## BUDGETWATCH February 2020 Flash Report

Overall Latest Condition (reporting on operations for January and subsidies through February):

Overall, results early in 2020 have been favorable. In January, higher subway passenger and toll revenue offset lower bus passenger revenue. Preliminary expenses were slightly favorable; but some of that was the result of timing. Overtime costs were favorable largely due to lower coverage requirements for weather-related events. Debt service was slightly unfavorable which was primarily timing-related. Subsidies have been favorable through February on the strength of a \$32 million favorable variance for the real estate transaction taxes and a \$6 million favorable variance for the Payroll Mobility Tax.

For the month, **passenger revenues** were favorable by \$6.8 million, or 1.3%. Weather, which can adversely impact ridership during winter months, saw mild temperatures, while precipitation—and snowfall in particular—was below the normal level for the month. NYCT revenue was favorable due to higher subway ridership. NYCT bus ridership was also higher than budget, but revenue was unfavorable due to lower-than-budgeted average fare. Revenue was better than the budget at the Commuter Railroads due to higher non-commutation ridership. MTA Bus revenue was unfavorable due to lower ridership and average fare. **Toll revenue** was favorable for the month, reflecting higher than anticipated traffic levels principally because of weather conditions.

#### **Total Operating Expenses before Non-Cash Liability Adjustments**

	Month of Jan	uary 2020 (	\$ in millions)	
		Adopted		
	<u>Actual</u>	<u>Budget</u>	<u>Diff</u>	% Diff
NYCT	\$752.2	\$740.3	(\$11.9)	-1.6%

Total	\$1,117.1	\$1,124.9	\$7.8	0.7%

Overall expenses for January were slightly favorable by \$7.8 million, or 0.7%. B&T was favorable primarily due to vacancies, maintenance, and the timing of toll collection processing fees. MTA Bus' favorable variance was mainly due to the timing of other fringe benefits, lower professional services, maintenance material, and fuel usage. LIRR was favorable primarily due to vacancies and lower timing-related savings in costs for rolling-stock materials. MNR was favorable primarily due to the timing of locomotive overhauls, maintenance material requirements and professional services expenses. These outcomes were partially offset by higher non-labor costs at NYCT mainly due to the timing of maintenance, repair and material requirements.

#### **Overtime**

B&T	<u>2.0</u>	<u>2.4</u>	<u>0.4</u>	15.6%
Total	\$67.0	\$77.3	\$10.3	13.3%

Overtime expenses for the month were \$10.3 million, or 13.3%, favorable, primarily due to favorable timing of \$7 million at NYCT which will be reversed. Fewer-than-budgeted weather events also favorably contributed to variances at all Agencies.

#### **Debt Service**

Debt Service for the month of January was \$247.0 million, which was \$5.7 million or approximately 2.4% unfavorable primarily due to timing, offset by lower than budgeted interest rates.
