told him that I never received a call. Mr. Williamson said that he will call Mr. Williamson and try and straighten the situation out. Mr. Wilson called me. He said that the report is still being edited in the fine details. He said to give it more time. I asked him whether he knew who the owner of the property was. He said it is Marty Borruso and the company was Environmental Alternatives. Mr. Wilson said that he didn't have the current address for Mr. Borruso in New Jersey handy, but that he will look it up and get back to me. He said that the report in review and editing is the Commissioner's Tech Report. Mr. Wilson added that Mr. Borruso was issued Right To Know violations and DEP and him already went to court. Some time later, I did a GOOGLE Search with Marty Borruso's name. I came up with many listings with his name in it. Most dealt with alternative fuels - specifically biodiesel generation and marketing. He was involved in alternative fuels marketing and electro or metal plating in Kearny, New Jersey. The site in Staten Island that blew up was formerly Environmental Alternatives, as Mr. Wilson had stated. I found Mr. Borruso's working cell number as (917) 273-5822. He lives at 26 Flagship Circle, Staten Island, 10309. His home numbers are: (718) 984-0729/8683, according to the January 2006 phone book for Staten Island. The phone book also lists the old site name as Plating Systems, Inc. with the old non-working phone number. I made contact with the legal division of DEP Hazmat (718) 595-6555. I spoke to Atty. Charles Shamoon (718) 595-6546 and asked him who might be handling an investigation or legal case against Environmental Alternatives and Marty Borruso. He said he didn't know, but he took down the name of the company and Mr. Borruso's name, and some particulars about the case and said he would pass my request around to see if anyone was involved. He said that one way or the other, someone will be getting back to me. Later, I tried to find out if the Division of Environmental Enforcement in Region 2 has a legal case against Mr. Borruso or the site, but was told that the clerk was not in and she would know. I will try later. I sent Mr. Borruso a CSL to his home address. At 4:45PM today, Enzel Kenzera (718) 595-4784 of the DEP Hazmat legal division called. He explained that there never was a DEP legal case against Mr. Borruso as he cooperated in the site investigation and cleanup. Mr. Borruso was given failure to disclose summonses, but nothing else. Mr. Kenzera said that DEP worked 24 hours a day to clean up the site and

S105842318

moved 4 tractor trailer loads of materials out. He said there is nothing left on site, but DEP never did a subsurface investigation. 8/22/06 - Raphael Ketani. I spoke with the secretary for the Region 2 office of the Division of Law Enforcement, Dawn Francis. I asked her whether she knew of any legal or enforcement actions against Mr. Borruso or either of his companies. She said she will look search for what ever information DLE has. Dawn called me back and said that she has nothing in the way of tickets issued, fines, or DLE actions of any kind for the subject owner or businesses. 8/23/06 - Raphael Ketani. John Urda of DEC Region 2 Legal Affairs responded to my e-mail by phone and told me that DEC doesn't have a legal case against the property or the owner. Pursuant to the research into the site, I had a conversation with Randall Austin regarding what action I should take at this point in time. His comments, based upon my site visit and my case notes, were: 1) the site is covered in concrete, and there are no pipes or fill ports passing through it, so there are no pathways to the subsurface - so we may assume that the soil below the concrete is free from contamination from the site 2) DEP said they took all of the materials and the concrete is clean - so, probably, there are no materials or contamination on site 3) there is a 275 gal. home heating oil tank on site with something in it, but it isn't leaking - so we don't have jurisdiction 4) if anything, the Fire Department would be lead in this case as there was an explosion, but there is no documentation that they are doing anything and there is no legal case with DEC Based upon Mr. Austin's comments, my site visit, and my research, I am administratively closing the spill case. 11/19/09 - Raphael Ketani. Kimberly Staiger (sta-ger) (732) 452-6415 from Region 2 EPA called regarding the site. She said that a group called the North Shore Waterfront Conservancy received an environmental justice grant from the DEC and investigated 21 sites that have the potential to affect the environment in Staten Island or are affecting the environment. This site was one of the 21 investigated. Ms. Staiger asked what the status of the DEC case was. I told her that the DEP had removed all of the materials, the concrete floor was clean, and that no tanks were leaking. So, the DEC had no legal jurisdiction. She said that the report generated by the NSWC had made its way up the administrative ladder and had caught the attention of people in the EPA. She was just following up on the information in the report. She said she had been there and hadn't seen much of anything at the site. She asked if there were any reports she could review. I looked in the E-docs and found a report and described it to her, though it wasn't a report, but a slide show and other documents. She said that wouldn't be helpful and the conversation ended."

Spiller Company: 999
Contact Name: EVAN TRUMPATORI
DEC Memo: "6/5/15-Ahmed-Spoke to Evan Trumpatori at Woodard and Curran (631-662-9991). As per him, they are doing Phase I and II for a prospective buyer for the property. The property has been used as a parking lot for the last 50 years, before that it used to be a gas station. During Phase II investigation they found contamination in soil and groundwater. They will send Phase I and II report on 6/8/15. Since this will be a long term project and will need site visit and followup in future the site is assigned to Mahat as he is the off-hour secondary. Will forward the report to Mahat for followup, when it is available. 6/12/15-Ahmed- Received the report from Evan, forwarded to Mahat for next step. 8/21/15: Mahat Phase II investigation report has been uploaded to the D2 for the reference. Report is under review. 12/23/2015: Rashad Spill reassigned from Mahat to Omar as per DeMeo. 12/24/2015: Rashad 17 Grove Avenue does not have an alternate address. No additional spills or PBS registration found for site. Phase 2 report was found in D2. 12/29/2015: Rashad Review of Phase 2 is as follows: Site is currently an empty parking lot. The report states they are investigating in preparation for the design of a proposed three-story building , it is not stated what the use of this building will be. The geotechnical investigation identified fill material in several boring and that the fill was identified as unsuitable for the new proposed construction. Groundwater was encountered at approximately 5-9 ftbgs and it suggests groundwater flows north towards aurther kill which is located 1000 feet north of property, past use of site included automobile service station, filling station, and a neighboring former machine shop. There is also a groundwater monitoring well on site. 6 soil samples as well as 6 groundwater samples were taken and the results are as follows: SB-1 - Clean Soil SB-1 - Groundwater(ug/L) - Arsenic-77, Barium-3420, Beryllium-27, Chromium-110, Lead-573 SB-2 - Clean Soil SB-2 - Groundwater (ug/L) - Arsenic-70, Barium-1580, Chromium-130, Lead-396 SB-3 - Soil 4-4.5ft (ppm) - PAHS-1.9 (benzo-pyrene, anthracene, Lead-190 SB-3 - Groundwater (ug/L) -

S117974112

Chromium-70, Lead-1360 SB-4 - Clean Soil SB-4 - Groundwater (ug/L) - Arsenic-108, Chromium-160, Lead-560, Manganese-10,900, BENZENE-1.3, 1,2,4,5 Tetramethylbenzene-27 SB-5 - Soil 6-6.5ft (ppm) - p/m Xylene-.49, Isopropylbenzene-7.1, n-propylbenzene-12 SB-5 - Groundwater (ug/L) - Arsenic-57, Chromium-130, Lead-260, BENZENE-10, TOLUENE-6.2, p/m XYLENE-12, isopropylbenzene-39, n-propylbenzene-29, 1,2,4,5 Tetramethylbenzene-38 SB-6 - Soil 2.5-3ft (ppm) - Lead-98 SB-6 - Groundwater (ug/L) - Arsenic-37, Barium-1900, Chromium-140, Lead-65 Woodard & Curran recommends additional sampling of soils and/or groundwater in the vicinity of SB-4 and SB-5 to determine extent of petroleum impacts. In addition to delineating the potential release associated with the former filling station, additional characterization of petroleum impacted would likely be required prior to construction for the purposes of identifying a disposal facility. Woodard and Curran recommends no further action with respect to the SVOC and/or metals exceedence present in the remaining soil and groundwater samples at they are likely related to the presence of fill material and sample turbidity. 11/23/16 - Lakhani - Continued file review Residential, commercial, and industrial properties surround the Site. The Site is located at the intersection of Maple Avenue and Grove Avenue. The uses and features of adjoining/nearby properties are described below: North: Commercial and residential buildings including a vacant grocery store; South: Residential and commercial buildings including automobile repair; East: Commercial buildings including Family Dollar, Divine Wood Furniture, and Alestra Auctions; West: Mixture of Commercial and residential buildings including a laundromat. 11/25/16 - Lakhani As per NYC City Maps, the owner of the property is: Community Health Center of Richmond, Inc. - Dental and Medical Specialty Center 439 Port Richmond Avenue Staten Island, NY 10302 Ph: 9178300838 Community Health Center of Richmond, Inc. 235 Port Richmond Avenue Staten Island, NY 10302 Ph: 7188761732 11/28/16 - Lakhani Called Community Health Center of Richmond and spoke to Keanna who gave the email contact of Henry Thompson, CEO of the Community Health Center of Richmond: chcrichmond@gmail.com. Henry was not in, but message was left with Keanna to have him call back. Called Evan Trumpatori (631-662-9991, etrump@woodardcurran.com) of Woodard & Curran and left a message to have him call back. Evan called back and he notified me that he had submitted a report to OER proposing additional soil borings and monitoring wells on the site. He said that they are planning to take soil vapor samples because a walk-in clinic is intended to be built on the open lot at 17 Grove Avenue. He will send the report to DEC Vought on Wednesday. Said the Shaminder is their OER liaison. Sent email to Shaminder requesting PM info and also DEC possible requirements. 12/5/16 - Lakhani 10:53 AM: Spoke to Evan and he said that OER PM Amanda Duchesne will expedite the review of the report, after which it'll be sent to DEC Lakhani for further review. 12/13/16 - Lakhani Shaminder replied on 12/11/16 via email giving Amanda Duchesne's, OER PM, contact: ADuchesne@dep.nyc.gov, 2123412077. He says that no work has been conducted on the site and that last month Woodard & Curran submitted a remedial action work plan. The work plan has not been approved yet. DEC Lakhani has not received a copy of the submitted report yet. DEC Lakhani called Amanda at 12:01 PM and left a message. 12/16/16 - Lakhani Emailed Amanda and Shaminder regarding a copy of the submitted RAP. Amanda responded and attached the Remedial Investigation Work Plan (uploaded to D2). She informed that the site was an old gas station/auto repair shop, and the work is slated to

begin next summer on a new community facility. Given the size of the site (approx. 30000 sq. ft.), OER's initial scope consisted of 9 soil borings (to be collected for the top 0-2' and for the 2' interval below depth of the excavation), 5 groundwater wells, and 8 soil vapor samples (to be collected at the intended depth of excavation). 12/19/16 - Lakhani File Review: Remedial Investigation Work Plan (Woodard & Curran, 10/2016) - The following scope of work has been developed based on the findings of the Phase I and Phase II ESAs conducted at the site in March and May 2015, respectively, and in accordance with the OER meeting on 05/26/16. Currently the site is a vacant asphalt paved parking lot. The proposed future use of the site is a commercial property with a non-profit community health center. Proposed plans include the construction of a 27000 sq. ft. three-story building. Impervious surfaces are proposed for the entire site. The proposed building footprint is 9000 sq. ft. The remainder of the site will be developed with paved asphalt parking areas and concrete sidewalks. There is no basement or subgrade level proposed for the site. Limited excavation will be done to facilitate the installation of the structural foundation and an elevator shaft. The final depth of excavation is approx. 5'bgs. There was a former automobile service station area and a former gasoline filling station at the site. The water table is expected at approx. 5'bgs. 2008 Phase II ESA by Advanced Cleanup Technologies, Inc. indicated that the groundwater at the site is impacted with VOCs consistent with gasoline. Two (2) groundwater samples collected near the former gasoline filling station contained VOCs at concentrations above AWQS, suggesting that the impacted groundwater is limited to the vicinity of the former filling station. Soil samples collected did not contain VOCs above SCLs for gasoline contaminated soils. Phase II was completed (refer to results above). Utility clearance will be conducted in two stages. Subsurface anomalies will be located using GPR, which will aid in determining whether there is potential for a continuing source of contamination at the site. An investigation of soil, soil vapor and groundwater is being performed. The proposed sampling program will address both recognized environmental conditions and historic fill, as well as to provide general horizontal/vertical characterization across the site for redevelopment purposes. A total of nine (9) borings will be completed at the site. At a minimum, a total of 18 soil samples will be collected. A minimum of five (5) borings will be converted to monitoring wells to collect groundwater samples. A total of eight (8) soil vapor and one ambient air sample will be collected. The depth of groundwater is expected to be encountered at approximately five feet bgs and general groundwater flow direction is expected to be northwest. Additional soil samples maybe collected from a soil boring if: 1) elevated PID reading and/or olfactory observations are noted during borehole advancement and/or; 2) field observations identify an upper fill layer underlain by native material. Soil vapor implants will be set at a depth of approx. 3'bgs. The soil vapor probe will be installed between 1' and 2' above the groundwater interface. Emailed Amanda and Evan approval letter and DEC requirements. Scheduled a call with Amanda for 12/20/16 at 2:30 pm. Also sent DEC requirement letter to Henry Thompson as well via U.S. Mail. 12/22/16 - Lakhani Spoke to Amanda regarding the proposed samples locations. Let her know that the top most left proposed soil boring can be converted to a well so that it can better characterize the contamination from the SB-4 and SB-5 2015 soil and temporary well ground water sample

S117974112

location. Asked to be sent 2008 Phase II ESA Report and development plans. Informed her that any vapor mitigation plans for the site must be reviewed by NYS DOH as a future healthcare center. 01/04/17 - Lakhani Emailed Amanda asking whether she received the 2008 Phase II report and the analyticals from the Whitestone Associates, Inc. Geotechnical Investigation report from April 2015. 01/06/17 - Lakhani 03:25 PM: Called Evan, after a missed call from him, and he informed that he will be submitting the 2008 ESA Phase II report and development plans. He plans to submit the revised RIWP to include groundwater location by early next week (1/9/17 - 1/13/17). Amanda emailed confirming the same. She also asked Evan for the April 2015 geotechnical analyticals. 01/10/17 - Lakhani 11:18 AM: Spoke to Amanda and she has received the documents from Evan. She will be sending these. She has also added DEC Lakhani to EPIC for easy future access to documents associated with 17 Grove Ave. 2008 Phase II ESA Report submitted and uploaded to D2. File Review: 2008 Phase II ESA Report (Advanced Cleanup Technologies, Inc., 05/19/08) - Advanced Cleanup Technologies (ACT) performed a subsurface investigation at the site during March and April, 2008. Two (2) 550 gallon gasoline tanks were located in the eastern portion of the site and a 1100 gallon fuel oil UST was indicated in the northeastern portion of the site. ACT investigated soil quality beneath the site by advancing five soil borings. Borings were completed between 10' and 15'bgs. All soil borings exhibited some olfactory evidence of contamination. SB-3 produced a PID reading of 375 ppm and a strong odor at the 9' to 9' depth. SB-5 produced a PID reading of 200 ppm and an moderate odor at the 8' to 9' depth. Each soil sample was analyzed for the STARS list of VOC in accordance with 8260. Soil sample from SB-3 analyzed for STARS list of SVOCs in accordance with 8270. Groundwater quality was determined during the current investigation through the installation and sampling of five temporary monitoring wells. Samples of groundwater from TW-3, 4, 5 contained detectable odors and PID readings of 92 ppm, 29 ppm, and 33 pm, respectively. VOCs were detected in groundwater samples from TW-3,4,5. TW-3 and 4 contained concentrations of VOC exceeding water quality standards. The presence of only trace concentrations of ethylbenzene (1.12 ppb) in TW-4 and toluene (1.13 ppb) in TW-5 indicates that residual gasoline constituents in groundwater have almost completely attenuated to below water quality standards. Monitoring well results are as follow: benzene 0.88 ug/L(MW-1). 02/21/17 - Lakhani DEC Lakhani sent the following email to OER Duchesne and Evan: I hope all is well. I was wondering if there was an update regarding the installation of the proposed soil/soil vapor borings and groundwater wells. Please keep in mind that any vapor mitigation plans developed as a result of the soil vapor intrusion study must be reviewed by NYSDOH as a future healthcare clinic. If you have the development plans for the site, could you please send them to me as well? 02/22/17 - Lakhani Evan called saying that he is still waiting on approval from OER Duchesne. Once approval is given, he will create a schedule of work and will share the schedule with DEC Lakhani so progress on the site can be tracked. 03/01/17 - Lakhani Emailed OER Duchesne for an update. 03/03/17 - Lakhani Emailed OER Duchesne about the RIWP. She responded approving the RIWP and will relay the information to Woodard & Curran Evan so he can begin work on the site. 03/16/17 - Lakhani Emailed Woodard & Curran Evan regarding schedule of work. Evan informed that now that they have finalized the scope for the RI investigation, Woodard & Curran is not preparing their proposal to the health center

to execute the RI. Woodard & Curran anticipates to mobilize to the site within a few weeks to execute the proposed scope. The field work will take approx. 4-5 weeks to execute (including pre-drilling activities, soil sampling, soil vapor sampling, and installation and sampling of ground water monitoring wells). 04/07/17 - Lakhani Emailed Evan for an update. Evan responded and informed that they are in the process of soliciting/receiving bids from drilling and lab subcontractors to support the proposed investigation. 05/22/17 - Lakhani Evan sent the following update: we have received multiple contractor bids for the execution of the field program and are finalizing our proposal. Once authorized, we will be prepared to mobilize to execute the RIWP. We provide updates to you and the OER case manager when we are getting ready to mobilize so you can make arraignments to check in on the field activities. 06/16/17 - Lakhani Evan emailed to inform that Woodard & Curran are wrapping up the bid process and have received bids from contractors to execute the work. 11/14/17 - Lakhani Emailed Woodard & Curran Evan Trumpatori for an update regarding the site. 11/17/17 - Lakhani Woodard & Curran Evan emailed: we have received all subcontractor bids, and provided a proposal to the client to execute the RIWP. We are waiting for authorization, and have been in touch with OER regarding some potential funding opportunities for RI execution. In addition, a new OER Project Manager was assigned to the Site in September her contact information is as follows: Myrna Hanna - Project Manager Office of Environmental Remediation 100 Gold St., 2nd Fl., New York, NY 10038 (212) 341-2077 - mhanna@dep.nyc.gov Myrna and I touched base to discuss the project, and were trying to coordinate a conference call last month to discuss the funding opportunities I referenced above, but have not had a chance to connect yet. In the meantime, I am going to be setting up a call with the Client (likely next week) to get an update on the status of our proposal, and the overall redevelopment project. I am happy to provide an update following discussions with the Client. 04/02/18 - Lakhani Woodard & Curran Evan Trumpatori emailed the following: We recently had a conference call with the Client and we are still waiting for approval to conduct the RI. The client is still committed to implementing the RI and overall remediation as part of future site development - to that end they have been working behind the scenes to finalize the overall redevelopment plans and procure a final Architect for the project; however, during our call we discussed moving forward with RI concurrent with final development planning to keep things moving. Based on the most recent discussions, we are revising our proposal to reflect any updated changes in pricing from subs, etc. and will be resubmitting for authorization. On a parallel track, we are working to help secure funding and prepare an application for additional grants through the NYC/OER program. Myrna and I had a chance to connect a few weeks ago and discuss the overall status of the project. Following that call, we have been coordinating to have OER provide a letter to CHCR to document the Site's involvement in the NYC VCP program and the eligibility to receive reimbursements - this was requested in order to provide the project financing team documentation of the RI approval and the intention to address the spill through the OER program. I will provide another update following final authorization of the RI, including an updated project schedule so that you and OER are aware of the proposed schedule of field activities and can check in. 04/05/18 - Lakhani Spoke to Woodard & Curran Trumpatori who reaffirmed the client's willingness

to remediate the site and building the clinic. The organization building the clinic is a non-profit and have been spending time and resources gathering grants and funds to finance the project. Woodard & Curran have submitted an updated proposal to the client which still includes three (3) soil borings, six (6) soil and groundwater borings, and eight (8) soil vapor samples. 07/18/18 - Lakhani Woodard & Curran is preparing to begin RI activities at the site. They are planning to execute the project in two phases, starting with the utility clearance/ground penetrating radar study and the collection of soil samples from the location identified in the OER approved RIWP. Following the completion of the soil investigation, they plan to tabulate/review the soil investigation results, determine well construction details for the proposed groundwater wells. 08/06/19 - Lakhani - Spill being transferred to Sekhon. DEC Requires: 1) Submission of soil, groundwater, and soil vapor results 2) Submission of development plans 3) Review of vapor mitigation plans by DOH as future healthcare clinic"

Remarks: "Phase II testing showing gas impact to soil presumably from a former gas station from 30 years ago. Further investigation being purposed after speaking with DEC case manager."

DEC Memo: "12/1/09 - Raphael Ketani. Selvin Southwell, Environmental Engineer III in the Div. of Water Region 2, received the following e-mail:
From:NYC OEM [mailto:wc-b@OEM.NYC.GOV] Sent: Tuesday, December 01, 2009 10:29 AM Subject: Evacuation due to a Chemical Odor at a DEP Facility - 1801 Richmond Terrance (SI) Tue Dec 01 10:24:22 2009
STATUS: Open - Active PROGNOSIS: Response HazMat-Chemical Staten Island 1801 Richmond Terrance FDNY reports that approximately 150 people at a DEP sewage treatment facility at 1801 Richmond Terrance has been evacuated due to a chemical odor. FDNY EMS reports that 4 total patients, 2 refused medical attention and 2 were transported to a local area hospital. FDNY Hazmat units are on scene conducting an investigation. OEM is en route. Mr. Southwell then sent the following update e-mail to Suzanne Matei, Regional Director, Randall Austin, Chief of the Spills Unit, and myself: Just got off the phone with Vincent Sapienza. NYFD conducted an investigation at the PR WPCP and declared the facility safe. Workers have returned to the plant. Plant personnel believe that the petroleum type odors that were detected was due to dumping into the sewer system. (These odors were detected in the screening chamber only). Two workers who complained of lightheadedness were taken to the Hospital. I (Raphael Ketani) called up Vincent Sapienza, Dep. Commissioner of the Bureau of Waste Water Treatment (718) 595-4906 and received the following information: The incident started when somebody dumped product in the drainage area of the thickening plant. The odor was that of some petroleum material. Two people felt light headed. As a precaution, everyone was evacuated and the two people were sent to the hospital. Even though the odor smelled like oil, it came and went quickly. The NYFD came and checked out the situation. They determined that there was no threat to the workers and that it was safe for everyone to return to the building. So everyone is back at work. Mr. Sapienza said that this happens at the plant every couple of years. Someone sees a sheen and there is an oil odor. I (Raphael Ketani) will contact OEM regarding the disposition of the two workers who went to the hospital. A little while later, I contacted OEM (watch commander Mike Agnew; (212) 374-5500) regarding the disposition of the two workers who were sent to the hospital. He said that they were sent as a precaution, but he didn't have much information regarding their status or the nature of their injuries, except that they felt light headed. He did say that they were both green tagged. He explained that this is a minor

injury/medical status. 12/2/09 - Raphael Ketani. I called up Mr. Sapienza in order to get an update regarding the status of the two workers who had been sent to the hospital and regarding the present operations at the plant. However, Mr. Sapienza wasn't in. So, I was connected to Jerry Fragias, Division Chief for South Operations (supervisor of all of the south plants) (718) 595-4968. Mr. Fragias stated that the two workers who were sent to the hospital were back at work at 1PM. One of the workers was a 61 year old employee who had felt light headed and had complained of chest and head pains. The odor was first noticed at 7AM. Mr. Fragias said that the visited the plant at 10AM and noticed what seemed to be a turpentine smell. The vapors were not high enough to trigger any of the plant's alarm systems. What happened to cause the incident was that the vapors made their way to the aeration tanks, where the two men were working, and the VOCs were stripped off. Hazmat and other emergency response teams were there to investigate the situation and all of them gave the thumbs up. As the plant was operating normally shortly after the incident, as the two affected workers went back to work the same day, and as Hazmat and other response teams indicated that there was no threat to the workers at the plant, I am closing the spill case. "

Remarks: "Petroleum like odor in the thickener building."

DEC Memo: "08/18/09 - See eDocs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead DEC Field was RODRIGUEZ E2MIS NOTES: Supervisor D. Scotto reports 1 quart hydraulic fluid leaked from Con Ed backhoe # 91201 on soil no waterways or sewers affected. no fire or smoke. cleanup in progress using pads 1 ft by 1 ft area. No private property affected. Supervisor D. Scotto reports 1 quart hydraulic fluid leaked from Con Ed backhoe # 91201 on soil no waterways or sewers affected. no fire or smoke. CDUG R. VanPelt #29201 cleanup in progress using pads 1 ft by 1 ft area. No private property affected. CIG notified at 1827 Natale MC #04687 02/02/02 ... 2030 hrs. (UPDATE).... Supervisor D.Scotto notified the Control Center that at 1930 hrs. he and employee R. Vanpelt had completed cleanup operations. Mr. Scotto was able to temporarily stop the leaking hydraulic hose on backhoe 91201 using a section of new hose and hose clamps. An area of hydraulic fluid impacted soil beneath the backhoe on the Arlington S/S property right-of-way approx. 1.5' x 1.5' x 2" deep was dug up and removed. The backhoe was wiped down and cleaned with Citrus cleaner. One bag of debris was generated and brought to VBSC by Mr. Scotto to be disposed of as non-hazardous waste. The backhoe was towed inside the grounds of the Arlington S/S and placed on the asphalt parking pad. Absorbent pads and pigs were placed beneath the backhoe in case a leak occurs. Transportation Dept. was notified and will respond to make repairs tomorrow, Sun. 02/03/02 UPDATE 2/22/02 0850 Hrs. As per Transportation vehicle was repaired on 2/2/02 and will be retired...G. Triolo, #01868."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 3/15/98 e-mail from Con ERT Carbone: While digging a hole to place a pole, an unknown sheen resulted estimated at 1 ounce. When enough leached into the hole, a sample was taken for oil ID and PCB count. I saw some results on our lab database for two holes along the fence: one was Id's as possible dielectric fluid and the other as hydraulic fluid. It seems the PCB results have not been posted yet. Since it seems to be a remediation situation, cleanup is pending further analysis. 4/12/98 e-mail from ERT Carbone: The PCB count was less than 1 ppm. The source of oil was never identified and no theories offered at this time. The oil/water mix in the excavation was removed. No soil remediation performed. Given the quantity involved (a few ounces), it seems to have leached from the oil due to an old spill."

Remarks: "1OZ OF UNKNOWN PETROLEUM MIXED WITH WATER"

contained in two foot concrete moat that surrounded the unit and that Field ERT (Dan) was on-scene. Vought held three way phone call with Duke and Dan and Dan noted that no soil affected and that Clean Harbors vactor truck was on-site however work had not begun as the crews were waiting on work order to ensure that unit was de-energized. Work order was expected to be received in one hour. Dan noted that DEC Hazmat (Gerges) was on-scene and had left after no further concerns. Vought informed Duke and Dan of possible site visit after consultation with RSE. Vought spoke to RSE who noted that DEC Ahmed to perform site visit on 6/3 as he will be in relatively close proximity to site for separate field visit for another spill. Vought called Ahmed and Duke and informed them of same. 6/3/11-Vought-Spill assigned to DEC Feroze as part of Con Ed Portfolio review and possible closure. Initial EMIS #226022 entered into Cross Reference Field and report downloaded into e-docs and deleted from proxy. Vought emailed this summary to DEC Ahmed and noted Ahmed to arrange specific site visit time with Duke and Vought also called Duke and informed him of pending call from Ahmed to schedule site visit. 8/9/11 - Austin - Initial amount of oil reported was incorrect; Con Ed corrected it to 50 gals. when they cleaned it up - Con Ed contained and cleaned up the spill - See eDocs for additional information - Spill closed - end"

Remarks:

"spill contain to concrete mote/ unknown quantity/10 plus gallons. Investigation underwy/clean up pending feeder shut down. Caller called back to advise that the quantity of the spill is 500 gallons and is transformer oil."

Tank Info:

Tank Number: 001
Tank Id: 227603
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

A00 - Tank Internal Protection - None
G10 - Tank Secondary Containment - Impervious Underlayment
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
E00 - Piping Secondary Containment - None
I00 - Overfill - None
K01 - Spill Prevention - Catch Basin
D00 - Pipe Type - No Piping
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None
J02 - Dispenser - Suction Dispenser

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 02/01/2009
Capacity Gallons: 275
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "12/6/2004 Sangesland spoke to NYC DEP HazMat - A citizen (unnamed) called into HazMat that there are two buried tanks (2 x 550 gal) at this site. HazMat asked if the tanks were leaking or having some other type of problem. Caller said no, he just wanted DEP to know that the tanks were there. 2 x 550 gal is below PBS regulatory threshold and there was no leaking, therefore there was no case to investigate. Spill Closed "

Registry ID: 110009483941

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110004510191

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name: CHRIS MILDRUM
DEC Memo: "6/14/17 - Obligado - I called Chris Mildrum of Moran Towing. This was an intervessel transfer of diesel oil to a day tank. During the transfer, 5 gallosn of diesel oil went over side of the vesel. The spill has been boomed and pads put in place. The clean up will be completed today. Moran is doing the clean up in house. NRC Report Number 1181125. Coast guard is responding. No DEC response needed. Spill closed."

Remarks: "clean up pending - booms, pads"

Contact Name: VINCENT BORRELLO
DEC Memo: "12/17/07 - Raphael Ketani. I contacted Vincent Borrello of Moran

Towing (718) 981-5600, ext 1. He said that some of the oil fell onto the deck. The rest entered the water, but he didn't say how much of the 5 gals. entered the water. He said he put down absorbent booms immediately and soaked the oil up with the booms and pads. He bagged the spent booms and pads when they were finished. Mr. Borrello contacted the Coast Guard, New Jersey and everyone on his notification list. Based upon Mr. Borrello's quick response at containing and cleaning up this small spill, I am closing the case. "

Spiller Name: ERNIST
Spiller Company: RAN TOWNING
Spiller Address: 2015 RICHMOND TER.
Spiller Company: 999
Contact Name: ERNIST
DEC Memo: "2/13/17 TJD Spoke with captain - day tank overfilled due to human error. Absorbent booms deployed and deck was wiped down. As per initial conversation, no visible product on surface water. Captain called back after sunrise and advised visible floating product around vessel and Miller Environmental was enroute for cleanup. AH Secondary (Zhune) dispatched for inspection. 2/13/17-Zhune responded this spill. Met the Captain (Ernist Mildrun) and the Coast Guards as per Ernist during internal fuel transfer the day tank vents burped into day tank vent containment boxes. Fuel dripped onto the deck and an amount of fuel went into the water. Absorbent pads and booms were deployed into the water. During my inspection I noticed that the amount of diesel spilled was larger in volume than the amount reported. Probably approximately 50 gallons of diesel. There was oil everywhere in the water I looked. Miller Launch was on the scene cleaning the spill. 3/13/17-Peter Reyes from Moran Towing Corporation sent the following email. On February 12, 2017 while conducting an internal transfer to fill the day tank, the day tank overflowed filling the spill containment boxes and dripped onto the deck and overboard. The crew estimates that approximately five (5) went overboard and into the waterway. The crew immediately deployed absorbent pads, and sausage boom, to mitigate the pollution incident. Miller's Launch was called to assist with the cleanup and to dispose of all spent and contaminated absorbent materials. Cleanup was conducted and the vessel was released by the USCG. During the investigation it was found that the day tank high level alarm was faulty, and failed to alarm at 90% full. The alarm float switch has since been replaced with a switch that can be tested manually prior to a transfer. Attached are copies of the USCG Statement provided by the crew. Spill Closed."

Remarks: "spill to water, clean up is on going."

residential building. The driver went to the hospital. Approximately 10 -20 gallons of diesel fuel went to the soil. No spill inside the buildings. Fire Department is in the process to remove the diesel from the saddle tank. The towing company will remove the drum. OEG Transporing (company owns the truck) 732-948-1688 Breen Brothers (Towing company) 718-979-9084 R. Piper responded to this spill(runner day time) 10/02/18-Hiralkumar Patel. 2:15 PM:- visited site to confirm removal of contaminated soil. no signs of petroleum stained soil noted at the time of inspection. 6/17/19- DEC Piper reviewed case file. Based on work to date and 10/18 inspection, this spill is closed. NFA warranted. "

Remarks:

"tractor Trailer ran off the road and hit 3 houses, tank on truck is being unloaded, clean up pending."

DEC Memo: "7/15/14: Mahat T/C : DEC Mahat contacted DEP ABRAM GORGY # (347)

768-1478 inquiring more about the spill. The source of the spill is unknown at this time. This is ongoing issue and DEP Industrial Waste is doing further investigation on it. There is accumulation of rain water in an dead end street and heavy sheen is observed in puddle. DEP also notified that the water is not going to the storm sewer system. DEP will notify the Department upon new finding associated with the spill. 10/9/14: Mahat No further investigation is required in this case, DEP has not report any progress on the site. Case will be closed based on the passiveness of the case. "

DEC Memo: "12/10/07-Hiralkumar Patel. DEC Vought spoke with Mr. Kiadli. oil spilled on concrete surface. Petro did cleanup. no odor complaint from owner. left message for Mr. Kiadli. received call from Baindu McGill, Mr. Kiadli's wife. as per Ms. McGill, they noticed oil stain near boiler. their oil company, Petro, replaced supply line with one aboveground. old supply line runs underground. as per Ms. McGill, odors inside basement. Fole Kiadli 23 Van Buren Street Staten Island, NY 10301-1340 Ph. (718) 556-1910 spoke with Ms. Lou (800-645-4328) at Petro. as per Lou, they responded a leak complaint, on 12/08/07 and found supply line leaking. Petro installed temporary line. sent letter to Mr. Kiadli requiring investigation along underground leaking supply line. 01/04/07-Called Fole for update due to report of odors in basement and no answer and no voicemail on phone. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 9/30/10 - Raphael Ketani. There is only the original CSL in the E-docs and the case file. There has been no response from Mr. Kiadli. I sent him a more strongly worded standard letter. 10/8/10 - Raphael Ketani. Mr. Kiadli called me today. He said that he had received my 9/30/10 letter, but

S108981034

he didn't understand what it was all about. I told him that we had a record showing that there was an oil spill in his basement and that we didn't have any documentation that the spill was cleaned up. He said that the spill was right at the boiler from the fuel line. I told him that our notes indicate that the underground fuel line had leaked into the soil. He said that it never did. He said that Petro cleaned up a small spill at the boiler where the pipe comes out of the ground. He said that he dug up the old fuel line in order to smooth out the unevenness of the basement floor. When he dug up the old line, he didn't see any oil stained soil. I told him to take pictures of the old spill area and the area where he had dug up the old line. I added that he should send the pictures and a cover letter to DEC explaining what took place and how it was resolved. He said he will. 10/14/10 - Raphael Ketani. Mr. Kiadai (718) 556-1910 called and told me that he had drafted a letter explaining the nature of the old spill and that there was no leak underground. He said that he will send it to me along with a picture. I told him that will be fine. 10/18/10 - Raphael Ketani. Mr. Kiadai sent me a letter describing what took place regarding the spill and cleanup. He included 5 pictures with the letter. They show where the leak occurred, the clean floor and the dug up portion of the floor. It appeared that the repairs and cleanup had been performed adequately. The letter and pictures showed that the spill had been cleaned up and was no longer a threat to the household, the public or the environment. As such, I determined that the spill case could be closed. "

Remarks:

"Caller doesn't know any information on the spill, except it has been contained. Spill occurred in the basement."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This Spill cleanup project has been reassigned from DEC (Sigona) to Rommel on 2/2/2004. 10/25/04 Zambito Real Estate, Anthony Zambito, 900 South Avenue, Suite 9, Staten Island NY 10314 718-568-3619, (f) 718-568-3685 faxed inquiry how to close spill. PBS 2-198919 - one 5000 gallon aboveground #6 fuel oil tank registered - expires 7/10/07. No other tanks on registration. Rommel 11/12/04 Reassigned from Rommel to Foley.(KMF) 11/16/04 Spoke to Mr. Zambito who is representing owner. Requirement letter mailed to Mr. Jack Firestone, 60 Davidson St. SI 10303-2037. Report to be submitted by 2/11/05. 11/17/04 Spoke to A. Zambito. Received copy of documentation which shows that the city had issued a violation on 3/8/95 for using a vacant manufacturing plant as a bus depot. Six buses were being refueled by a tanker truck stored inside of yard. This practice has been discontinued. Surface spill was due to an equipment failure on a commercial vehicle. There is no PBS# for 60 Davidson St. PBS 2-198919 is for 2460 Davidson Ave, Bronx. No other spill numbers associated with site. 11/18/04 Issued NFA."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 2/1/00 -Saccacio- On 1/4/00, I responded to the location and confirmed the presence of a hydrocarbon like odor emanating from the dry-dock With the DEP investigator Ellie Saint-Jean, we entered the nearby property also owned by Cadell where the night supervisor was located. He said that he had no knowledge of night work at the property we were we believed the vapor to be originating and could not speculate what its source might be. He suggested we come back in the morning. Ellie said he would follow up in the morning. I contacted him on 1/22/00 and he said he referred the complaint to the air dept. I called the DEP Air Dept. at 718-595-3848 and left a message for a return call with an update. TRANSFERRED FROM SACCACIO/SIGONA TO TIBBE ON 2/4/03. AS OF 2/4/03, THERE ARE 9 ODOR COMPLAINTS FROM THIS FAMILY. THEY LIVE ACROSS THE STREET FROM THE SHIPYARD."
Remarks: "caller lives across from the above location and has a strong smell of oil or some type of petro chemical smell she states she is feeling ill from the smell she has not seen any spill just has the strong odor she thinks that the address is around 1400 richmond terr "

POLE # 23358 (Continued)

S106698962

Spiller Address: 4 IRVING PLACE
Spiller Company: 001
Contact Name: ERT DESK
DEC Memo: "e2mis no 155220 Carl reports that at the corner of Nicholas St. and Carroll Place Pole # 23358 a B phase pothead is leaking insulating compound. Approximately 2 ozs. of unknown fluid has leaked onto the wire underneath the pothead. The leak is contained. The spill is being treated as 50 -499 PCB . Cleanup is in progress and a sample is being taken. 09/04/04 1730 hrs. Employee K. Carl notified the Control Center that he and employee R. Wallner had completed cleanup operations. No leaking insulating compound reached the ground. At riser pole 23358, Nicholas St. & Carroll Pl., leaking insulating compound that was leaking from B-phase pothead was removed. Spill was treated as 50 to 499ppm pcb. One foot of the riser pipe was cut and removed and the grounding strap at the top of the riser was also removed.. One foot of B-phase riser cable was double washed and double rinsed and a new grounding strap was installed. The leaking deenergized B-phase pothead was bagged to prevent any further insulating compound from leaking down into the riser pipe. One bag of debris was generated and brought to Victory Blvd. Service Center for disposal of as hazardous waste with applicable waste tracking papers. CDOH Dept. to replace defective pothead. The old pothead was removed and a new pothead was installed on 9/6/04 by Construction OH."
Remarks: "two ounces of unknown oil leaked onto wires from b-phase pothead ref 155220"

. Waste name: CORROSIVE WASTE

Violation Status: No violations found

FINDS:

Registry ID: 110004532140

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO/DO 12/05/2002 TIPPLE SPOKE WITH HOMEOWNER AND OIL COMPANY. OIL COMPANY INFORMED THAT THE CLEANUP WAS NOT COMPLETE AND THAT ALL OF THE CONTAMINATED ITEMS WERE TO BE CLEANED OR REMOVED AND THAT MANIFESTS FOR DISPOSAL WERE TO BE SUBMITTED TO DEC. WILL CONTINUE COMMUNICATION WITH THE HOMEOWNER. 11/1/05 - Transferred to Central Office Staff for review. Need to follow up with the homeowner with another phone call. 9/13/07 - Spoke to the homeowner about the spill. She informed me that there was a lawsuit that followed, and then a final cleanup of the spill. 9/13/07 - Spill Closed."

Remarks: "oil co was supposed to deliver to a different house - oil is now in her basement, on her patio, & on her siding - she did call the dep & the oil co - the oil co did put speedy dry down outside her house but they haven't done the rest of the clean up"

Spiller Company: 999
Contact Name: JOHN FOSTER
DEC Memo: "5/9/16: Mahat T/C : On 5/8/16, DEC Mahat contacted the Notifier inquiring about the spill and its nature. He mentioned that there was a serious house keeping issue (leaking oil and stain all over the place) on the site around 2013 when he was working as the facility Manager. He notified the spill to the hotline presuming the facility still has same sort of issues. Based on the UIS, there are no other reported spill on the site. However, the site does have regulated tanks on premise. Mailing Address: ***** Owner Information 135 Lake Avenue Realty LLC 257 Little York Road Warwick, NY 10990 Attn: Andrew B. Leider Phone: 917.992.9171 PBS: 2-611812 [crossed referenced] Based on the phone conversation with the notifier, the spill case is a good candidate for referral to DLE for further investigation. DEC Mahat to discuss the spill case with the RSE for a transfer/closure guidance. As per RSE, Spill will be referred to DLE for a follow up investigation. 5/20/16: Mahat T/C : Mr. Leider called back to notify that the report will be submitted shortly next week. Based on the phone conversation with the Current owner, there is visible spill on the site. Spill was called in by a former worker presuming there is a spill on the site. Based on the phone conversation, the Department does not warrant any further investigation on the site. A Phase I report will be sent shortly. "

Remarks: "Caller is a former manager of what used to be a tow and auto storage facility and is reporting multiple cases of leaking vehicles into the ground. The current business is a trucking outfit that the caller is not associated with but presumes is having the same type of leaking going on. Caller is also in litigation with the current owner."

ACCESS RD TO SUBSTATION (Continued)

S106001205

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES: 2/ 18/ 02 ... NOTE _ THIS IS A 3RD PARTY SPILL..... 1340 hrs. Troubleshooter H. MacIver notified the Control Center that upon arriving at the entrance access road to Arlington S/ S at South Ave. he discovered a spill of unknown oil (approx. 3- 4 gals.) located at the entrance to the asphalt access road that leads to Arlington S/ S. Spill was on NYC roadway and not on any Con Edison property. There is no oil within the Con Ed S/ S property. NYPD (120th Pct) was contacted and a patrol car was requested and promised. NYC Dept. of Sanitation was contacted and a sander was requested. #9 Supervisor was told a Sanitation supervisor would be dispatched to the site. Con Edison Supervisor J. Castaldi was asked to inspect the site and he confirmed Mr. MacIvers findings. 02/19/02....1025 hrs.....UPDATE - Report is being updated to indicate new information that identifies the asphalt roadway leading to the Arlington S/S as Con Edison property. This is still a 3rd Party spill. Unknown spilled oil has a dimension of approx. 25' x 5' and is only on asphalt surface. 02/19/02 SI EH&S Rep Ann Ip reported that Con Edison crews will perform cleanup. 2/21/02 ... C.Stock reports that J.Visconti has cleaned up the spill in the Arlington driveway. The spill was removed using speedi-dri and absorbant pads. The area was single washed using simple green. The wetness is gone but a stain remains on the asphalt. The debris was placed into 3 drums and taken to the VBSC hazardous waste holding area pending lab results. The clean up was completed at noon and the area was left barricaded until the lab results are received. At 1710 hrs An Ip notified the Control Center that the lab results were received (lab seq no. 02-01457-001) and analysis indicated that the oil was a substance similar to a cooking oil/grease."

Remarks:

"3-4 gals of motor oil spilled to driveway on access rd to a con ed substation this is a 3rd party spill"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 10/30/96 (Katz notes): Lisa Primeggia, Con Ed CIG - Installation of new reactor pad. Small test pit dug to find groundwater revealed high PCBs (184 ppm). Second test pit has sheen, PCB <1 ppm. Approx. 2 feet to water. Source may be a 170 gallon spill in January when someone hit a fin on transformer, but different Aroclor. Instructed Con Ed to contact Sam Arakhan, DEC RCRA. 2/24/98: Update from Lise Lukeshides (ConEd ERT) - Water (approx. 600 gallons) was pumped from the excavation into drums and all contaminated soil was removed and placed into drums and disposed of properly. Total oil = approx. 1 quart. Clean up complete 11/15/96 at 1530 hrs. 4/22/98 - Engelhardt approved site assessment for southern portion of property around transformer pad. Left spill status as closed - doesn't meet standards because PCB drinking water standards are below analytical method detection limits. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "5/29/08 The site was inspected yesterday by myself, Moses Ajoku, and Officer Lifieri. There were approximately 150 drums of contaminated soil/waste oil on-site. Spillage from the drums was observed. There were approximately 50 cubic yards of contaminated soil on-site. Jerry Sibbio of True Blue told me the materials were on-site for approximately 90 days. I noted that he should clean-up the site asap. He said he would and that he plans on sampling after the material is removed. NOV issued during inspection for failing to report a discharge and for failing to control and/or remove a petroleum discharge. bf 5/30/08 bf: Sent soil contamination letter to: Jerry Sibbio True Blue Environmental Services Co. 206 Grandview Avenue Staten Island, NY 10303 05/05/09-Vought-See spill #0901388 at same location. That spill closed and referred to this spill which has also been referred to DEC Urda for enforcement. 05/05/09-Hiralkumar Patel. discussed case with DEC Urda, Austin, Brian, Vought and ECO Dave Thomson. DEC Austin asked to visit site with DEC Brian (who visited site in 2008 and can provide info about condition of the site in May 2008) and ECO Thomson (who visited site recently). 05/06/09-Hiralkumar Patel. visited site. site contains two story residential building and U-shaped area around it which is being used by true blue environmental. there is a warehouse kind building behind the residential building. met DEC Brian and ECO Dave. Brian arrived site before me and he saw true blue employees on site but they ran away the moment they saw DEC vehicle. no site access. found multiple drums on property; in same area where Brian observed initially. according to person onsite, true blue employees were onsite yesterday night pumping drums into tanker and were planning to move drums on property across the street. spoke with Robert Salimeni, property owner of 229-231 Grandview Ave, site across the street where true blue stored drums last year. Robert mentioned that he never approved drum storage on his property. informed him about possible soil contamination from leaking drums those were stored earlier. Mr. Salimeni is planning to develop the site. according to building department permit record, Mr. Salimeni applied for permit on 06/17/08 to build three story storage warehouse and office building. Robert Salimeni **owner of 229-231 Grandview Avenue** 136 41st Street **office address** Brooklyn, NY 11232 Ph. (718) 788-8099 email: stonedecor11@aol.com received incident report (# 904560) from national response center. anonymous caller reported drums on site and spill from drums. spoke with Mr. Ferraiola, property owner of the subject site. he mentioned that he knew about the situation on the site and he spoke with true blue environmental so many times to clean the site, but no response. Charles Ferraiola 46 Brighton Ave Staten Island, NY 10301-2814 Ph. (718) 442-1341 (732) 213-0882 (C) Fax (718) 463-6708 email: p1doodles@aol.com 02/08/10-Hiralkumar Patel. 10:57 AM:- received message from Mr. Ferraiola. 1:19 PM:- spoke with Mr. Ferraiola. he mentioned that true blue environmental has left site and then he hired contractor to remove all drums. currently no more

drums on site. Mr. Ferraiola will call back after two weeks to schedule a site visit for inspection. 02/18/10-Hiralkumar Patel. 8:30 AM:- visited site. met Mr. Ferraiola. entire front yard was covered with snow so no inspection could be done. garage was also filled with temp tanks and other material. asked Mr. Ferraiola to call back for re-inspection once front yard is completely cleared and garage is empty. Mr. Ferraiola gave copy of disposal manifests for drums removed from the site. 03/25/10-Hiralkumar Patel. 8:20 AM:- visited site. met Mr. Ferraiola. found new asphalt patch in parking yard on right side of on-site building and new asphalt in entire yard on left side of on-site building. could not inspect condition of original floor on which leaking drums were stored. Mr. Ferraiola mentioned that he paved these parking yards last year. discussed with DEC Austin about pics showing dirt floor and oil on floor and new parking pavement. as there is evidence of oil spill from drums, Austin asked for soil delineation in both yards. Austin also asked to contact DEC Hasan Hussein in Solid and Haz Material for any actions against True Blue Environmental. 2:24 PM:- left message for DEC Hussein (718-482-6462). 03/26/10-Hiralkumar Patel. 11:34 AM:- spoke with DEC Hussein about any action against True Blue environmental under Solid and Haz Material regulation. Hussein mentioned that they have no case against true blue environmental. 03/29/10-Hiralkumar Patel. 1:25 PM:- sent CSL to Mr. Ferraiola requiring soil delineation in parking yards. asked Mr. Ferraiola to submit work plan for required investigation by the end of 04/29/10. letter faxed to Mr. Ferraiola. 03/30/10-Hiralkumar Patel. 9:54 AM:- received message from Mr. Ferraiola. 12:47 PM:- spoke with Mr. Ferraiola. he requested copy of spill notes. 1:23 PM:- sent copy of spill notes, for both spill numbers on property, to Mr. Ferraiola. 05/20/10-Hiralkumar Patel. 11:30 AM:- received work plan for soil investigation from RTP environmental. abstract: - propose to install four soil borings to minimum depth of 5 ft bg - two soil samples collected from each boring: one at 0-0.5 ft and second at highest PID/deepest dry (if no PID noted) - if contamination extends, will advance boring to clean zone or to groundwater - will install temporary well, if contamination extends to water table submitted work plan is not acceptable as John proposed to submit investigation report in 135 days from approval. John Larkins RTP Environmental Associates, Inc. Ph. (732) 968-9600 Fax (732) 968-9603 email: larkins@rtpenv.com 05/21/10-Hiralkumar Patel. 3:57 PM:- left message for Mr. Larkins. asked him to submit revised work plan as the investigation report must be submitted within 60 days of approval. 06/01/10-Hiralkumar Patel. 9:45 AM:- received revised work plan from Mr. Larkins. 06/08/10-Hiralkumar Patel. 4:51 PM:- sent work plan approval letter to Mr. Ferraiola. letter faxed to Mr. Ferraiola and Mr. Larkins. 08/13/10-Hiralkumar Patel. received report. installed four borings and collected two soil samples from each boring. no contamination found in any sample. based on available information, case closed. 10:29 AM:- sent SCL to Mr. Ferraiola. letter emailed to Mr. Ferraiola and Mr. Larkins."

Remarks: "stockpile of contaminated soil and petroleum oil leaking drums found on site during site inspection."

"05/04/09- DEC Sangesland spoke to NYCDEP who was onsite and they contacted DEC Sangesland and stated that they did not have access to site. DEC Sangesland contacted ECOs and had site visit performed. As per NYCDEP onsite personel did not grant them access.
05/05/09-Vought-Off hours responder.Called and spoke to ECO Dave Thomas was onsite at time of call. Drums are behind fenced off area on private property and no personnel onsite. As per Thomas there are approximately twenty 55-gallon drums some of which are leaking. Approximate affected area is 30'x15' and deterioriated state of drums show that leaks have been ongoing and as such no immediate us of Spill Fund contractor necessary. No sewers or drains affected by spill and ECO Thomas indicated that additional open active spill on record being handled by other Region 2 Spills PM (unknown identity). No violations written as no personnel on site and no immediate action

Calandra of Snug Harbor. 2/6/2006: Received reply from Tracey Knuckles, attorney for the City of New York stating that more information would be sent with regard to additional work that may be needed on the tank. 3/06 - File sent to Region 2 for followup. 09/05/06 -Zielinski This spill case reassigned from Central Office to Region 2. 02/06/07 - Zielinski Sent a TTF letter to Snug Harbor Culture Center, This letter included information on department's letter, dated November 30, 2005, sent to Tom Calandra, and also that Tracey Knuckles, attorney for the City of New York, responded on February 6, 2006, stating that information would be send to the department with regard to additional work that might be needed to repair the tank. The department, however, has not received any information in this matter. 4/30/2008 Shaw environmental pulled 3 tanks and found contaminated soil. New spill number opened for this site is #0801228 4/30/08 - Raphael Ketani. As a new spill case exists for this site regarding the same tanks and contaminated soil found at the site of the tanks, I am closing the old spill case and referring it to spill case #0801228. "

DEC Memo: "4/30/2008 CSL letter sent to: Jerry Aliberti (718-391-1073) NYC DDC 30-30 Thomson Ave LIC, NY 11101 Erica Cozza of Shaw Environmental said they pulled out 3 tanks (2-15,000 & 1-3,000 gal) two weeks ago (PBS was informed of the tank pull before the work was done). Soil results came back today which showed some soil contamination above State limits. Site had a historical TTF spill number which has now been put in Ketani's name (spill#0102907) - Steve Sangesland, Duty Desk Officer, Spill Prevention and Response Unit 4/30/08 - Raphael Ketani. I signed the CSL and sent it out myself. The PBS case is #2-605196. It shows tanks #1 and #2, each 15,000 gal., and tank #3, 3000 gal. Each tank had #2 fuel oil. Mr. Sangesland told me that he spoke to Jacob Krimgold, supervisor of the PBS Unit, and Mr. Krimgold told him that an application has been submitted by Snug Harbor to reflect that the 3 tanks have been removed. Nick Lombardo, PBS Clerk, will process the revision when he gets back from vacation. Associated tank test failure/vent failure case #0102907 (spill 6/15/01) is being combined with this more recent case and closed. Mr. Cozza will submit an investigation report or closure to DEC. 7/10/08 - Raphael Ketani. I checked the PBS. All 3 tanks are listed as closed and removed. I received the June 2008 Underground Petroleum Storage Tank Closure Report on 7/3/08. The report had been submitted by Curtis Kraemer of SHAW Environmental (914) 633-9348. I reviewed the UPSTCR and found the soil analytical results to be almost entirely non-detect with some low level hits of benzo series analytes. There was no groundwater at the site. Based upon the analytical results in the report, I am closing the spill case."

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Longterm spill case - Owner wants to spilt the property. If this spilt & sale happen, we will create a 2nd spill number for the remaining property, but all spill notes apply to Both Sides (Edkins Eastside & Edkins Westside) Dividing line is Nicholas Ave Paper Street West side of the street - Any problems actually on Nicholas Ave Paper street are kept on this Edkins Eastside spill case. Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 12/1/2000 Sangesland went to the site and spoke with Mr. Benedetto Dicostanzo (property owner and junk yard manager) The site showed widespread surface oil contamination. Most of the yard was mud and there was no rain water run off control. Mr. Dicostanzo was presented with a Stipulation Agreement with a response date of Jan 5th 2001. Mr. Dicostanzo said he has an environmental consultant he will be working with and he will get back in touch with the DEC concerning both the clean up and if he will sign the STIP. Sangesland suggested that a meeting with Mr. Dicostanzo and his consultant would be appropriate to discuss the clean up of the current conditions at the site and the renovations needed to operate cleanly in the future. Sangesland suggested the installation of floor drains piped into an oil water seperator and then into the DEP storm drain system. Sangesland pointed out that Mr. Dicostanzo would need to work with NYCDEP in order to do this work. 12/18/2000 - ECO Crowley called Sangesland requesting a briefing of what the Spill Unit did on this case. ECO Crowley stated that several tickets were issued to Mr. Dicostanzo with a court date of 1/26/2000. 3/1/01 - After much discussion, Mr. DiCostanzo signed the STIP as President of Edkins Scrap, NOT as an individual. Mr. DiCostanzo is the President of Edkins Scrap and the owner of the property. 3/20/01 - Sangesland visited the site with Ron Pinzon of Marine Resources. No work had been done to even clean up the surface oil problems. Oil in open buckets all around the site. Several large pools of oil/water between

junked cars and car parts. Constant stream of petroleum leaching out of the shoreline into the Kill Van Kull (near the Bayonne Bridge) producing a sheen approx. 3 ft long - Photos were taken of the site. 3/20/01 - Sangesland spoke with Randy Austin, Rich Gardineer and Steve Zahn. There was some question if DEC would sign the STIP (which Mr. DiCostanzo signed on 3/1/01) or if DEC would go directly to a Consent Order. 8/26/01 - No decision was made on a Consent Order, Randy Austin signed the STIP agreement and forwarded a signed copy to Mr. DiCostanzo (Registered Mail Receipt attached to file). 12/21/01 - Mr. DiCostanzo has not forward any of the deliverable items outlined in the Corrective Action Plan. Sangesland filled in a DEC Case Initiation Form to forward to DEC legal 9/13/2004 Sangesland spoke with Todd Gerber of Whitman group. They have been retained to so some work on the site. DEC requested a full delineation. This request was acknowledged by Whitman, but for now work has been started in one of the obvious hot zones on the site. 3/7/2005 Sangesland spoke with Todd Gerber of Whitman group. Whitman submitted a plan to install a pump/treat system in the obvious hot zone where the car crusher was located. There was discussion about Mr. DiCostanzo selling the property to the west of the Paper Street (a/k/a 2319 Richmond Terrace) to pay for the remediation of the remainder of the property. Sangesland pointed out that the DEC considers this all part of the problem property and also in need of delineation. Sangesland requested Todd Gerber to come into the DEC office with any delineation/groundwater information he has on the site to discuss the degree of problems which might exist on this property. 8/30/2006 Sangesland and Patel visited the site again. 70°F and raining. The East side of the lot (Edkin's junkyard) still has major visible problems and generally poor housekeeping practices. Near the car crusher there appears to be a newly installed monitoring well. The West side of the yard has been blocked off and leased to a garbage transfer facility and a tractor trailer driving school. The area is basically flat and did not appear to have any surface contamination problems. Back at the office, Sangesland called Michelle Hirschko and Edward Hass of Whitman companies. They reviewed trenching and temporary monitoring well installations around the property. Apparently some work has been done in the last 2-3 months and additional drilling/testing work is scheduled for Sept 13, 2006. Sangesland asked Whitman to submit and update report outlining the work that's been done in the last year (last submittal from Whitman was May 2005). 5/16/2012 - Sangesland - Over the last several years, no action has been taken on this property. The current owner has been trying to sell the West side to Profetto construction. Profetto and Benny have been in a long term landlord tenant lawsuit over the property and any potential sale. Profetto did hire Whitman Companies (Environmental Consultant) to come up with a plan to deal with the shoreline issues, deal with the petroleum contamination issues and make a plan to deal with ground coverage and % of building/parking lot coverage on the site. The East side of the property did have a potential purchaser several years ago, but that fell through and Benny continues to operate his junk yard on that side. Earlier in 2012 Sangesland inspected the property with George Stadnik (DEC) and the junk yard was considerably cleaner, but Benny was still doing open burning of car parts on the site. 11-15-13 - Obligado - This spill assigned to me as directed by Vought. 5/23/16 - Obligado - I inspected the site with George Stadnik. First we inspected the western half of the site west of Nicholas Ave. No evidence of

petroleum sheen, stains, or spills was observed on the along the shoreline or on the inland portion of the site. We then inspected the lots east of Nicholas Ave. No evidence of sheen, staining, or spills was observed along the shoreline. After inspecting the shoreline we inspected the auto recycling operation on inland portion. There was an area of petroleum stained soil in the center of the property where cars were likely drained of liquids prior to recycling. There were several drums with liquids, including oil, and there was oil stained soils on the floor around the drums. This is an additional area that will require remediation. 3/21/17 - Obligado - Legal proceedings scheduled for July 18 2017. "

Remarks: "ongoing problem. GROUND SOILED WITH OIL."

S102142254

junked vehicles at the site. I checked ACRIS, but there were no listings for 1483 Richmond Terrace, nor 1481 Richmond Terrace. Property Shark lists the main address as 1481 Richmond Terrace with an alternate address as 1483 Richmond Terrace. The block and lot are 184 and 275. Property Shark lists a sale of the property on 11/13/02 by Rudolph Rando to Steven P. Kalil, Caddell Drydock Repair Co. Inc., 1483 Richmond Terrace, S.I., 10310. The site used to be the Standard Boat Co., Inc., 1483 Richmond Terrace, S.I., 10310. The former owner was Tony Rando, a nephew of the previous owners who are now deceased. Mr. Rando had paid the judgement. 4/17/09 - Raphael Ketani. I spoke to Mark Tibbe, a former case manager for the site. He said that he didn't remember anything about the case. 04/20/09-Vought-Vought had file on desk unbeknownst to DEC Ketani. Site visit on 10/24/08 by DEC Patel. DEC Patel found that site is an empty lot covered by grass and no wells were found on-site. Furthermore no well #5 or well #1 was found by NY Telephone Building and no wells were found by Standard Boat building. 4/21/09 - Raphael Ketani. I reviewed the case file, but there were few documents. I found the following: The Interim ISR dated 1/6/93 states that gasoline is still being deliberately dumped on the site. A 9/21/87 memo from Fenley & Nicol showing boring logs for 5 wells and a site map. Standard Boat consists of two separate properties. MW-1 is at the NY Telephone company building, MW-2 is near the pump at the western property on Port Richmond Avenue, MW-3 is west of the pump on Port Richmond Avenue, MW-4 is near the shore and north of the east property, and MW-5 is at the fence separating the phone company property from the Standard Boat east property. The 11/3/87 letter from Pedneault Associates states that the fingerprint was for normal gas. The Attorney General sent a demand letter dated 8/10/93 to the Standard Boat. A 6/1/99 letter from the Attorney General states that two copies of the STIP are enclosed, and asks for one signed copy and a check for \$5,000. Additionally, the letter states that Standard Boat is to contact the DEC and sign a Consent Order. Anthony Rando returned a signed STIP. Anthony Rando sent a letter dated 7/27/99 to the NYS Dept. of Law stating that a \$5,000 check was enclosed and that they are awaiting the verbal submission of the analytical results. The address on the letterhead from Standard Boat is 1483 Richmond Terrace. There is a Satisfaction of Judgement document dated 8/24/99 from Eliot Spitzer of the OAG. 5/26/09 - Raphael Ketani. I contacted Caddell Drydock and Repair Co., Inc. (718) 442-2112 and spoke to Bill Chapman, V.P. I told him that DEC still had an open spill case and was trying to get 1483 Richmond Terrace cleaned up. I told him the spill took place in 1987. He said that was 22 years ago and that there is just a paved lot there right now. I told him that the DEC doesn't have documentation to prove that the site is not contaminated with spilled gasoline. He said that he wasn't aware that there was any problem with the site. Mr. Chapman asked that DEC send Caddell a letter describing what needs to be done at the site. 5/27/09 - Raphael Ketani. I searched the UIS database for open spill cases involving Caddell Drydock, but didn't find anything. There were a few closed spill cases involving oil in the water or on the dock, but nothing else. 6/3/09 - Raphael Ketani. The STIP package was sent to Caddell Drydock with a deadline of 7/3/09 for the return of the signed STIP. 6/8/09 - Raphael Ketani. Steve Kalil of Caddell Drydock (718) 442-2112 tried to contact me regarding the STIP package. 6/11/09 - Raphael Ketani. I spoke to Mr. Kalil. He said that Standard Boat had two properties. He mentioned that Caddell Drydock bought the property at 1483 Richmond Terrace and that the

STANDARD BOAT COMPANY (Continued)

S102142254

block and lot, 184 and 275, refers to this property, not the one at 2031 Richmond Terrace. Mr. Kalil said that the 1483 Richmond Terrace property had Standard Boat's office on it, and there still is an office building there. He added that this property was always paved and never had junked or derelict vehicles. He asked where the wells were located. I stated their locations and mentioned that one well was next to the telephone company property. He said that the telephone company property is west of 1483 Richmond Terrace by about a mile and borders the 2031 Richmond Terrace property. He said that Caddell Drydock doesn't own this property and that he doesn't know who does. I looked again in the case record and could not determine the correct address of the spill. One memo states that someone from the phone company, Cable Queen, saw gas being dumped on the neighboring property. However, throughout the record, 2031 (the Cable Queen address) Richmond Terrace is referred to as the site of the spill. So I will make a site visit. I made an unannounced site visit to both 1483 Richmond Terrace and 2031 Richmond Terrace. Mr. Kalil was correct. The two properties are about 1 mile apart. I took a number of pictures and they are in the E-docs. Caddell Drydock is using 1483 Richmond Terrace. This site is at the intersection of Wayne Street and Richmond Terrace. It is an active site with marine equipment, a crane, cars, and an office. The other former Standard Boat site is near the intersection of Port Richmond Avenue. However, it is NOT 2031 Richmond Terrace. This address belongs to the former telephone company, New York Telephone (now Cable Queen). There is a sign on the Cable Queen building which is perpendicular to Richmond Terrace. This is the same building as the one depicted on the 9/19/87 Fenley & Nicol site plan. The property next to the cable company is vacant, except for some equipment. There are no buildings. There is a locked chain link fence with a mail box on one side. The mail box had the number 2037 written on it. It is not known whether this lot is solely #2037, or whether it also comprises #2035 and #2033. I will look up the lots and see which apply. I checked the property ownership databases Property Shark, NYC Property Tax, and ACRIS. The address 2035 Richmond Terrace belongs with the lot owned by Cable Queen. The block and lot are 185 and 564. The ownership is 2035 Richmond Terrace, Inc., 79-30 71 Avenue, Glendale, NY, 11385. There is a picture in the Property Shark database of the same building as the one I photographed at 2031 Richmond Terrace. The adjacent lot to the west of #2035 consists solely of 2037 Richmond Terrace. Property Shark and NYC Property Tax list Standard Boat in its database. However, the new owner is Peter Franchini, Ferry Street Enterprises (aka Flag Container-(718)720-4650), 11 Ferry Street, S.I., 10302, (718) 720-4650. The block and lot are 185 and 568. Google Earth satellite photos show an empty lot with a lot containing the telephone company building next door to the east. I also checked on the Standard Boat property on Port Richmond Avenue. Property Shark lists the site as 10 Port Richmond Avenue, block and lot 1068 and 9. Though a picture in Property Shark indicates the address as 13-15 Port Richmond Avenue. This building adjoins a building on Ferry Street. The building at 10 Port Richmond Avenue is also depicted in Google Earth. Additionally, Fenley & Nicol's map shows the building. 6/12/09 - Raphael Ketani. I contacted Peter Franchini (718) 720-4650/FAX (718) 720-0137 and explained to him that the case had never been resolved and that the DEC doesn't have documentation proving that the spill was cleaned up. I added that a soil and groundwater investigation will need to be performed. He said that a

STANDARD BOAT COMPANY (Continued)

S102142254

title search was performed before he bought the property from Standard Boat in 2006, and that the unresolved spill was never discovered. I told him that an investigation plan needs to be submitted for 2037 Richmond Terrace. I explained that DEC will look at the investigation plan, approve it or disapprove it, and then let him know whether he can proceed. Mr. Franchini said that he has been working with the DEC for many years with Ken Brezner of Solid Waste and George Stadnick and Steve Zahn of Marine Resources. I told him those people deal with other environmental issues and that here at the Spills Unit, we are concerned with the spilling of gasoline, motor oil, or other oil products. He said that he still knows Tony Rando, who has a marina out at Montauk Point, Long Island. He will call him and find out what happened to the site and whether there is any documentation showing that an investigation took place. Mr. Franchini asked where the spilling took place on the property. I told him that the DEC did not have any maps showing exactly what part of the ground was affected. He said that a house used to exist on the property, but he had it torn down. He asked what types of vehicles had been leaking. I told him that we had no information regarding whether the vehicles were boats, cars, buses, or trucks. Mr. Franchini stated that he needed to see documentation from DEC showing where the contamination is. I told him that we had very few documents for the case, but that I would send him what I can. He said that he will contact the environmental company he uses and get them to look at the matter. I sent him a copy of the original spill report, the boring logs, the well map, and a letter from Pedneault Associates verifying that the contamination is gasoline. I spoke to Mr. Franchini again regarding the tanks that were on the Standard Boat property that was at 10 Port Richmond Avenue. He said that Ferry Street Enterprises owns this property. He added that he has all of the paperwork from the Fire Department showing that the tanks were cleaned out and abandoned in place. He also said that New York Telephone had paid for the investigation on their property, 2031 Richmond Terrace, and on 2037 Richmond Terrace. I told him that we didn't have any documentation indicating who paid for the investigation, but we do have paperwork showing that only Mr. Rando paid the fines. Mr. Franchini said that he knew of a large oil spill that had occurred at 1483 Richmond Terrace. He finished the conversation by stating that he will do more research on the subject. I checked the record regarding the tanks. A plan map drawn by Fenley & Nicol was attached to the boring logs. It shows two tanks at the Port Richmond Avenue property of Standard Boat. I did a UIS and PBS database search using the key phrases Standard Boat, 2031 Richmond Terrace, 1483 Richmond Terrace, and didn't find any other cases. 6/25/09 - Raphael Ketani. Mr. Franchini (718) 720-4650 called me to explain that he spoke to one of the nephews who used to own Standard Boat. He said the nephew told him that no vehicles were ever stored there. He said that trucks were stored on a city owned lot at the end of Port Richmond Avenue. He added that there was one tank at 10 Port Richmond Avenue, but it was closed. I told Mr. Franchini that was fine, but that the main issue was the property at 2037 Richmond Terrace. Mr. Franchini stated that the nephew told him there was only a garage on the site (previously, Mr. Franchini had stated that there had been a building there, but that it was removed). Mr. Franchini asked who had called in the spill. I told him that it was a neighbor. He asked who. I told him that it was just a neighbor who saw vehicles being moved around and gasoline spilling out of the fuel tanks. After

S102142254

this, the conversation turned tense. Mr. Franchini explained that he works with John Cryan and lets DEC dump their garbage at Ferry Street. He explained that he works with everyone and asked why I can't work with him. He also said that he is closing on the property and that the records show the site is clean. I told him to just do some borings at 2037 Richmond Terrace and that the site doesn't have to look like a pin cushion. I told him to spread out the soil borings to cover the lot. Mr. Franchini said that he knows what to do, but that he needs to know where the gasoline or fuel spilled so that he doesn't have to spend a lot of money. He added that he is in the dark here. I told him that the well map I gave him has all of the information that DEC has. I added that we don't know exactly where the spilling took place on the lot, but that there was spilling. Mr. Franchini again asked me where the spilling took place. I again told him that DEC has no information where the fuel was spilled. Mr. Franchini then told me that he will contact his lawyer and that DEC will hear from him. I told Mr. Franchini that will be fine. Then the conversation ended. 7/8/09 - Raphael Ketani. I contacted Mr. Franchini (718) 720-4650 as the signed STIP was due on 7/3/09. I spoke to Phyllis Franchini (his mother). She said that Mr. Franchini had a herniated disk in his neck and so he hasn't been in for awhile. She said that his attorney was going to get in touch with DEC regarding the matter. I asked her for the attorney's name and number. She said that she couldn't give it to me as the attorney hasn't been given the STIP package to look at, and because the attorney has been out for a week. I told her to have either Mr. Franchini or his attorney call me as soon as he can. She said that she will give Mr. Franchini the message. Mr. Franchini called me back. He said that he had spoken to his attorney and this person will get all of the paperwork and documentation together for the site. Mr. Franchini said that DEC will be sent a copy of all of the documents. He added that Mr. Rando told him that he had to pay a fine even though nothing was found on the property. I told Mr. Franchini that the DEC doesn't require people to pay a fine for nothing. I added that something must have been discovered. Mr. Franchini added that he would be willing to do 6 borings if he knew where the contamination was. I told him that 6 borings may be all that is needed at the Richmond Terrace property. Mr. Franchini said that he is going into surgery next week for his neck, but DEC should receive the documents in the mean time. I said that Hopefully, the documents will answer the questions we have. 7/17/09 - Raphael Ketani. Today, I received a letter from John Z. Marangos, the attorney for Mr. Franchini. Mr. Marangos (718) 273-8324 states that the spill happened 22 years ago and asks why DEC didn't go after the previous owner. Mr. Marangos included a FAX of the spill report page, a site plan showing where the borings were installed by Fenley & Nicol, and some boring logs - all documents that I had sent Mr. Franchini. He claimed that the previous owner had already addressed the issue and that the site never had vehicles on it. I prepared a cover letter and a STIP package for Mr. Franchini. The cover letter stated that Anthony Rando, the former owner, had signed a Stipulation Agreement with the Office of the Attorney General in 1999. One part of the agreement was the paying of a fine of \$15,000, and the other part was that he would hire a consulting firm and have a soil investigation performed. I explained that Mr. Rando paid all of the money that was owed and had soil samples taken at his property and the neighboring property at 2031 Richmond Terrace. He was awaiting the analytical results. However, the DEC was never sent the

STANDARD BOAT COMPANY (Continued)

S102142254

analytical results and so we don't know whether there is extensive soil contamination that warrants remediation. This is what we need to find out. Additionally, I explained that Mr. Franchini told DEC on 6/25/09 that he had spoken to one of the nephews regarding the matter. However, he wouldn't tell the case manager where this nephew was working, except to say that he had a marina at Montauk, Long Island. Therefore, we can only hold Mr. Franchini as the responsible party because he is the only owner we can contact. The letter was submitted to Randall Austin, Chief of the Spills Unit for his review. 7/20/09 - Raphael Ketani. I tried looking up Mr. Rando's address in New Jersey and found out that he is the chief executive officer at: 113 Rainbow Trail, Denville, NJ, 07834. The DOS Process is: Corash & Hollender, 941 Forest Avenue, S.I., 10310. Since Mr. Rando has been located, a new STIP was drafted and submitted to Mr. Austin for his approval. 7/21/09 - Raphael Ketani. The STIP package was approved and sent to Mr. Rando with a deadline of August 18, 2009. 7/27/09 - Raphael Ketani. The certified letter with the green return card was sent back to DEC unopened. It was marked attempted-not known. The green return card was missing. 7/28/09 - Raphael Ketani. Since Mr. Rando was not reachable, I prepared a STIP for Mr. Franchini. The green card was returned to DEC with the signature of Curtis Buxbaum, the receptionist for Region 2. 8/7/09 - Raphael Ketani. The STIP was approved by Mr. Austin and sent out today to Mr. Marangos with a green return receipt card. The deadline for submission of the signed STIP is September 4, 2009. 8/12/09 - Raphael Ketani. The green return receipt card came back signed by J. Biegel. Mr. Franchini called this afternoon. He sounded angry and was verbally antagonistic, but he was focused on the \$37,500 per day per violation amount. He explained that he was willing to do an investigation of the property at 2037 Richmond Terrace, but he wanted to know the specific area of contamination. I reminded him that the DEC doesn't have a map showing the specific area, and if we did, then we would point him to it. He alternated during the conversation between stating that he wanted to help and that he was refusing to do anything. It didn't sound like he was going to sign the STIP. So, I did a little more research and found a phone number and post office box for Ruddi Rando, one of the members of the Rando family who had owned the property. Mr. Rando's phone number is (631) 668-9451, and the address is P.O. Box 2429, Montauk, NY, 11954. 8/13/09 - Raphael Ketani. I called up Ruddi Rando this morning. He sounded very surprised to hear from the DEC. He asked what my call was about. I told him that it regarded the property at 2037 Richmond Terrace and an environmental investigation that was supposed to have been performed by the Standard Boat Company as part of an agreement with the Office of the Attorney General. I added that he was once an owner of the property. He said that his brothers, Anthony and Robert had also owned the property with him, but Anthony was dead. Mr. Rando took my name and phone number and said that his lawyer will contact me soon. 8/18/09 - Raphael Ketani. Today I received a letter from Mr. Franchini on FLAG Container letterhead dated 8/13/09. The should no longer be held legally responsible for this matter. I didn't respond to this letter. However, I haven't heard from Mr. Rando's lawyer. Therefore, I sent the STIP package with both Mr. Rando and Mr. Franchini as the responsible parties. 8/21/09 - Raphael Ketani. Today I received the green return card from Mr. Marangos, Mr. Franchini's lawyer. 8/26/09 - Raphael Ketani. I received the green return card from Mr. Rando. 8/31/09 - Raphael Ketani. S102142254

(jfox@odonnellfox.com), attorney for Mr. Rando, called to find out some of the facts about the case and why the DEC had sent the STIP. I explained a little of the case history to him. I told him that both Mr. Rando and Mr. Franchini were responsible for investigating, and, if necessary, cleaning up the site. Mr. Fox seemed to understand the situation. He asked for an extension of the deadline for submission of the STIP. I gave him until September 30, 2009. 9/15/09 - Raphael Ketani. Mr. Fox sent me an e-mail today that Mr. Rando sent a report to Albany DEC that contained the results of a 10 boring investigation project on his former property. I responded back that DEC doesn't have this report and neither does Mr. Franchini, but that I will check with the Attorney General to see whether they have the report. 9/16/09 - Raphael Ketani. I called up the secretary at the Office of the Attorney General to inquire who was the attorney on the case. She said that it was Joan Plunket, but she had left some time ago. She added that the OAG case was closed on 12/6/02. I told the secretary that I needed an investigation report that Mr. Rando had sent to the OAG back in 1998 or 1999. She said that this report would probably be in the archives. She said that Bonnie Riggi, the Assistant OAG, will get back to me. Ms. Riggi sent me an e-mail and wrote that the OAG didn't have any other documentation regarding the case. She added that, other than what she had sent Region 2, there was nothing else in their possession. I sent an e-mail to Mr. Fox that the OAG and Albany DEC didn't have the report Mr. Rando had mentioned, nor any other documentation. Therefore, Mr. Rando and Mr. Franchini had to conduct a new investigation. I reminded him that the deadline for submission of the signed STIP was September 30, 2009, and that, if the Department didn't receive the STIP, then we may issue penalties and take legal action. 9/17/09 - Raphael Ketani. Mr. Fox sent me an e-mail that his client will do another investigation and that this will involve Mr. Franchini. However, he stated that there were many people to involve in this project and so he didn't believe that he could meet the September 30, 2009 deadline for submitting the signed STIP. I sent a response e-mail back asking him how much more time he thought everyone needed. 9/24/09 - Raphael Ketani. I received an e-mail today from Jim DeMartinis of J.R. Holzmacher P.E. LLC (631) 234-2220, ext 102/cell (516) 983-6987. Mr. DeMartinis wrote me that he was being asked by the attorney for the owner of the site what the soil investigation might cost. He also asked what DEC was looking for with respect to number/locations of borings and samples? I wrote back that the DEC thought that 6 borings may be enough for the site investigation. I added that one boring should be at the fence line with the neighboring property to the east and that we would like one boring at the tanks near Mr. Franchini's property. 9/28/09 - Raphael Ketani. I sent Mr. DeMartinis an e-mail today stating that a groundwater monitoring well should be installed at the most contaminated boring. Mr. DeMartinis e-mailed me that he will install a temporary well and take one groundwater sample. I told him that this will be fine to start, but if gasoline analyte exceedences are found, then more work will need to be done. 10/29/09 - Raphael Ketani. I tried to contact Mr. Demartinis via his office phone, cell phone, and by e-mail, but I could only leave messages. Mr. DeMartinis e-mailed me back that he was retained just last week by the former owner, Mr. Rando. Also, he has a tentative starting date for doing the investigation of November 10. It's tentative because he has to get permission from Mr. Franchini to enter the property and do the work. He will keep me posted. 11/19/09 - Raphael Ketani. Today I

STANDARD BOAT COMPANY (Continued)

S102142254

received the 11/16/09 subsurface investigation report. 11/20/09 - Raphael Ketani. I reviewed the SIR. The soil analyticals were almost entirely non-detect, except for one very low toluene hit which was well below TAGM. The one groundwater sample was entirely non-detect for VOCs. I had no comments. 11/23/09 - Raphael Ketani. I tried to contact Mr. Franchini (718) 720-4650 regarding the expired registration for the 275 gal. waste oil tank, and the status of the two tanks that were between the former Standard Boat building and the Sams Car Service building. However, he had left for the day. I spoke to his mother, Phyllis Franchini. She said that she will renew the expired registration for the waste oil tank. She added that the other two tanks (USTs) were cleaned out and abandoned in place years ago shortly after they had bought the place in 2006. She said that she had all of the paperwork. I asked her to send the documentation to me. I told her that soil contamination had been found back in 1987 by the state's contractor. She said that, as far as she knew, there never was a problem with the tanks and that there was only a little water in them when they were cleaned out. She said that she will FAX over the documents. 11/24/09 - Raphael Ketani. I spoke to Mr. Franchini and Phyllis. They both said that they will send over the documents for the tank closures today. I received some documents by FAX regarding the closing of three tanks at Ferry Street Enterprises (aka Flag Container). One tank was a 550 gal. gasoline UST which was situated at the northwest corner of the Ferry Street Enterprises building. The other two were each 2,000 gal. gasoline USTs that were formerly part of the property comprising Sams Car Service (16 Port Richmond Avenue). These tanks were in between Ferry Street and Sams. They were just inside the property from Port Richmond Avenue. The documents showed that each tank was cleaned out and filled with cement slurry on 5/5/07 (550 gal. UST) and 6/11/08 (2,000 gal. USTs). I called up Phyllis (718) 720-4650 and she said that they never knew the 2,000 gal. tanks were there when they bought the former Sams Car Service property several years back. She said that, one day, the Fire Department came over and told them that they had two gasoline tanks with expired registrations. So they uncovered them and opened them up. She said that both tanks had been empty for some time. One had nothing in it and another had a little water and sludge. Phyllis added that the tanks were odor free. She said that they hired Gemstar to clean out the tanks and fill them with cement slurry. Then I talked to Randall Austin, Chief of the Spills Unit, and Jacob Krimgold, Head of the PBS Unit, about the tanks and what DEC should do regarding them. We talked about the status of the tanks, that they had contained gasoline, and the information that was sent by FAX regarding them. Mr. Austin and Mr. Krimgold stated that since Gemstar does indicate that the tanks contained gasoline and since the tanks were closed 6/11/08 (the 3 year Federal statute of limitations hadn't expired), we can refer the matter to the Federal EPA and they will order an investigation of the tanks and the area around them. Mr. Austin told me to close the spill case despite the issue with the tanks. As the soil and groundwater analytical results for the 2037 Richmond Terrace site meet the TAGM standards, and as there appears to be no threat to the environment or the public, I am closing the spill case. The Final ISR has been submitted to Mr. Austin for his signature. 11/25/09 - Raphael Ketani. Mr. Austin signed the Final ISR. I forwarded it to Lou Oliva, Regional Attorney, for his signature. 12/1/09 - Raphael Ketani. The Final ISR was signed by Mr. Oliva on 11/30/09. It was sent today to Dennis Farrar of Albany DER.

DER Facility ID: 183860
DEC Memo: "11/09/16-Hiralkumar Patel. 5:36 PM:- spoke with Chris. he mentioned that #2 oil tank failed in dry portion possibly due to vent line. he will call back tomorrow with schedule for isolation test. Christopher Hall PH. (410) 610-0054 email: chrishall@tanknology.com 11/10/16-Hiralkumar Patel. alternate address: 58-60 Bay St, 55 Central Ave PBS #: 2-322687. as per PBS record, the site has one (1) 7,500 gal #2 oil UST, in-service, installed in Nov. 1970. 3:04 PM:- left message for Chris. 3:10 PM:- left message for Mr. Lefberg. Allied 60 Bay Street LLC. **property owner** 60 Bay Street Staten Island, NY 10301 Attn.: Wayne Lefberg **property manager** Ph. (718) 273-5354 email: waynel@muss.com 3:26 PM:- sent TTF to Mr. Lefberg requiring submission of report by the end of 12/16/16. letter emailed to Mr. Lefberg, Chris and DEC DeMeo. 3:28 PM:- received call from Chris. he has scheduled isolation test on 11/15/16. case assigned to DEC DeMeo. 11/14/16-Hiralkumar Patel. 9:20 AM:- received call from Mr. Lefberg. informed him about requirements. Mr. Lefberg provided his correct email address. 9:23 AM:- resent letter to Mr. Lefberg at correct email address. 12/1/16 TJD Teleconference with Mr. Lefberg - he called to request a time extension to complete repairs and retesting of UST. A helium test has been performed identifying the vent line as the possible cause of initial test failure. Mr. Lefberg states as part of a refinance deal last year some borings were advanced in the area of the UST causing damage to vent pipe. Franklin Companies has been retained to uncover vent pipe, repair and retest. Work to be completed by 12/31/16 followed by submission of required documentation. 12/20/16-Hiralkumar Patel. 9:40 AM:- received call from William Klein from The Franklin Company. he stated that due to

holidays, they are having trouble getting sidewalk closure permit.
Bill requested copy of DEC letter. 9:44 AM:- sent email to Bill
including DEC letter dated 11/10/16. email copied to Mr. Lefberg.
5/25/17 TJD File review. Franklin Company performed the testing and
repairs on tank system. Vent line was determined to be cause of
initial failure. Vent was replaced and system passed retest. No
discharge to the environment. All documentation has been uploaded to
DECDOCS. Spill closed."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"Con Ed e2mis #149135: 07/07/03 @ 2115 hrs O.S. Moloughney reports after putting out flame on Transformer f/o 95 Vreeland St. He noticed that the transformer had started to leak onto asphalt street and concrete sidewalk. Fire and Smoke present again. Area protected with Bumpers and speedy dry and pads. Called in O.H. Supervisor to bring in crews to replace transformer and perform cleanup. 21:40 hrs Moloughney reports fire out and area secure. No sewers or waterways affected. DEMS report shows mfg date of transformer 10/1974. Will treat as 50 - 499 ppm PCB. NOTE: fire on top of transformer caused by insulation from service wire. Service needs to be replaced also. Unable to bag Transformer... too hot Area to be cleaned 2 ft X 6 ft asphalt street 6in X 8 ft of curb 4ft X 8 ft of sidewalk 07/08/03 @ 0430 Rotondo reports Transformer replaced on pole 31140 Area treated as 50 - 499. area double washed with citrus cleaner and double rinsed with water. Area cleaned 8 ft 6 in X 10 ft asphalt street, sidewalk and curb including 1 ft buffer around area affected debris (1 drum) taken to Victory Blvd pending analysis UPDATE 7/9/03 1120 Hrs. This report is being updated to provide the following information: 1) the finder was R. Moloughney, employee #98618, Operating Supervisor,

DEC Memo: "11/22/05 - David Tromp (Albany) spoke to Louis Oliva (Reg. 2) about the last correspondence with the RP's atty. in Sept. 2000. There has been no correspondence since that time, and a regional inspection should be conducted again. This case will be referred back to the regional office. Spill transferred back to Region 2 3/10/08 - Austin - Spill assigned to Ahmed for followup - end 08/11/08-Hiralkumar Patel. visited site as DEC Ahmed requested. met worker at 197 Grandview ave. scrap metal business running on site. no sign of leak found in visible areas. other areas was covered with scrap metal. found multiple drums on next door property (229-231 Grandview ave). Global Scrap Metal **operation at 197 Grandview ave** Stephen Schioppo **business and property owner** 197 Grandview Ave Staten Island, NY 10303 Ph. (718) 370-3001 Fax (718) 983-0032 spoke with Mr. Schioppo. he mentioned that her mother owned property at 229-231 Grandview ave and when her mother passed away, they sold property in 2001. Mr. Schioppo mentioned that they never used that property and 55 gal drums found on site, belong to True Blue environmental, who run business at 206 Grandview ave (open spill #: 0850258, case manager: Brian Falvey). met Bill from True Blue environmental at 206 Grandview ave. Bill mentioned that as they are doing cleanup, they stored empty drums at 229 Grandview ave and will clean it. Bill also mentioned that owner of 229 Grandview ave did some borings recently as part of Phase II. Robert **owner of 229-231 Grandview ave** Ph. (718) 788-8099 spoke with Robert. he is developing property and will build warehouse at the site. he mentioned that ACE environmental did work at the site. based on observations during site visit, case closed."

Remarks: "CALLER SAID THAT THE EMPLOYEES OF THIS BUSINESS DUMP OIL AND OTHER MATERIAL IN REAR YARD"

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE CALLED UP OFFICER KEVIN BIETER, HE SAID THAT THE SPILLS RESPONDER CAN CONTACT HIM WHEN VISITING THE SITE. 3/11/98 mmm:09:00 HRS - MULQUEEN INSPECTED SITE WHICH IS JUST NORTH OF THE NYCDOT REPAIR GARAGE AT 1893 RICHMOND TERRACE ROAD, AND SOUTH OF REINAUR MARINE SERVICES. ACCORDING TO DOT EMPLOYEES, THE LOT WAS USED AS A CONSTRUCTION COMPANY THAT WENT OUT OF BUSINESS. THE PROPERTY OWNER ALSO WENT BANKRUPT. THE PROPERTY HAS TWO DRIVEWAY ACCESS POINTS ALONG RICHMOND TERRACE ROAD. APPROXIMATELY 100-150 FIFTY FIVE GALLON DRUMS ARE ON THE PROPERTY. THERE ARE AT LEAST FOUR STOCKPILES OF DRUMS. MANY OF THE DRUMS ARE SEVERELY CORRODED AND NOT LABELED. ALSO TANK TRUCK TANKS WHICH CONTAIN ROOFING TAR, AND ABOUT TEN 275 GALLON TANKS, SOME OF WHICH ARE FULL, OTHERS ARE EMPTY. ALSO OBSERVED SUSPECTED ASBESTOS CONTAINING MATERIALS SUCH AS PIPE WRAPPINGS, PLASTERBOARD, ROOFING MATERIALS, SHINGLES, AND BLACK BEAUTY BLASTING SANDS WHICH MAY CONTAIN HEAVY METALS. USCG (MATT ENGLERT) CITED SQUATTER, FRANK STUTO, OPERATOR OF TWO TRACTOR TRAILER RIGS FOR DISCHARGING WASTE OIL. FRANK HAD HIS WASTE OIL, AND FIVE OTHER DRUMS OF WASTE OIL THAT WEREN'T HIS PUMPED OUT BY LORICO WASTE OIL SERVICES. 06/07/05: SFG Associates submitted sampling plan to determine if contamination exists from former storage and discharge

of hazardous substances. Plan has been approved.MCT. 15:00 HRS:SPOKE TO ENZO AT DEP AND MADE NOTIFICATION OF SITE. On 6/10/99, Spills Staff (Tibbe and Rommel) met ECO Kevin Beiter at 1893-1939 Richmond Terrace, in Staten Island to respond to a report of a leaking drum. Prior to their arrival on site, Spills Staff contacted USCG (PO Ward) who indicated that the CG inspected the site earlier that morning and they did not encounter any leaking drum. PO Ward also indicated that the CG would not respond unless DEC noted a significant new development. While on site, ECO Beiter indicated that the CG had sampled and removed all the product-filled drums some months back. Since the CG's cleanup, at least one additional (non-leaking) drum has been deposited at the site. During the inspection, two additional 55 gallon drums, filled with an unknown material, were encountered within piles of solid waste. Approximately 50 small containers (1 to 5 gallons) were encountered inside a trailer. The still-legible labels indicated that the containers once contained epoxy, paint thinners and glue. It is unknown if these containers still contain virgin product because it was apparent that at least some of these containers had been open and reclosed. Petroleum-stained soil was noted around a green Castor Oil 55 gallon drum. What appeared to be gasoline contaminated soil was noted next to a chassis of a truck. ECO Beiter indicated that he needs samples collected from the surficial soil and from the small (1 to 5 gallon) containers at the site to build his criminal case. According to PBS registration #2-000736, three 4,000 gallon Diesel underground storage tanks and one 275 gallon aboveground fuel oil storage tank were removed from the site on 9/93. In compliance with 40 CFR 280, an owner or an operator who is closing a motor fuel UST must perform a Site Assessment. DEC has no record that a Site Assessment has been performed. Tibbe will contact the CG and acquire all attainable information regarding the sampling and disposal of the product drums. Tibbe will try to convince the CG to dispose the additional drum(s). "

Classification: Not a generator, verified

Date form received by agency: 04/29/1986
Site name: GIBALTAR TRANSMISSIONS
Classification: Large Quantity Generator

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Generators - Manifest
Date violation determined: 08/10/1989

FINDS:

Registry ID: 110004380697

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 142735
DEC Memo: "12/20/05: This spill transferred from J.Kolleeny to S.Kraszewski.
03/23/06: This spill transferred to K.Tang - SK 08/08/06: KST reviewed the Site-specific Site Assessment Report for March 2006, prepared by Gannett Fleming. KST contacted Chris Sawyer and mentioned that the investigation was lacking in MWs and no GW flow direction was determined. NYCHA never submitted a work plan for this investigation, they are planning to excavate around the tanks and perform additional investigation work. KST suggested that they place several more MWs downgradient of the tank suspected of causing the TTF. He advised them submit a work plan for our review before any work be performed. - SK 08/14/06: Reviewed the Proposal for Supplemental Environmental Site Investigation submitted by Yu & Associates on August 11, 2006. Luis Ponce forwarded the PDF by email to KST and myself. I consulted with KST, the work plan looks fine. 4 additional MWs proposed. Soil and GW samples will be collected and GW flow direction will be determined. Sent email approval. - SK 08/18/06: Received email from Luis Ponce at NYCHA informing me that Yu & Associates will be installing the MWs starting August 22, 2006. - SK 08/22/06: Received email from Yu & Associates. Markout of utilities will begin today and drilling will commence on August 23. - SK 08/30/06: Recevied a message from Andrew Leung from Yu & Associates (201-791-0075 ext.105) about some results from the investigation. All soil borings are clean except for MW-1 @ 5 fbg, possibly due to the vent pipe located next to it. Only slight exceedances were found. Samples taken from above GW @ 14.5 fbg were clean for MW-1. No GW data has been recieved, but is expected by Friday. I said if the GW looks ok then the only thing to do might be to excavate in the vicinity of MW-1. I told him to be sure to include recommendations for remedial actions in the report. - SK 09/28/06: Reviewed the Supplemental Environmental Site Investigation Report submitted by Yu & Associates on September 28, 2006. A total of four MWs were advanced in the vinicity of the two USTs to determine if any petroleum impacts to GW has ocured. MW-3, MW-1 and MW-2 were installed down gradient of the USTs and MW-4 was installed laterally to both tanks. Each of the four borings were screened with a PID and a soil sample was collected from each. GW samples were collected from each MW but only three, MW-1, MW-3 and MW-5 were submitted for laboratory anaylsis. Only MW-1 has marginal soil contamination above TAGM RSCOs extending to 5 fbg. The cause of this impact is likely due to the presence of a vent pipe, which may have overflowed in the past. GW results reveal non-detect for VOC and SVOCs except MW-1, which exhibited 1,2,4-Trimethlybenzene below TOGS GW standards. Yu & Associates recommends no further action for GW, but proposes excavation of the area around MW-1 and the vent pipe followed by end-point samples. - SK 12/28/06 - J.Kann - visited the site on 12/22. Tank removal activities were ongoing. Sheeting was installed around parts of the southern tank. A dewatering system was activated. Groundwater was in the bottom of the excavation. Tanks remval work

DEC Memo: "12/28/06 - J.Kann - visited the site on 12/22. Tank removal activities were ongoing. Sheeting was installed around parts of the southern tank. A dewatering system was activated. Groundwater was in the bottom of the excavation. Tanks removal work was expected to continue through the week and a tank closure report will be submitted. 2/23/07: J.Kann - Tank Closure report reviewed. Contaminated soils removed from the site. NO groundwater monitoring required. NFA issued on 2/23/07."
Remarks: "SUPER (ANDREW BOURSOS 718 442-4200) CALLED ABOUT LEAKING FUEL OIL TANKS, EVIDENCE OF OIL ON GROUND GOING TO SEWER, OIL TANK OVERFLOWED." Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 25411
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
H00 - Tank Leak Detection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
G00 - Tank Secondary Containment - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 01/02/2003

Registry ID: 110014366925

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

02/06/06: This spill transferred from S.Kraszewski to Q.Abidi.
04/04/06: This spill transferred from Q. Abidi to Koon Tang.
09/23/10: J.Kann - spill transferred from K. Tang to J.Kann. 3/10/11:
J.Kann - Investigative work plan submitted on 3/3/11. 3/11/15: J.Kann
- email sent to NYCHA (Yelena Tkach) today : I reviewed the
subsurface work plan for Mariner s Harbor and have the following
comment -given the age of the tanks, 3 wells must be installed at the
site (regardless of whether or not contamination is or is not
observed during field work) and groundwater samples collected and
analyzed. Once work is scheduled, please notify the Department. The
SIR is due September 11, 2015. 5/2/16: J.Kann - received the SIR for
the site. 4 borings and one well were installed and samples collected
and analyzed. All soil and groundwater samples were non detect for
VOCs and SVOCs. Soil samples were collected at the groundwater
interface (7-9ft bgs). In addition the site file was reviewed.
Although NYCHA was instructed to install a minimum of 3 wells, after
review of the SIR and the site file, which indicates that although
the tank #2 failed in 1997, it was repaired and passed in 1998 and
subsequently as recent as 2013 (See PBS 2-473952 for TTT info). Based
on the SIR and site info no further action is necessary at this site.
Spill closed."

DEMEO 6/7/02 TJD At the request of DLE, DEMEO assisted in inspection of this location. The location is a Fuel Oil Company office and storage yard. The storage yard is gravel and dirt and found to have multiple surface contamination locations from past and present leaks from fuel trucks. There are two 275 gallon waste oil tanks in use, neither is registered with NYSDEC. There is an area of yard, adjacent to one of waste oil tanks which has approximately 10 containers (various sizes) which contain waste oil. Several of containers have no covers and are discharging petroleum directly to ground surface. A dumpster on site was found to contain a puddle of petroleum inside and pooling petroleum around dumpster, the condition of the soils are indicative of an ongoing problem. Three monitoring wells were discovered on property, the RP states these wells are from a closed gasoline tank investigation (former 550 UST). The one well outside has a slight gasoline odor. A second suspected UST was also discovered on property, the RP had no available information concerning that tank. A zipper drain in yard appears to contain contaminated soils. 11/1/05 - Transferred to Central Office Staff for review. Assigned to DATROMP Need to refer back to the Region. 3/30/07 - Austin - Trasferred to Ketani for further review - see also # 9102865 - end 5/7/07 - Raphael Ketani. There is an associated case, #9102865, which does not have a paper file. This was the discovery of a fuel tank and contamination on 6/12/91. I am administratively closing the later case and combining it with the earlier open case, #9102865. "they are hiring an environmental co that will handle the clean up"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 550 gasoline tank 4/12/04-Vought-Spill transferred from Miller to Rommel as per Rommel. Transferred to C.O. - not assigned 3/30/07 - Austin - Trasferred to Ketani for further review - see also #0202494 - end 5/7/07 - Raphael Ketani. I closed the later open case administratively, #0202494, and will work on the site from this earlier case. One significant note from #0202494 is the following: Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 6/7/02 TJD At the request of DLE, DEMEO assisted in inspection of this location. The location is a Fuel Oil Company office and storage yard. The storage yard is gravel and dirt and found to have multiple surface contamination locations from past and present leaks from fuel trucks. There are two 275 gallon waste oil tanks in use, neither is registered with NYSDEC. There is an area of yard, adjacent to one of waste oil tanks which has approximately 10 containers (various sizes) which contain waste oil. Several of containers have no covers and are discharging petroleum directly to ground surface. A dumpster on site was found to contain a puddle of petroleum inside and pooling petroleum around dumpster, the condition of the soils are indicative of an ongoing problem. Three monitoring wells were discovered on property, the RP states these wells are from a closed gasoline tank investigation (former 550 UST). The one well outside has a slight gasoline odor. A second suspected UST was also discovered on property, the RP had no available information concerning that tank. A zipper drain in yard appears to contain contaminated soils. This note makes the site appear to be very sloppy and with tank registration violations. The present PBS registration #2-098450 shows 2 tanks closed in 7/1/91 and 5 still in service. These are: 3 275 gal. tanks (waste oil and #2); and 2 550 gal. tanks. (waste oil and 1 empty). The paper file contained very few documents: a letter from TONE Tank & Pump for the closure of a 550 gal. gasoline tank a 2002 spill report a 7/2/02 DEC letter from Mr. Demeo to Mr. Rucci regarding the need to investigate the site and do a cleanup The block and lot are: 00185/0179. I tried to contact Roy Rucci, the owner, regarding the open spill case, but could only leave a message at (718) 442-2080. The site address is: Rucci Oil Company, Inc., 1693 Richmond Terrace, Staten Island, NY, 10310-1100. 5/9/07 - Raphael Ketani. Roy Rucci called me and said that he had manifests, pictures and other documentation from the dig out and cleanup of the site. He said he will send them to me. 5/17/07 - Raphael Ketani. I made an unannounced site visit and met Roy Rucci. He showed me around the

Map ID

Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

RUCCI OIL CO (Continued)

S106004336

site. I took 9 photos. The site was very clean. Most of the truck parking yard was covered in asphalt that looked like it was only several years old. There was a concrete area on the northern edge of the asphalt for parking the trucks. It looked pretty clean with only some small stains. Mr. Rucci said that this site is only for servicing and keeping the oil delivery trucks. He said that they fuel them up at a service station nearby and the oil they deliver is picked up in New Jersey. He showed me the 550 waste oil tank for used motor oil and a 275 waste oil tank. I looked at the double garage. Its floor was very clean and I saw only a couple of fine cracks in the cement. He showed me the single garage. This, too, was very clean with only a few fine cracks. Next, he showed me the cemented fill port and vent pipe for a 550 gal. gas tank that was abandoned in place. This tank is a UST and is just outside the back entrance to the company office. Lastly, he showed me the flush mounts of 3 groundwater monitoring wells. He said these were put in after the gas tank was abandoned. I had one of his workers open up the well that was outside the single garage. There was a petroleum jelly like odor coming from the recessed area of the well. Also, I saw some type of film floating on the surface of the water in the well. I asked Mr. Rucci whether he had any groundwater data. He said he thought the wells had been tested years ago and were found clean. I asked Mr. Rucci for any manifests for the soil that was originally removed below the yard when it was found to be contaminated. He gave me a single manifest. I told him to have each well sampled in the very near future. He said he will do this. With that, I left. 6/22/07 - Raphael Ketani. I tried to reach Roy Rucci (718) 442-2080, but could only leave a message. Mr. Rucci called me back and said that True Blue Environmental Services, Staten Island will do the sampling next week. 9/21/07 - Raphael Ketani. On 8/31/07 I received groundwater analytical results for the 3 wells that were in the vicinity of the single garage. These were method 8270 results for fuel oil/diesel fuel. All 3 samples were completely non-detect. Based upon the 8/14/07 analytical results from Aqua Pro Tech Labs, I am closing the spill case. 2/8/10 - Raphael Ketani. As part of a search for data pertaining to the Roci and Richie Fuel Oil Co. at 1721 and 1725 Richmond Terrace (a site next door to the west), I researched the E-docs for spill case #9102865. I discovered that the data from Aqua Pro Tech Labs had not been E-doc'd years ago. Paper documentation from closed non-PIN cases is usually not kept by DEC. So I requested copies of the documentation from Aqua Pro. However, they said that they could not give me the data unless their client, True Blue Environmental, tells them that they can. I told the lab person that True Blue had gone out of business and that the former officers of the company were not locateable. The lab worker said that she could not help me. Subsequent to this, I tried to contact Roy Rucci (718) 442-2080, but could only leave a message requesting the data. It should also be noted that the PBS case #2-098450 shows that three (3) tanks were closed. A 1080 gal. tank with #2 oil and a 550 gal. tank with gasoline were closed and removed. An empty 550 gal. tank was filled with concrete and closed in place. Now, there are four (4) active tanks. Two 275 gal. tanks in the tank room with #2 oil for heating, a 275 gal. AST with waste oil (see E-docs), and a 550 gal. AST with waste oil (see E-docs). Roy Rucci called me back later. He said that the 550 gal. tank and the 1080 gal. tank were removed before his time. He said that, to the best of his knowledge, these two tanks were buried outside the single garage on the site. He

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN 9/17/99 - Saccacio - On 8/31/99 I spoke w/ Stanley Baldwin of the NYCDEP 718-595-4658 and he told me that the fire had been put out. He said that they were not going to sample the drums until the building is structurely secured. He did say that he only saw the few drums which were along the side of the structure. He said those drums and some of them seemed empty. On 9/17/99 I contacted Stanley to check on the progress of identifying the contents of the drum. He said that his contact at the city buildings dept. (Parish Oza 718-816-2210) told him that that the building dept. had sent notification to HPD to arrange for the demolition of the building. Stanley also told me that the finance records for the property (Block 185 Lot 187) did or does belong to both Rucci Fuel Oil Co. and Roci Fuel Oil Co. The PBS database indicates a company called Riche Fuel Oil (#2-032603) operated the facility. Lastly Stanley said that next to this property is a company called Rucci Fuel Oil and he asked its owner on the night of the incident if he owned the other property as well. He said the owner said that he didn't own the other property and he knew nothing about it since he just inherited this buisness from his father. 06/12/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. Austin - 2/5/10 - This spill may be related to activities associated with a State funded PIN project (#9000690). Reassigned to Ketani for review - End 2/8/10 - Raphael Ketani. I researched files involving both the Roci and Richie Fuel Oil Co., and Rucci Oil in order to obtain information regarding the

building and the fire. I could not find any documentation regarding the matter. However, I did find an old picture from Property Shark (see E-docs) which may depict the subject building. I also found documents in the PIN case file (PIN #90092/Spill #9000690) that refer to 1721-1725 Richmond Terrace and 1693 Richmond Terrace. I E-doc'd a couple of these documents. I also spoke to Roy Rucci (718) 442-2080, the current owner of Rucci Oil. He said that he remembered the fire involving the building at 1725 Richmond Terrace. All he could tell me was that the building burned to the ground and then someone demolished it. I contacted the NYC DEP (718) 595-4646 and asked to speak to someone regarding this old incident. The person I spoke to said that he wasn't sure who to give my call to, but he will pass my request to someone in his office. I heard back from the NYC DEP. They told me to contact Russ Pecunis at (718) 595-6531 of the DEP Division of Legal Affairs. I tried to contact Mr. Pecunis, but could only leave a message. Mr. Pecunis never returned my call. As there is no further information regarding the incident, I am combining this spill case with that of the closed PIN and Spill case #9000690, and I am closing the case."

Remarks: "27 DRUMS IN A BUILDING FIRE. UNKNOWN CONTENTS. DEP ON SCENE. "

ANDREW RUCCI
RUCCI FUEL OIL CO
1693 RICHMOND TERRACE
999
Not reported
"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER Austin - 2/5/10 - This spill may be related to activities associated with a State funded PIN project (#9000690). Reassigned to Ketani for review - End 2/8/10 - Raphael Ketani. I researched files involving both the Roci and Richie Fuel Oil Co., and Rucci Oil in order to obtain information regarding the discovery of oil in the well and the discovery of contaminated soil in association with four (4) gasoline USTs. I could not find any documentation regarding the matter. However, I did find an old picture from Property Shark (see E-docs) which depicts the site. I also found documents in the PIN case file (PIN #90092/Spill #9000690) that refer to 1721-1725 Richmond Terrace and 1693 Richmond Terrace. I E-doc'd a couple of these documents. PIN #90092/Spill #9000690 involved the entire oil storage terminal. The #9000690 case file database notes describe attempts by DEC to get Roci and Richie Fuel Oil Co. to investigate and remediate the site. They hired the consulting company GTI, but the DEC never received a report regarding the results. Andrew Rucci never signed a Consent Order of a Stipulation Agreement for doing the cleanup. So, there was never a cleanup of the site. The DEC then hired its own contractor to do a more complete investigation and remediation. About 2,000 gals. of #2 oil were recovered, but the soil contamination involving the four (4) 550 gal. gasoline USTs was never addressed. Also, the product in the well was never investigated. However, according to the case notes and documentation for spill number #9000690, the groundwater had not been significantly affected by the spills at 1721-1725 Richmond Terrace. This data plus the oil recovery that had taken place plus the fact that 19 years of natural attenuation had passed since the spill was reported on 4/18/90 prompted the DEC to close the case on 8/21/09. It must also be noted that the NYC DEP contractor, Angelush Construction, had installed a stormwater throttling gate just inside and below the site. In order to install the gate, they removed many loads of soil. The safety engineer for Angelush, John Burzo, never mentioned encountering oil contaminated soil. I had spoken to the Senior Stationary Engineer at the nearby DEP sewage treatment plant, Andrew Kittel, and he told me that they installed groundwater monitoring wells for dewatering in the construction area. He told me that they had pumped 3 million gallons of groundwater per day from the site. According to him, oil was never seen. Based upon the database notes and documentation for spill case #9000690, there doesn't appear to be significant contamination on site that would be a threat to the public or the environment. Also, there appears to be no further information regarding the soil contamination and the oil that appeared in the well. Therefore, I am combining spill case #9106047 with spill case #9000690 and I am closing spill case #9106047."

Remarks:

reassigned from DEC Vought to DEC Ketani as per DEC Austin. 7/22/09 - Raphael Ketani. I restarted the PIN case. Property Shark lists the site address as 1721 Richmond Terrace, block and lot 185 and 187. The owner is Roci Inc. with a notice address of 1693 Richmond Terrace (the same as Rucci Oil). There is also an old picture of the facility (see E-docs). The PBS database has a registration of #2-032603. The owner is Richie Fuel Oil Co. at 1725 Richmond Terrace. The 1725 address doesn't appear in the ACRIS database. The tanks were installed from 12/1/48 to 12/1/77. With the exception of the 200,000 gal. tank, they were all USTs. All of the tanks were administratively closed on 8/1/95. The tanks contained #2 oil, except for four (4) 550 gal. tanks which had gasoline. The others were: one (1) 200,000 gal; two (2) 30,000 gal; and five (5) 25,000 gal. According to a 2/24/2000 memo, the site opened in 1950 and closed in 1991. The spill occurred on 4/18/90 and was reported as oil on the shoreline and in a ravine. It was first noticed by the Coast Guard which was cleaning up another spill in the Kill Van Kull. However, they determined that the oil on the shoreline was different than the heavier oil floating in the Kill. An investigation by a state contractor, OH Materials Corporation, concluded that the oil had come from an oil pipeline that serves a small tank farm at 1725 Richmond Terrace which is owned by Rucci Fuel Oil Co. Two thousand gallons of #2 fuel oil were recovered from the ravine and the Kill. Rucci Fuel Oil Co. is at 1693 Richmond Terrace, Staten Island, NY, 10310, (718) 442-2080. There is a FAX dated 5/14/90 from ChemTech for several oil samples. Fingerprint analyses were performed and chromatograms were generated. All of the results are non-detect. From a case summary dated 2/25/91: 3/19-20/90 = Coast Guard found oil in a ravine that is 80' east of a barge dock owned by Rucci Oil 4/4/90 = inspection of the ravine showed that the amount of oil had increased - it was seeping out of the ground 4/10/90 = ECOs Flaitz and Gerrain returned to the ravine and noticed that the oil had increased in size 4/15/90 = George James of Spill Response inspected the shoreline and found extensive contamination and oil seeping into the water from a number of locations - he had test holes dug 1.5' deep along the shore near the pipeline and had oil seeping into all of the test holes 4/18/90 = Rucci Oil terminal manager Andrew Lafata Jr. produced passing test results for October 1989 - there was oil in a 36 well for relieving the pressure on the USTs 5/2/90 = met with Gene Sullivan and Chris Tomasello to conduct a survey - oil seeping into the ravine- Andrew Rucci and Andrew Lafata Jr. both asserted that the pipeline was alright 5/17/90 = OH Materials Corp. contracted by the state to cleanup the ravine and the shoreline; they installed a recovery well next to the pipeline and conducted an onshore investigation 6/13/90 = drilled 11 wells and 25 test pits, TP-25 had oil that closely matched the chemistry of the oil in the ravine 7/11/90 = more oil found throughout site - the state contractor completed their investigation and demobilized 7/26/90 = meeting with Rucci's attorneys - deny responsibility - attorneys requested to see the investigation results - once they agreed with the results they began discussions with DEC regarding entering into a Consent Order, but never entered into an Order 9/7/90 = records search of NYCFD Bulk Oil Unit records showed pipeline failed test 9/22/77, but passed test on 11/15/77 9/14/90 = Decker Oil (delivery company) tested the pipeline and it failed 11/29/90 = informed by Eliza Dolin of Sidley & Austin (attorney for Rucci) that he will remove the pipeline and tanks - she never met to discuss the client signing the Order 2/25/91= as of the date of this

S104495226

case summary, 2000 gals. of oil had been collected A July 8, 1993 letter to Andrew Rucci indicates that Groundwater Technology Inc. never sent DEC an investigation report, even though they completed their work during December 1991. The letter also states that the contamination at 1725 Richmond Terrace was related to the four 550 gal. gasoline USTs and was never cleaned up by GTI. The contamination at 1693 Richmond Terrace that is related to one 550 gal. gasoline UST and the contamination that was found around a closed in place 1080 gal. fuel oil tank was also not cleaned up, according to this letter. However, spill case #9102865 was closed on 8/31/07 after the analytical results for groundwater samples that were taken on 8/14/07 indicated that all of the analytes were non-detect. From a 2/24/2000 memo: The oil terminal site opened in 1950 and closed in 1991. During the spring of 1991, the tanks, pipeline and coal silos were removed. DEC negotiated a Consent Order with Rucci Oil, but they never entered into the Order. The state contractor finished the shoreline cleanup and the subsurface investigation. They found oil floating on the water table. A product recovery well was installed next to the pipeline. Two thousand gallons of oil were recovered. There are also large fold out diagrams for the test pit and well locations, the topographic map, and the oil plume. There are no reports describing the work that was performed by OH Materials Corp. Except for the Interim ISR, there are no E-docs. I spoke to Jeremy Fedore (fee-dor) of the OAG (518) 473-7194. He said that the case was never settled because the statute of limitations had run out. He said that because the statute of limitations had run out, the case was closed on 3/21/2000 and sent back to the Spill Fund. 7/27/09 - Raphael Ketani. I made an unannounced site visit. I first went to Rucci Oil Corp. at 1693 Richmond Terrace. I met Roy Rucci and asked him where the exact location of the Rucci Oil terminal was. He said that it's not the Rucci Oil terminal, but the Roci and Richie Fuel Company. I told him that the plans I have indicate that the large fuel tank is marked Rucci Oil. He said that the DEC always changes the name to Rucci and that this is incorrect. Next, I visited the site itself. It's location is known as 1725 Richmond Terrace. It is bounded on the west by the NYC DEP Sewage Treatment Plant and on the east by a couple of stores with a long driveway. The site itself is very overgrown in the back with trees that are at least 25 feet tall and heavy brush and weeds below (see pictures in E-docs). A construction crew was building a sidewalk for the front of the property. They had scrapped the front of the property bare. I met a former security guard for the construction project. He told me that the owner of the property had just died. Next, I met John Burzo (646) 529-0172, the Angelush (an-ge-loosh) Construction job site safety engineer. He also told me that the owner had just died. I told him that I was looking for some groundwater wells which were supposed to be on the property near the water. He said that the water was 800 feet to the north. He said that there was no easy way to get back there. I walked to the edge of the woods and didn't see a trail. So I didn't attempt the walk in. I told Mr. Burzo that there used to be large fuel oil tanks on the property and that this used to be an oil terminal. Mr. Burzo showed me an old fire control booth with three tall red bottles that were connected to piping. He said that he thought that this apparatus had something to do with supressing tank farm fires. I asked him what his crew was doing at this site. He explained that they had just finished construction of a throttling gate for stormwater flow control. He said that it was down below the grade and that the sidewalk was the last

S104495226

step for completing the project. He told me that the staff at the sewage treatment plant next door may be able to tell me more about this site. I visited the sewage treatment plant and met Andrew Kittel, the NYC DEP Senior Stationary Engineer Electric Deputy Plant Chief (718) 447-1100. The site address is Port Richmond WPCP, 1801 Richmond Terrace, 10310. Mr. Kittel took me for a walk along the eastern property line of the plant which borders the site. The trees and plants were very densely grown all along the property line. Mr. Kittel warned me that there were packs of wild dogs, poison ivy, and ticks throughout the property. We continued walking along the property line. I saw a pole with signaling lights and sound horns on it. Mr. Kittel thought that this was some kind of signaling device for the barge operators who would have been unloading the oil. Next, we passed over a buried 33,000 volt power line, and then an elevated railroad track. Borings had been done between the railroad and the power line, but this was a very narrow strip of land which was about 15 feet wide. Mr. Kittel said that the railroad wasn't operating. Then we walked under the tracks and into the area of some large in-ground holding tanks. I could see a set of steel beams resting on some pilings. These may have supported the old fuel pipeline. He pointed out other pilings that extended out into the Kill Van Kull, and he also pointed to the DEP sewage outfall. Mr. Kittel said that he had walked the beach in the recent past. He didn't comment on anything regarding the beach. I asked him about the throttling gate. He said that wells had been installed down to 90 feet in the area of the construction site. The wells had been pumping 3 million gallons per day, but no oil was ever seen. Lastly, we entered the basement of the digester-thickener complex building. The floor of the building was about 20 feet below grade. Mr. Kittel pointed out a brown seep that was coming up through a crack in the floor. He said that he had the material tested for creosote because there are old pilings in the area, but the results were negative. The brown liquid didn't have an odor that I could notice. After this, we went back to his office and I left the plant. 7/28/09 - Raphael Ketani. I spoke to Jesselyn Krief, Marine Resource Specialist I at the Region 2 office of the Bureau of Natural Resources. She said that the tidal range is 5 to 6 feet in this area. 7/29/09 - Raphael Ketani. I spoke to Mr. Kittel (718) 447-1100 again regarding his walk on the beach. He said that when he walked the beach it was at low tide. He added that the beach is flat next to the sewage plant, but rises about 20 feet and becomes a hill at the former oil terminal property. The hill has what he called layers. He said that he saw a black, tarry looking substance on the side of the hill during low tide. He said that it had a crust on it and when you poked your finger into it you would get wet tar on yourself. I asked him whether the substance was oozing out of the hill. He said that he wasn't sure. He stated that he had found a very large (30 by 20) air photo of the former oil terminal plant next door while it was under construction. He said that he will try to send me a cropped photo of just the oil terminal. Mr. Kittel added that if I wanted to, he could take me for a walk at low tide so that I can see the tar for myself. I told him I may take him up on his offer. After this, the conversation ended. I tried the Property Shark database and put in the address 1721 Richmond Terrace. The information came up on the screen. The block and lot is 185 and 187. The notice address is Roci Inc., 1693 Richmond Terrace. This is the same address as Rucci Oil. There was one picture of the old facility (see E-docs). It shows the coal silos on the right, a building in the

foreground, and an oil tank that can just barely be seen in the background. The facility seems to occupy the area that is now bare of vegetation. I contacted the former case manager Steve Miller (now at the NYCTA) and asked him whether he remembered anything regarding the site. He said that he would call me back if anything comes to mind. 8/11/09 - Raphael Ketani. I had a meeting with Randall Austin, Chief of the Spills Unit, to discuss the status of the case. He asked me to send an FISR to Dennis Farrar and to close the case. 8/21/09 - Raphael Ketani. Mr. Austin and Lou Oliva, Regional Attorney, signed the FISR and it was sent to Dennis Farrar in DER, Albany. I am closing the spill case based upon the documents in the case file, my site inspection of 7/27/09, and my discussion with Mr. Austin and our determination that there are no apparent environmental impacts from the spill which happened 19.5 years ago and which was affected by diurnal tidal action over the course of this period of time. 9/15/09 - Raphael Ketani. Today I received a 9/10/09 letter from Albany DER indicating that they considered the project to be complete and that an ISR is enclosed. "

FINDS:

Registry ID: 110004563767

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Remarks: end loader and caused the transformer to leak into street, sidewalk, and curb. Also onto two cars. Dammed curb so oil did not go into sewer. About 5 gal came out of transformer. Will be replaced. Contractor started up pumps and washed water into sewer. Clean Harbors to clean up spill. DEP checked manufacturers tag on transformer and left scene satisfied. Coast Guard reported that there was no sheen in river. ERT checked catch basin and found no oil present. Clean Harbors to pressure wash area. Completed 400'X7' area and 15'X7' section of sidewalk. Also cleaned two vehicles. Used 4 barrels of speedy-dri and absorbant pigs. 9/6/01 Clarification: Oil spilled from the transformer was originally suspected that it might run into catch basin located downhill since third party contractor used water to wash roadway adjacent to spill area. It was concluded that oil did not reach the catch basin. The damaged transformer was removed and replaced. (KMF 10/10/01)"

"spill active from pole at location -clean up in progress. con ed 132-004 call back 15:16 - contractor working for con ed originally knocked pole down causing spill - con ed had the spill contained contractor pumped out the excavation site flushing spill down storm drain before con eds clean up crew arrived "

caused leak of about 10-20 gallons, a Rucci Oil technician initially responded and shut off valve. I was met on site by 2 Rucci Oil technician and Roy Rucci (718-442-2080, 917-418-6000, rrucci@ruccioil.com). The leak was from a 550 gallon #2 fuel oil AST that had a recent delivery on 10/29/16. The spill was over concrete and about 10 gallons was recovered. Technicians placed pads and speedy dry on impacted surfaces. Impacted debris were also removed from the area. Odors were present in the basement and began to impact the living area upstairs. Cleanup activities and ventilation aided in reducing odors. Rucci Oil will return today to complete clean up which will include power washing of floor and/or epoxy paint, as well as fixing tank issue, I let Roy know once repairs and clean up is done that the home must be free of odors. Gave homeowner business card and requested they alert me if home is not free of odors.
11/4/2016: Rashad Called Roy and left message. Spoke with Roy he said that the filter canister was the issue with the tank and that it was repaired/replaced. Rucci Oil removed the speedy dry and came back to power wash floors. A few days after the cleanup was completed they met with the homeowners and tenants, and no odors were experienced.
11/7/2016: Rashad Spill will be closed as tank has been repaired and cleanup has yielded no odors. "
Remarks: "Tank ion basement leaked onto concrete floor. Rep from Rucci Oil responded and shut tank line off and advised owner they would have to cleanup the spill. Rucci never called spill in that can be found. Caller requesting callback for guidance."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Contact Name:	TITUS
DEC Memo:	"Piper spoke to Titus (shop owner). Storm water caused the waste oil can to fall over. There is now an oil/water mixture in the service bay pits. Piper instructed Titus to contact a waste oil hauler to pump them out. If the regular waste oil hauler won't do it, Titus will call back and we will fax list of contractors. Needs follow up phone call is 1-2 days to confirm the cleanup was done. 01/15/09-Vought-Called and spoke to Titus Constable who confirmed that spill was cleaned along with waste oil and floodwater. Spill closed by Vought."

DEC Memo: "Sangesland spoke to Vinny at Island Tank. He says they pulled a buried 550 gal UST from the front lawn of this house. There were holes in the tank and some oil spilled out in the pit. They are excavating out the contamination and expect to pull 3 to 4 drums of bad soil. Vinny will take endpoint samples and photos and submit a closure package to the DEC Soon . 8/29/07 Called Vinny Lovari of Island Tank (718)967-9424. He excavated approximately 35 drums of contaminated soil. Sampling to be done next week. bf 8/17/12 Spill re-assigned to T. Demeo as per RSE. bf 12/13/12 AFrischeisen intern TTF letter sent. 1/3/13 AFrischeisen intern Upped documents sent by Bertram Ploog. Island Tank Cleaners certifies that oil storage tank was removed and any contaminated soil found around the tank area was removed and disposed of. Documents mistakenly show 15 St Marks rather than 56 St Marks (error by NYC Fire Dept). Ploog said he can get corrected letters if we need. CASE CLOSED. Closure letter upped to eDocs and sent to address. Reviewed by S Sangesland."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 33965
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
G02 - Tank Secondary Containment - Vault (w/access)
I02 - Overfill - High Level Alarm
E00 - Piping Secondary Containment - None
K00 - Spill Prevention - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Location:

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/20/1999
Capacity Gallons: 14000
Tightness Test Method: -
Date Test: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: B004
. Waste name: PCB articles containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs, excluding small capacitors. This includes oil-filled electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:

"4/24/09 TTF letter hand delivered to NYCDEP during PBS inspection. Tnak failed with a wet leak on 4/28/08. bf 6/5/09 PBS conference scheduled for 6/11/09. This was set up a few weeks ago, but is only being entered today. Received call from Tak Tchewan of DEp. Tank was retested about 2 weeks ago to get a second opinion. Tank test result was inconclusive. He wanted to know if he should call in the 2nd test as a spill. I requested a letter or email explaining the situation. He said that he will send me an e-mail. bf 6/8/09 Received e-mail on 6/5/09. Test report, dated 5/5/09, attached to e-mail. report states tank failed not that the test was inconclusive. bf 9/21/09 Received letter on 9/19/09. Dry portion leak. All product removed from the tank and tank was cleaned. Ulsonic testing revealed tank structural integrity is sound... Steel plug inserted into an abandonedfill line. Also new manhole gasket was installed as well as installation of new bolts on the manway. Tank re-tested on 9/1/09 and passed. NFA. bf" "PBS No: 2-456403 "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "+Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL ORIGINAL SPILL REPORT NOTED HORNER EZCHECK GROSS FAILURES. 9/8/94 @1019HRS, MILLER CALLED M. URCIOLI OF STAR AUTO, SPILLER: STAR IS LOCATED AT CORNER OF RICHMOND TERRACE AND CLOVE ROAD; IT IS BEING EXCAVATED AS WE SPEAK; ISLAND IS CONTRACTED TO REPAIR VENTS AND SEAL LEAKS (?); FORMERLY SOLD/DISPENSED DIESEL BUT NOW TESTING GASOLINE TANKS AND UNUSED DIESEL TANKS; NO REPORTED INVENTORY PROBLEMS. I EXPLAINED CLOSURE REQUIREMENTS ALA DEC AND 40 CFR 280 NOTING TEST BORINGS AND SAMPLING; M. U. SAID ISLAND IS CONTRACTED TO DO TEST BORINGS AND SOIL TESTING; THE OWNER IS VINNIE, 718-967-9424; M.U. WILL TELL VINNIE TO CONTACT ME. 9/8/94 @1100HRS, VINNIE CALLED: THEY WILL EXCAVATE VENTS, MAKE REPAIRS, GRAB (CONFIRMATORY) SOIL SAMPLES - PUBLIC TESTING, INC.; REMOVE CONTAMINATED SOIL; RETEST TANKS AND NOTIFY OF SAME 4/12/04-Vought-Spill transferred from Miller to Rommel as per Rommel. 11/1/05 - Transferred to Central Office Staff for review. Need to follow up on the test results of the Tank Testing Failure. 6/27/06 - Called the owner and he said will get back about this. 10/26/06 - Called and left a message with an employee. Previous comments made by DATROMP in C.O. Spill transferred back to R-2 3/7/08 - Austin - Assigned to Ketani for further investigation - end 3/18/08 - Raphael Ketani. There is no paper record available. The site was Certified Gas Station, 1840 Richmond Terrace, Staten Island, 10310. The spill was called in 9/7/94 as a result of tank test failures. As of the latest PBS record (#2-056847), the present owner is Eli Malka, 28 Lott Lane, Staten Island, 10314, (718) 815-2454 (cell (917) 417-7688). The site is Reliance Auto Place. Ten tanks (#1 to #10) were pulled on 4/1/2000. Tanks #11 and #12 are still in existence. They are 275 gal. with lube oil, and 550 gals. with waste oil, respectively. John Leddy of Protest (516) 321-4670 was involved. I called up Mr. Malka and he said he bought the site in 2004. He said the previous owner was Peter Sachs. He said he will look through his business records and try to find a Phase II or similar report with the information that DEC needs. Peter Sachs called me and asked what DEC needed to close the case. I told him that we needed the soil and groundwater analytical results, manifests for all materials removed, pictures, a site map, boring logs, and any other documents that are available. Mr. Sachs said that he bought the property from the

CERTIFIED GAS STATION (Continued)

S101341032

original owner in 1999. He said he thought he had the soil analytical results and he will look for them. Mr. Malka called to say that he thinks he has the missing documents, especially the analytical results. He said he wanted to FAX the documents over. I gave him the Spills FAX number. 3/24/08 - Raphael Ketani. Mr. Sachs called again. He said that he searched through all of his records and he can't find the laboratory test results. He said that his son has represented him in the Office of Standards when he appeared before them. He said he may have the analytical results. However, his son is in Europe right now doing security work and he comes home only for a little while each month. Mr. Sachs said that his son will be home in a couple of weeks and then they will search his son's office for the results. I told him that if the results are not found, or if the methods used or the way the data is represented are not appropriate, then the soil sampling will have to be done again. I told him that the environmental company he hires should send DEC a plan depicting where the new borings will be. I added that they should use an ELAP certified laboratory and the methods of testing should be 8260 and 8270. He said he understood. I called up Mr. Malka and he said that he spoke to Mr. Sachs. He said that Vinny Casini of GASDA (a statewide gas station trade association) was in his office and that he knows more about what needs to be done. He asked that I speak to Mr. Casini. I spoke to Mr. Casini and he said that his boss knows a lot more about what will need to be done. Mr. Casini said that he has a Phase I report in hand from 2003, but he doesn't know if the analytical results are there. He said he will speak to his boss and help Mr. Malka when and if new borings need to be done. 3/25/08 - Raphael Ketani. I received a call from Ralph Bombardiere of GASDA (516) 371-6201, ext 108. He is the executive director of the New York Association of Retail Gas Stations. He has a 2001 Phase I report. However, he can't find a Phase II. He does have an affidavit regarding the tank removal. I told him that a Phase II will have to be done for the site. He said he will work with the owner of the site. 3/27/08 - Raphael Ketani. Mr. Bombardiere called. He said he had a Phase I report from 2003 and it states that there was a tank failure. In addition, he said, the report contains a copy of a DEC spill report for this case stating that there was a tank test failure. He said the report indicates that the impacts were minimal and that DEC felt there was no need to do anything. He said the spill report lists the release as 0.0001 pounds (not gallons). I told Mr. Bombardiere that the case notes indicate that there was contamination and soil removed. I told him this is a much more serious release and that digging wouldn't take place for a minimal spill. He said he wasn't sure why the DEC case notes stated this, but he could only go by the Phase I, and other information, that was available to him. He said he will make a FOIL request for the database notes. Mr. Bombardiere sent me a FAX containing an Application For Access to Records dated 3/27/08. I made a copy of the spill report with the case notes and sent it to him. 4/23/08 - Raphael Ketani. Mr. Bombardiere sent me a letter explaining that the current owner did not own the property back in 1994 and that the problem was just a tank failure and that DEC took no action. He went on to write that the tanks were removed in 2003 and that the Fire Department found no reason to do any remediation. He finished by saying that the release was very small and so the DEC should close the case. I sent a response letter to Mr. Malka stating, again, that excavation took place on 9/8/94 and that Island Tank was supposed to do test borings

CERTIFIED GAS STATION (Continued)

S101341032

and soil sampling. I wrote that DEC does not have any documentation verifying the subsurface conditions and that the Fire Department does not have the responsibility to test the soil to see if any residual contamination exists. That they only check to see that the present tank system is intact and that no contamination can immediately be detected. Lastly, I wrote that DEC needs a copy of the Phase I. 4/30/08 - Raphael Ketani. Mr. Bombardiere left me a message regarding the involvement of Island Tank. I tried to contact him, but could only leave a message that Island Tank was involved more than 7 years ago. So they probably don't have any records of the work that took place. I added that DEC wants the project to move forward. 5/2/08 - Raphael Ketani. Dan Yarom, President of CDSP Corp. (a tank and pump service company;(914) 224-3300) called. He said that he was hired by the owner of the site to do an investigation. He asked what the DEC wanted in the way of an investigation. I told him that he should send a proposal, we will review it, and, if acceptable, we will tell him to go ahead with the work. He said that he will FAX a site plan with the proposed boring locations. Mr. Yarom FAXed me the site plan. I indicated on it where DEC wanted soil borings to be installed and FAXed it back. 5/14/08 - Raphael Ketani. Mr. Yarom contacted me regarding the site. He said that 11 borings were too many for such a small area of 110' by 100'. I told him that DEC didn't have any information about subsurface conditions. He said that he has done investigations with 3 borings for similar sized sites. I told him this site had a tank test failure with known soil contamination. I told him there is no other information regarding this spill. He said he was just trying to help the customer. I told him that we need information about the site regarding soil and groundwater contamination. I told him it's a much more serious situation because the release is gasoline. The state is concerned. He said he understood and will submit a plan by June 16. I told him that would be fine. 6/5/08 - Austin - Received letter dated 5/30/08, from Ralph Bombardiere of the Gasoline and Automotive Service Dealers Assoc. (GASDA), requesting reconsideration of the need for 11 borings. I looked up the spill report, checked the PBS registration for the site, and discussed the matter with Raphael Ketani. I then called Mr. Bombardiere, and explained to him that beyond the fact that a post-tank-closure investigation was due under Federal requirements (40CFR280)when the tanks were closed in 2000 (Mr. Bombardiere indicated that they were in fact removed in 2003), the site's lack of investigative information after the '94 tank test failure led us to request a full investigation of the site. I also explained that the RP can conduct an initial three well investigation, but with the cost of daily drilling mobilization, it might be more economical for them to optimize the number of sampling points while the drill rig is rented for the day, as opposed to curtailing the operation to just three wells. Mr. Bombardiere indicated that he would pass this consideration on to the facility owner. I told him we would pursue further work to be done if it was determined that contamination was present, and we would want a full examination of the site to zero out any plume. I told him it was up to his client how he wanted to stage the drilling, as long as they understood that we would need a full investigation if contamination was discovered. Mr. Bombardiere indicated that he would convey this information to his client. - end 6/5/08 - Raphael Ketani. Mr. Bombardiere called back Mr. Austin and asked how much time he had to submit the work plan. Mr. Austin and I discussed the matter and agreed that they could have until the end of

S101341032

June 2008 to submit the plan. Mr. Austin relayed this information to Mr. Bombardiere. 6/18/08 - Raphael Ketani. Jerry Sippio of ATEC Environmental (718) 447-7878/cell (646) 533-0258 called. He said he was confused after reading the site plan I had FAXed on 5/2/08 to Mr. Yarom. I explained that new soil and groundwater samples will have to be taken and the results will have to be submitted to DEC. I said that the testing methods will have to be 8260 and 8270. He said he was thinking of doing 6 borings. I told him to turn at least 3 of them into wells so that groundwater can be sampled and so that the groundwater flow direction can be determined. He said this sounded alright. He said he will call me back with to discuss the investigation further. 6/20/08 - Raphael Ketani. Mr. Yarom (914) 224-3300 sent me a letter dated 6/20/08. It had a plan attached showing 3 proposed boring locations around the former tank area. I called up Mr. Yarom and told him that there may have been leaks at the remote fills and the pump islands. He said that he will approach the owner and suggest to him to put in one boring at the remote fill location. He will submit a new plan. 6/25/08 - Raphael Ketani. I contacted Mr. Yarom to find out whether the client agreed to have one additional well installed at the fill ports. However, Mr. Yarom told me that he had to be out of town for a while due to deaths in the family. He said that he will get back to me on monday, 6/30/08. 7/3/08 - Raphael Ketani. I received Mr. Yarom's updated boring/well location with cover letter dated 7/2/08. He had moved SB-1 close to the fill ports. I found the plan to be acceptable, and told Mr. Yarom to proceed with the work. He said he will schedule the drilling for next week. 7/19/08 - Raphael Ketani. Today I received a FAXed letter from Mr. Yarom stating that they will commence with the boring program on 7/21/08. 7/28/08 - Raphael Ketani. Mr. Sippio (cell (646) 533-0258/(718) 447-7878) called to ask what happened with the plan for doing the work. I told him that I spoke to Mr. Yarom on 7/3/08 and told him the plan was alright and to proceed with the work. Mr. Yarom said that the work would start on 7/21/08. However, I told Mr. Sippio, I haven't heard anything since. Mr. Sippio said that he will speak to Mr. Yarom and find out what the situation is. He also commented that he thought some records showed that there were 12 tanks, not 10. I told him that our PBS records show 12 and that they are still in service. He said he will investigate this. 8/14/08 - Raphael Ketani. Today I received the 7/21/08 Phase II Environmental Site Assessment Report from CDSP Corp. I began my review. 8/15/08 - Raphael Ketani. There were three soil samples and three groundwater samples. Each location was sampled for soil and groundwater. All of the soil samples were non-detect for VOCs and SVOCs. The groundwater samples from WB-1 and WB-2 were essentially completely non-detect for VOCs and SVOCs with only a few very low VOC hits of about 12 ppb. The groundwater sample from WB-3 (east of the old gas island) had high VOC hits, but only two low SVOC hits. Nineteen VOC hits were detected. The high hits ranged from 31 ppb of p-diethylbenzene to 2900 ppb of t-butyl alcohol. I sent a letter to Mr. Malka with a c-c to Mr. Yarom and Mr. Bombardiere stating that as per the VOC analytical results for WB-3 and Mr. Bombardiere's conversation on 6/5/08 with Mr. Austin, the DEC is requesting that a full soil and groundwater investigation be undertaken for the site. 8/19/08 - Raphael Ketani. I spoke to Mr. Yarom this morning. He said that he received DEC's 8/15/08 letter. I told him that DEC is requesting that more soil borings and wells be installed in order to delineate the extent of the contamination. I told him that borings and wells will

CERTIFIED GAS STATION (Continued)

S101341032

also have to be installed in the sidewalk. He said he will put together an investigation plan and send it to me. 9/15/08 - Raphael Ketani. I spoke to Mr. Yarom today (914) 224-3300. He said that he wasn't sure whether Mr. Malka was going to have him do the additional work or someone else. He will call me back. I spoke to Mr. Yarom. He said that Mr. Malka told him that he wanted a second opinion from another environmental company. However, DEC should get the finalized proposal by the end of the week. 9/22/08 - Raphael Ketani. Today I received a FAXed letter dated 9/19/08 from CDSP. Mr. Yarom stated that based upon the discovery of contamination at SB-2, they will install a well near SB-2, and put in 2 additional borings. They will collect 3 soil samples and 3 groundwater samples. I called up Mr. Yarom and told him that the contamination was found at SB-3, not SB-2. He apologized and I suggested moving the boring near SB-1 to some other location as SB-1 didn't have contamination. He agreed and said that there was a buried oil tank below the west side of the 1 story building. He suggested putting SB-4 there. I told him that sounded fine. Mr. Yarom added that the boring he had planned to put near SB-3 could also be moved. I told him to move it to the upper right corner of the property. He then sent me a revised map. He said that he will mobilize soon to do the work. 10/24/08 - Raphael Ketani. I spoke to Mr. Yarom today. He said that work was going to start soon at the site. 11/12/08 - Raphael Ketani. Mr. Yarom e-mailed me yesterday that the next stage of the work will take place on 11/13/08. 11/21/08 - Raphael Ketani. I spoke to Mr. Yarom (914) 224-3300. He said that the work took place. He said that he is waiting for the analytical results. When he gets them, he will send the results to DEC. 12/5/08 - Raphael Ketani. Mr. Yarom sent me the soil and groundwater analytical results for locations SB-4 to SB-6. I reviewed the results. They were almost entirely non-detect, with a very small number of hits that were well below TAGM for soil and just slightly above TAGM for groundwater. I sent Mr. Yarom an e-mail indicating that no further work was necessary at any of the other locations, except for WB-3. At this site, some type of remedial measure will be required. 12/22/08 - Raphael Ketani. I tried to get ahold of Mr. Yarom, but could only leave a message. 12/30/08 - Raphael Ketani. I made contact with Mr. Yarom. He proposed doing product collection at WB-3 to start. I told him that was fine to begin with, but if there is extensive contaminated soil, then vacuuming product may not be the answer. I added that soil removal may be necessary. He said that he will send me an e-mail requesting approval for starting vacuuming and subsequent groundwater monitoring. I told him that will be fine. 2/11/09 - Raphael Ketani. I spoke to Mr. Yarom (914)224-3300. He said that DEC should get a letter today describing the plan for remediating the soil at WB-3. 2/12/09 - Raphael Ketani. I received an e-mail today from Mr. Yarom. He said that they plan to install a recovery well at WB-3 and try vacuuming groundwater twice a week for one month. Then they will sample the water and see whether the contaminants drop. If they don't decline, then the remediation of the groundwater will be re-evaluated. I wrote back that by vacuuming the groundwater, they may inadvertently draw contaminated groundwater to the well from off-site. I also added that if the contamination doesn't drop, then soil excavation may be the better solution. 2/26/09 - Raphael Ketani. I sent a short letter to Mr. Yarom approving the plan to install a recovery well at WB-3 and try vacuuming the contaminated groundwater. I also included the above warning and comments about possibly having

to do use an alternative means of remediation. 3/5/09 - Raphael Ketani. Eli called today. He said that he is the owner of the service station at 1840 Richmond Terrace. He said that he bought the property not long ago and business is slow and he's trying to decide whether to sell it. He said that the environmental work is costing him lots of money and he doesn't know whether things are going according to plan or whether the consultant is being honest with him. I asked him whether he has been talking to his consultant. He said a little. I told him to communicate better with him and try to learn and understand what is happening with the environmental work. He asked what the next step is. I told him that the consultant and DEC had agreed to the installation of a groundwater recovery well in the vicinity of WB-3. I told him that contaminated groundwater will be recovered and samples taken to see how bad it is. I added that the collections will happen at least twice and samples will be taken each time. If the analytical results show that the contamination is reduced to the level of the TAGM limits, then the job is over. He said that all of this has been very expensive. I told him that it normally is, but that he should communicate with his consultant regarding the project. With that, the conversation ended. 4/21/09 - Raphael Ketani. I contacted Mr. Yarom (914) 224-3300. He said that the owner, Eli Malka (718) 815-2454/cell (917) 417-7688, has not been in contact with him in over a month and will not return his phone calls. He said that nothing has been accomplished since we last talked. I contacted Mr. Malka and told him that Mr. Yarom has been trying to get ahold of him. I told him that DEC has received word that nothing is happening with the remediation and monitoring of the groundwater. He said that he hasn't been in touch with Mr. Yarom due to the Passover Holiday. I told him that the holiday is over and that he has to get moving on the project. He said he will. I told Mr. Malka to let me know sometime during the first week in May what is happening. He said he will. 4/29/09 - Raphael Ketani. Mr. Malka called and left a message. He said that the monitoring well will be installed during the first week in May. 5/13/09 - Raphael Ketani. Mr. Malka called and said that he will install the well tomorrow. 6/17/09 - Raphael Ketani. I spoke to Mr. Yarom (914) 224-3300. He said that the well was installed and samples were sent to the lab. He expects the results report this week or next week. 7/31/09 - Raphael Ketani. I called up Mr. Yarom and asked him where the groundwater analytical results were. He said that he had sent the results some time ago. I told him that DEC never received them (I checked, we never received them). He said that, right now, he is sick in bed, but he will send the results this monday. I told him that will be fine. 8/5/09 - Raphael Ketani. I spoke to Mr. Yarom. He said that today was his first day back at work from being sick. He said that he will e-mail me the results this afternoon. 8/6/09 - Raphael Ketani. Mr. Yarom sent me the groundwater analytical results for MW-SB3 (see E-docs). They were all non-detect. 8/7/09 - Raphael Ketani. I contacted Mr. Yarom and asked him why there were so many VOC hits with the first groundwater sample and none with this one. He said that he purged only 3 gals. of water before taking the first sample, but he purged 6 gals. of water before taking the latest sample. I told him that the DEC was satisfied with the results and was closing its spill case. Based upon the groundwater analytical results in the American Analytical Labs 6/4/09 report, and the other documents in the case file, I am closing the spill case today. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Id: 52457
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I02 - Overfill - High Level Alarm
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
G01 - Tank Secondary Containment - Diking (Aboveground)
J02 - Dispenser - Suction Dispenser
Aboveground - contact with soil.... Tank bottom rests on soil,
allowing no visual inspection.

Tank Location:

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service

DEC Region: 2
DER Facility ID: 332995
DEC Memo: "7/3/07 bf: Called Gateway Arms Realty (the managing co. in the registration records) and left message. (718)273-3800. Called again and confirmed the address for ttf. Mr. Fitzsimmons will call me back. Sent ttf to: Robert Fitzsimmons Gateway Arms Realty Corp. 285 St. Marks Place Staten Island, NY 10310 7/5/07 Received call from Mr. Fitzsimmons. Hired ABC Tank to isolate excavate and repair. Will fax proposal to me today. Received fax stating ABC Tank Repair's proposal to excavate, repair, and pump & clean tank. bf 10/04/07-Hiralkumar Patel. received call from William from Cardinal. they have been hired by property owner to install new tank and to abandon old tank. old tank has failed test. owner told William that tank itself failed in isolation test and also found leak in elbow on fill line. as William doesn't have any documents of isolation test, he will do isolation test to confirm leaks. asked William to contact DEC Brain with results of isolation test. 10/11/07 Received message from Paul of Cardinal Tank. He wanted to set up meeting at the site. I returned his call and left message that a meeting was probably unnecessary, but I requested that he call me back to discuss. bf 2/11/08 Site was inspected on 2/8/08. NOV issued for failure to contain/remove petroleum discharge (no response to ttf letter), expired registration, unregistered tank, tank not permanently closed, and fillport not correctly color coded. Administrative settlement conference scheduled for 2/27/08 at 3:00 PM. bf 2/27/08 Held settlement conference with Bob Fitzsimmons, Paul Fallon (Cardinal tank) and John Byrne. They agreed to a consent order settlement totaling \$2100. Order to be mailed to Mr. Fitzsimmons. DEC must receive letter to close spill within 10 days or else order will be increased by \$5000. bf 3/3/08 Received fax from Paul Fallon of Cardinal Tank.Thread opn fill line rotted causing test failure. No contamination found. Cardinal removed tank and installed 5K AST. NFA. bf"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: N
Region: 2
Acres: 40
HW Code: 243011
Record Add: 11/18/1999
Record Upd: 12/16/2003
Updated By: kstang

Site Description: The subject parcel is approximately 40 acres in area (13 acres leased by A & A Land Development and approximately 27 acres owned by Staten Island Arlington Inc., a wholly owned subsidiary of CSX Transportation Inc.). Filling operations were to be performed using soil, stones, slag, concrete, clean earth, ash, and rock, in order to raise the base grade from approximately 35 to 40 ft. above mean sea level. Operations ceased in September, 1988 following allegations of the disposal of hazardous waste. Criminal investigations by the FBI, USEPA, and NYCDEP have been ongoing since August of 1988. The operators of the landfill were convicted on fraud and racketeering charges in September 1990. A State Superfund Phase II investigation has been completed. Analytical results did not indicate disposal of hazardous wastes. Asbestos and medical wastes were disposed in the fill along with C&D materials and garbage. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op start date: 09/01/1960
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 2/20/02. Visit the site. Found 275 gal AST with #2 heating oil in a shed. Distinctive petrol. oil odor in the vicinity of the tank. No access into the shed. Owners are not available. Left business card and ask to call back. 2/21/2002. Phone/Kevin and Rebeca Ortiz (owners of the property) phone # (718)720-9801. Confirmed that about 100 gal gone from the tank due to the broken feeding line under the tank bottom. A complaint was filed with an insurance co, however, they refused to take an immediate action stating that a policy covers only a third party liability and required a proof that a third party was effected. 2/22/02. Phone/Michelle Green Allen (Quincy Mutual & Fire Insurance phone# (617)770-5100). Explained to her that, in my opinion, it is a high possibility that groundwater and/or adjacent property already affected by this release (adjacent property is about 3 feet away from the AST) and that postponement of an active cleanup activity will make the situation worth and may require more costly remediation when/if contamination reaches GW. Should call me back. 2/25/02. Phone/Kevin Ortiz rendered Insurance Restoration Specialists, Inc (800-634-0261) to perform soil boring and take samples of soil/groundwater. 2/28/02. Phone/Bryan Finsh (IRS, Inc.). Performed soil boring with a hand auger. He located boring at the property line (about 2 feet away from the AST) and installed it with an angle so he can take a sample from the adjacent property. A petroleum odor was noticed at the depth of ~50 and the end sample was taken at 70 depth due to refusal. No groundwater was encountered, but the last sample was in a mud. Analyticals will be available in a 3-4 days. However, he expects them to show high levels of soil contamination. Should fax me over analytical results when they become available. 04/08/2003. J.Krimgold/phone/Jason Frigon (Vertex Eng.). Vertex a consultant for homeowner insurance Quincy Mutual, informed that IRS Inc. hand-excavated and removed 7.7 tons of contaminated soil from area 6x5' to the depth of 6'. Post excavation samples came out generally negative with a small exceedence of SVOCs. IRS, Inc withholding remediation report due to financial dispute with Quincy Mutual. 5/7/03. Krimgold. Remediation Action Report has been received. No GW encountered to the depth of 6'. Analytical data show slight exceedans of TAGM for total xylenes and trimethylbenzene. NFA."

Remarks:

"LEAK FROM AN ABOVE GROUND TANK CONTAINED WITHIN A 2X2 SHED. SPILLED ONTO DIRT. LEAK HAS BEEN STOPPED. PETRO OIL REQUESTED DEC RESPONSE."

Spiller Company: 001
Contact Name: CALLER
DEC Memo: "11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski.
01/04/06: Consultant, P.T.&L. Contracting Corp. supposedly performed a site assessment April 17, 2000 in addition to excavating and removing the 20K UST. No indication of an assessment report on file. Must inquire about the report. - SK 07/10/06: NYCHA update summary states a single 20K UST installed in 1970 that stored #4 and #6 oil was replaced in 2000 by a 10K UST that currently stores #2. Soil contamination was discovered during the tank replacement, no product recovery system or MWs on-site. NYCHA says that the site assessment is available and recommends the DEC review it. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 6/11/09: JKann - Meeting held on 5/28 with ALC Environmental and NYCHA. Investigative Work Plan submitted on June 10, 2009. 01/28/2010: Remediation and other associated clean-up activities linked to this spill number is now under the oversight of Moses Ajoku, all correspondence related this case should be addressed to me. (MA) 7/15/13: J.Kann - spill transferred from Moses Ajoku to J.Kann. 7/23/14: J.Kann - IWP approved today, SIR due 1/25/2015. 12/30/14: J.Kann - part of mulit site stip. SIR now due 3/14/15 1/14/15: J.Kann - spoke with Drew Pardus yesterday. 2 wells were installed and a total of 4 borings advanced. Approved a request to not install the third well due to refusal which occured at the site. No visible petroleum impacts were noted, no elevated PID readings. 3/2/15: J.Kann - SIR received on 2/24/15, prepared by Pardus. 4 borings were advanced and soil samples analyzed, and 2 wells installed and sampled. All results were below CP51 guidance levels and TOGS 1.1.1. No stained soils were observed during the investigation. The tank was removed and replaced in 2000 and petroleum impacted soils were removed then(this spill was called in at that time). Based on this information, the spill was closed. "
Remarks: "caller reporting a spill of material from a failure in a tank and oil line unk amount spilled and cleanup is inthe process no callback is necessary"

Tank Info:

Tank Number: 004
Tank Id: 45470
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
D00 - Pipe Type - No Piping
J02 - Dispenser - Suction Dispenser
G00 - Tank Secondary Containment - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: 12/01/1988
Capacity Gallons: 275
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 08/01/1996

City,State,Zip: STATEN ISLAND, NY 10303
Program Type: VCP
Site Code: 56906
HW Code: V00251
Site Class: N
SWIS: 4301
Region: 2
Town: New York City
Acres: 19.3
Date Record Added: 11/30/2000
Date Record Updated: 10/04/2018
Updated By: JHOCONNE
Site Description: Location: The site, known as The Storage Bin, is located in a mixed industrial, commercial, and residential area along the southern shoreline of the Kill Van Kull in the northwest section of Staten Island. The site is located at 2901-2945 Richmond Terrace, Staten Island, NY, and is identified as Tax Block 1205, Lot 27 and Lot 100, and Block 1206, Lot 1. Block 1205, Lot 100 is part of a New York City mapped street. Richmond Terrace borders the site to the south, and the Kill Van Kull borders the site to the north. Two industrial properties border the site to the east and west. Site Features: The site is 19.30 acres, with 12.05 acres under water. The site was formerly occupied by First Marine Shipyard which operated 13 buildings. These buildings have been demolished. The site is currently used for storage of concrete. Current Zoning: The site is zoned as a T2 transportation facility with no landmark status. Historical Uses: In 1999, the site had 13 buildings occupied by First Marine Ship Yard, a marine terminal. These buildings were used as mechanical shop, paint storage, plating shop, saw mill, warehouse and offices. A concrete mixing and molding facility, dry docks, an electrical transformer and other uses were identified also on site. In early 1990, there were identified at the site 2 active spills and 7 closed ones. In 2000, all the buildings were demolished with the exception of the dry docks. Operable Units: An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. In 2010, at the request of the Volunteer, the site was subdivided into two (2) operable units (OUs). OU-1 covers the upland portion of the site, and OU-2 is for the land under water. Site Geology and Hydrogeology: The site is on interbedded layers of sand and gravel sitting on metamorphic of Ordovician and Precambrian age. On March 2, 2012 the VCP Agreement was terminated for lack of progress.
Env Problem: Nature and Extent of the Contamination: a) contaminants: the result of the investigation of the upland area revealed contaminants of concern as petroleum, semi-volatile organic compounds (SVOCs), PCBs and metals (Lead, Mercury, Barium, Arsenic, Chromium and Cadmium) which resulted from the scraping, blasting and repainting ships and illegal wetland filling activities. The impacted media are soil, groundwater, soil vapor and sediments. b) areal/depth extent: from the limited investigation performed in 1999 and 2007, it was determined that the shallow soil (0 to 7 feet to the groundwater) and groundwater were impacted underneath the site. c) concentrations: the main contaminant in soil was determined to be Lead which was found at concentrations between 800 and 6,000 ppm, compared to 450ppm Part 375 -6.8(b) Commercial Use Soil Cleanup Objectives. It was not determined
