First Mutual Transportation Assurance Company 2011 Annual Meeting Update

Marsh Captive Solutions, together with MTA Risk and Insurance Management, presents the following update for First Mutual Transportation Assurance Company (“FMTAC”) for the year ended December 31, 2010. The comparative financial statements and supporting schedules as of the same date accompany this report.

REGULATORY COMPLIANCE

CURRENT BUSINESS PLAN – The First Mutual Transportation Assurance Company (“FMTAC”) is a captive insurance company licensed in New York and is approved to insure and reinsure the risks of the Metropolitan Transportation Authority (“MTA”). FMTAC provides the following lines of coverage to the MTA and its agencies:

General Liability	Stations Liability
Auto Liability – Paratransit	Force Liability
All Agency Protective Liability	Property and Terrorism Insurance
Owner Controlled Insurance Programs (“OCIP”)	Excess Loss Program

FINANCIAL ACTIVITY

Summary of Selected Financial Information

(in thousands), except ratios

Period Ended	12/31/10	12/31/09	12/31/08	12/31/07
Balance Sheet:				
Total Cash and Invested Assets	494,849	458,686	409,563	378,814
Total Other Assets	97,810	126,493	122,199	161,468
Total Assets	592,659	585,179	531,762	540,282
Total Insurance Reserves	325,941	306,087	268,401	250,966
Total Liabilities	446,448	458,224	435,419	448,550
Total Equity	146,212	126,954	96,343	91,733
Unrealized Gain / (Loss) on Invt	9,326	(2,199)	(28,542)	1,914
Income Statement:				
Premium Written	91,698	94,026	53,501	186,529
Premium Earned	98,584	75,469	72,948	46,043
Net Investment Income	18,323	11,198	19,143	16,963
Losses and LAE Incurred	(99,813)	(72,851)	(46,919)	(48,549)
Other Underwriting and Operating Exp.	(9,362)	(9,547)	(10,104)	(9,174)
Net Income	7,733	4,268	35,067	5,284
Ratios:				
Loss Ratio	101.2%	96.5%	64.3%	105.4%
Expense Ratio	9.5%	12.7%	13.9%	19.9%
Combined Ratio	110.7%	109.2%	78.2%	125.4%

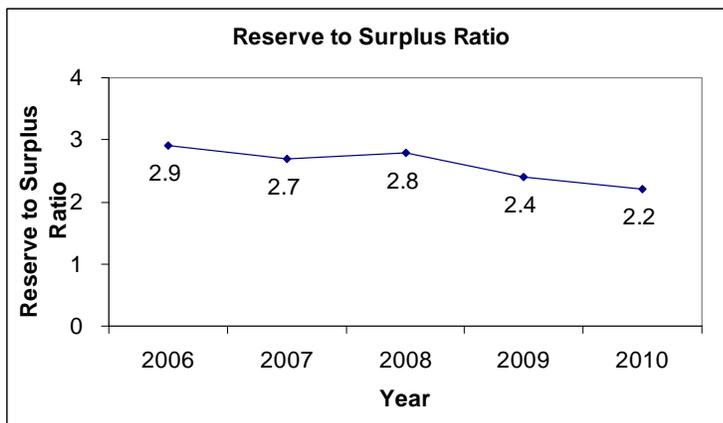

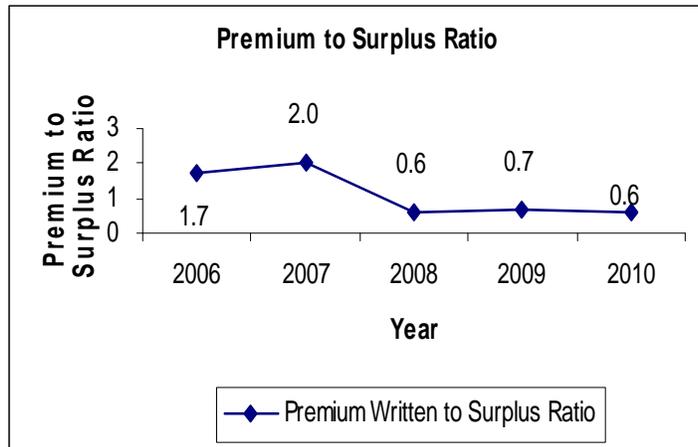

- **Total assets** have increased by \$7.5 million (1%) and **Total liabilities** have decreased by \$11.8 million (3%) during 2010. The 1% increase in total assets is due to a rise in the market value of investments at year end. The 3% decrease in total liabilities is a result of a reduction in the unearned premium liability relating to the Owner Controlled Insurance Programs (“OCIP”).
- **Total equity** was \$146.2 million at year end 2010, which includes a \$9.3 million unrealized gain on investments. Equity increased \$19.2 million (15%) from 2009 due to investment income earned and market value recovery on investments during 2010.
- **Premium written** decreased \$2.3 million (2%) from 2009. The decrease is a result of reduced premiums from policy exposure audits. **Premium earned** was \$98.5 million for 2010 which was \$23.1 million (31%) greater than 2009. The increase is attributable to the recognition of unearned premium on OCIP policies.
- **Net investment income earned** was \$18.3 million for 2010, which was \$7.1 million (64%) greater than 2009.
- **Losses and LAE incurred expenses** increased by \$26.9 million during 2010 which is attributable to higher actuarial loss reserve estimates for the Paratransit and Excess Loss Programs.

KEY RATIOS

➤ **Premium-to-Surplus Ratio** is a measure of an insurer's financial strength and future solvency. It measures the adequacy of an insurer's surplus, relative to its operating exposure. A 5:1 ratio or lower is suggested in the captive industry. A low ratio indicates there is surplus to support future premium written.

Calculation: Premium Written divided by Total Equity. The terms "Equity" and "Surplus" are used interchangeably.

Conclusion: FMTAC is operating well within an acceptable premium-to-surplus ratio.

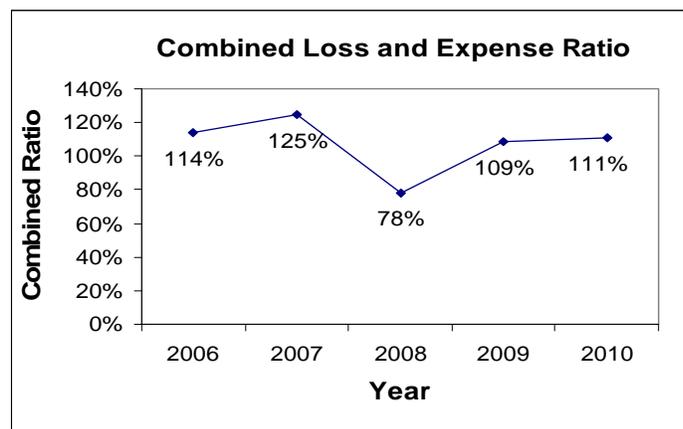

➤ **Reserves-to-Surplus Ratio** measures how much the insurer's surplus and capital may be impaired if loss reserves are undervalued. A 10:1 ratio or lower is suggested in the captive industry. A low ratio indicates there is surplus to support future negative fluctuations in loss reserves.

Calculation: Total Insurance Reserves divided by Total Equity.

Conclusion: FMTAC is operating well within an acceptable reserve to surplus ratio.

➤ **Combined Loss and Expense Ratio** measures the percentage of premium dollars spent on claims and operating expenses. When the combined ratio is under 100%, incurred losses and expenses came in at under or at expected levels. When the ratio is over 100%, incurred losses and expenses were higher than expected.

Calculation: Losses & LAE Incurred plus Other Underwriting & Operating Exp divided by Premium Earned.

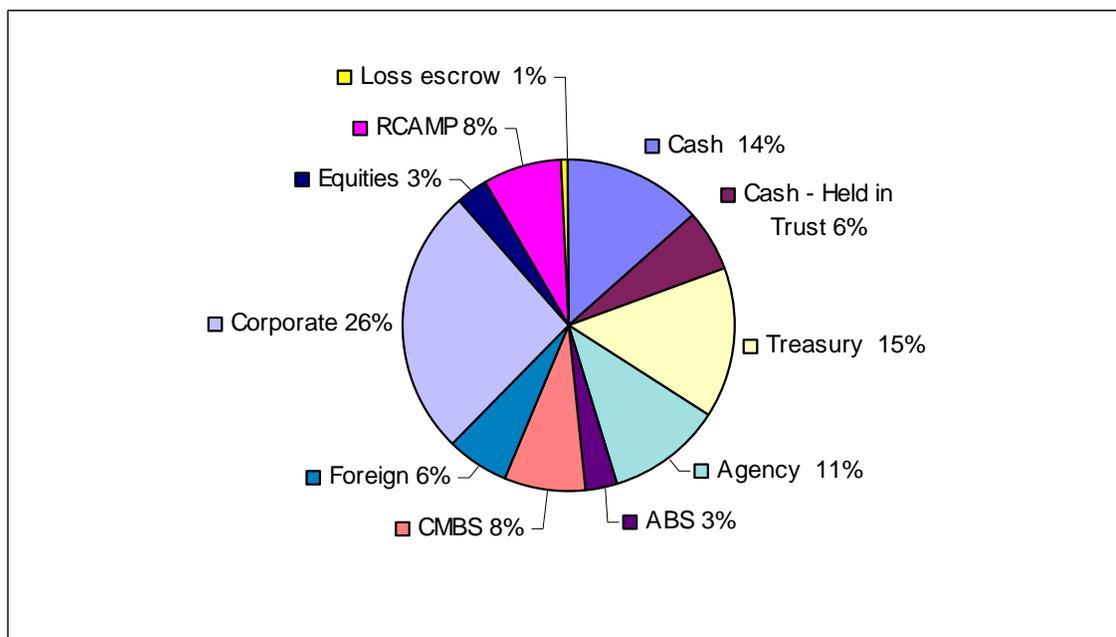

Conclusion: The combined loss and expense ratio went above 100% in 2006 and 2007 due to FMTAC assuming responsibility for the MTA Risk Management budget and the development of higher than expected Paratransit losses. In 2008, the ratio fell below 100% due to a lower actuarial valuation of loss reserves and additional earned premium from the Owner Controlled Insurance Programs. In both 2009 and 2010, the ratio went above 100% due to higher actuarial loss reserves for Paratransit and Excess Loss claims.

INVESTMENTS

At December 31, 2010, FMTAC held \$494.8 million in cash, investments and restricted loss trust or escrow accounts. Dwight Asset Management provides investment advisory services to FMTAC. For a detailed investment report, please see section called "Investment Portfolio Review by Dwight Asset Management".

INDEPENDENT AUDITORS' REPORT

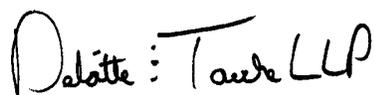

To the Members of the Board of
Metropolitan Transportation Authority:

We have audited the accompanying balance sheets of First Mutual Transportation Assurance Company (the "Company"), a wholly owned public benefit corporation subsidiary of Metropolitan Transportation Authority ("MTA"), as of December 31, 2010 and 2009, and the statements of revenues, expenses and changes in net assets, and cash flows for the years then ended. These financial statements are the responsibility of Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the respective financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of Company, as of December 31, 2010 and 2009, and the respective changes in revenues, expenses and changes in net assets, and cash flows, for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis on pages 2 through 6 is not a required part of the financial statements but is supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the Company's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and we do not express an opinion on it.

April 21, 2011

FIRST MUTUAL TRANSPORTATION ASSURANCE COMPANY

(Subsidiary of the Metropolitan Transportation Authority)

MANAGEMENT'S DISCUSSION AND ANALYSIS YEARS ENDED DECEMBER 31, 2010 AND 2009 (In thousands)

1. OVERVIEW OF THE FINANCIAL STATEMENTS

Introduction — The following is a narrative overview and analysis of the financial activities of the First Mutual Transportation Assurance Company (the “Company” or “FMTAC”) for the years ended December 31, 2010 and 2009. This discussion analysis is intended to serve as an introduction to the Company’s financial statements which have the following components: (1) Management’s Discussion and Analysis (“MD&A”), (2) Financial Statements and (3) Notes to the Financial Statements.

Management’s Discussion and Analysis — This MD&A provides an assessment of how the Company’s position has improved or deteriorated and identifies the factors that, in management’s view, significantly affected the Company’s overall financial position. It may contain opinions, assumptions or conclusions by the Company’s management that should not be considered a replacement for, and must be read in conjunction with, the financial statements.

The Financial Statements Include — The Balance Sheets provide information about the nature and amounts of investments in resources (assets) and the obligations to the Company’s creditors (liabilities), with the difference between the two reported as net assets.

The Statements of Revenues, Expenses and Changes in Net Assets show how the Company’s net assets changed during each year and accounts for all of the revenues and expenses, measures the success of the Company’s operations from an accounting perspective over the past year, and can be used to determine how the Company has funded its costs.

The Statements of Cash Flows provide information about the Company’s cash receipts, cash payments, and net changes in cash resulting from operations, noncapital financing, capital and related financing, and investing activities.

The Notes to the Financial Statements — The notes to the financial statements provide additional information that is essential for a full understanding of the information provided in the financial statements.

2. FINANCIAL REPORTING ENTITY

On December 5, 1997, the Metropolitan Transportation Authority (“MTA”) began its operation of its newly incorporated captive insurance company, FMTAC. FMTAC was created by the MTA to engage in the business of acting as a pure captive insurance company under Section 7005, Article 70 of the Insurance Law and Section 1266 Subdivision 5 of the Public Authorities Law of the State of New York. FMTAC’s mission is to continue, develop, and improve the insurance and risk management needs as required by the MTA. The MTA and the Company are component units of the State of New York.

3. CONDENSED FINANCIAL INFORMATION

The following sections will discuss the significant changes in the Company's financial position for the years ended December 31, 2010 and 2009. Additionally, examinations of major economic factors that have contributed to these changes are provided. It should be noted that for purposes of the MD&A, summaries of the financial statements and the various exhibits presented are extracted from the Company's financial statements, which are presented in accordance with accounting principles generally accepted in the United States of America. All dollar amounts are in thousands.

(In thousands)	As of December 31,			Increase/(Decrease)	
	2010	2009	2008	2010-2009	2009-2008
ASSETS					
CURRENT ASSETS	\$ 250,454	\$ 247,177	\$ 485,819	\$ 3,277	\$(238,642)
NONCURRENT ASSETS	<u>342,205</u>	<u>338,001</u>	<u>45,943</u>	<u>4,204</u>	<u>292,058</u>
TOTAL ASSETS	<u>\$ 592,659</u>	<u>\$ 585,178</u>	<u>\$ 531,762</u>	<u>\$ 7,481</u>	<u>\$ 53,416</u>

Significant Changes in Assets:

December 31, 2010 versus 2009

Total Assets have increased by \$7,481 or 1 percent, from December 31, 2009 to December 31, 2010. The fluctuations in the assets of FMTAC are a result of the normal operations of the Company.

December 31, 2009 versus 2008

Total Assets have increased by \$53,416 or 10 percent, from December 31, 2008 to December 31, 2009. This increase is due to an increase in the market value of investments at December 31, 2009. All other fluctuations in the assets of FMTAC are a result of the normal operations of the Company.

(In thousands)	As of December 31,			Increase/(Decrease)	
	2010	2009	2008	2010-2009	2009-2008
LIABILITIES AND NET ASSETS					
CURRENT LIABILITIES	\$ 150,332	\$ 176,606	\$ 187,671	(26,274)	(11,065)
NONCURRENT LIABILITIES	296,116	281,617	247,749	14,499	33,868
RESTRICTED NET ASSETS	<u>146,211</u>	<u>126,955</u>	<u>96,342</u>	<u>19,256</u>	<u>30,613</u>
TOTAL LIABILITIES & NET ASSETS	<u>\$ 592,659</u>	<u>\$ 585,178</u>	<u>\$ 531,762</u>	<u>\$ 7,481</u>	<u>\$ 53,416</u>

Significant Changes in Liabilities:

December 31, 2010 versus 2009

Total liabilities from December 31, 2009 to December 31, 2010 have decreased by \$11,775 or 3 percent. This decrease is a result of a reduction in unearned premium for the OCIP Liberty programs and increase in loss reserves from the most recent actuarial analysis.

December 31, 2009 versus 2008

Total liabilities from December 31, 2008 to December 31, 2009 have increased by \$22,803 or 5 percent. This increase is due to an increase in loss reserves from the most recent actuarial analysis.

Significant Changes in Net Assets:

December 31, 2010 versus 2009

In 2010, the restricted net assets increase of \$19,256 is comprised of operating revenue of \$98,583 and non-operating income of \$29,848, less operating expenses of \$109,175.

December 31, 2009 versus 2008

In 2009, the restricted net assets increase of \$30,613 is comprised of operating revenue of \$75,469 and non-operating income of \$37,543, less operating expenses of \$82,399.

Condensed Statements of Revenues, Expenses and Changes in Net Assets

(In thousands)	2010	2009	2008	Increase/(Decrease)	
				2010-2009	2009-2008
OPERATING REVENUE	\$ 98,583	\$ 75,469	\$ 72,947	\$ 23,114	\$ 2,522
OPERATING EXPENSES	<u>109,175</u>	<u>82,399</u>	<u>57,023</u>	<u>26,776</u>	<u>25,376</u>
OPERATING (LOSS) INCOME	(10,592)	(6,930)	15,924	(3,662)	(22,854)
NON-OPERATING INCOME (LOSS)	<u>29,848</u>	<u>37,543</u>	<u>(11,314)</u>	<u>(7,695)</u>	<u>48,857</u>
NET INCOME	19,256	30,613	4,610	(11,357)	26,003
RESTRICTED NET ASSETS — Beginning of year	<u>126,955</u>	<u>96,342</u>	<u>91,732</u>	<u>30,613</u>	<u>4,610</u>
RESTRICTED NET ASSETS — End of year	<u>\$146,211</u>	<u>\$126,955</u>	<u>\$ 96,342</u>	<u>\$ 19,256</u>	<u>\$ 30,613</u>

Operating Revenues — The increase of \$23,114 or 31 percent, over the 2009 operating revenue is due to earned premium on the OCIP Liberty programs.

The increase of \$2,522 or 3 percent, over the 2008 operating revenue is due to the additional premium on various insurance programs.

Operating Expenses — Operating expenses between 2009 and 2010 increased by 32 percent, or \$26,776. This increase is due to loss reserve adjustments from the most recent actuarial analysis.

Operating expenses between 2008 and 2009 increased by 45% percent, or \$25,376. This increase is due to reserve adjustments resulting in the most recent actuarial analysis, specifically for the Paratransit and Excess Loss Programs.

Non-operating Income — Non-operating income between 2009 and 2010 decreased by 20 percent, or \$7,695. The decrease is a result of a reduction in unrealized gains on investments held by FMTAC.

Non-operating income between 2008 and 2009 increased by 432 percent, or \$48,857. The increase is being driven by the reduction in unrealized losses of \$26,344 on investments held by FMTAC.

4. OVERALL FINANCIAL POSITION AND RESULTS OF OPERATIONS AND IMPORTANT ECONOMIC CONDITIONS

Results of Operations — Operating as a pure captive insurance company domiciled in the State of New York requires that all business plans and changes to said plans have to be reviewed and approved by the New York Insurance Department. As of December 31, 2010, all programs administered by FMTAC have been reviewed and approved.

As of December 31, 2010 and 2009, FMTAC received its annual loss reserve certification. The actuary determined that reserves recorded by FMTAC were adequate and no adjustments were deemed necessary.

U.S. Insurance Market — After two difficult years, the U.S. P/C insurance industry proved relatively resilient to the global financial crisis that crippled so many companies and industries in 2008 and 2009. Although the industry suffered from sharp declines in asset values, its capital position proved more than sufficient to weather the crisis. By the end of 2010, policyholders' surplus is likely to be at record levels. The United States avoided a major hurricane landfall for the second consecutive year. In addition, the industry will report favorable prior-year loss reserve development for the fifth consecutive year.

Although insurers generally manage very conservative investment portfolios, the global financial crisis is a reminder of how volatile the investment environment can be. During 2010, many insurers took additional steps to "de-risk" their investment portfolios by reducing their exposure to more volatile asset classes. Despite the overall turnaround in investment performance, the P/C industry will continue to face near-term investment challenges as historically low interest rates continue to produce lower yields. In turn, insurers will be forced to focus on underwriting profitability.

The U.S. P/C industry faces challenges in 2011. Although the financial markets stabilized in 2010 and investment returns generally improved, they likely will be modest, if not flat, in 2011. Investment earnings cannot be viewed, as they were in the past, as a reliable source of significant earnings. Insurers will need to be extremely disciplined in underwriting if they are to achieve risk-appropriate rates. Underwriting profitability will be crucial to maintaining financial strength. This will be the biggest challenge for insurers in 2011 as broad-based hardening of rates is not expected in the near term. Overall, the P/C insurance industry appears strong. Insurers' profitability will be pressured in 2011 given the slow economic recovery, low interest rates, and the expected reduction in reserve releases. In addition, competition among commercial insurers is likely to intensify. Management will be under pressure to generate returns to meet their cost of capital and improve market share. Organic growth is very difficult in a soft market unless companies are willing to cut rates, which in turn hurts profitability. P/C insurers in 2011, in an effort to protect their balance sheets, are likely to stay focused on fundamentals including pricing adequacy and underwriting discipline, capital planning, and capturing catastrophe exposures in preparation for the possibility of large-scale catastrophe losses.

5. CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS

Effective November 26, 2002, President Bush passed the Terrorism Risk Insurance Act (TRIA). Effective December 22, 2006, TRIA was extended through December 31, 2007. On December 31, 2007, the U.S. Treasury Department issued Interim Guidance Concerning the Terrorism Risk Insurance Program Reauthorization Act of 2007 (TRIPRA) which has been extended through December 31, 2014. For additional information, please refer to the property section under Footnote 5.

FIRST MUTUAL TRANSPORTATION ASSURANCE COMPANY

(Subsidiary of the Metropolitan Transportation Authority)

NOTES TO FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2010 AND 2009

(In thousands)

1. BASIS OF PRESENTATION

Reporting Entity — First Mutual Transportation Assurance Company (the “Company”), a wholly owned subsidiary of the Metropolitan Transportation Authority (“MTA”), was incorporated under the laws of the State of New York (the “State”) as a pure captive insurance company on December 5, 1997, and commenced operations on that date. The Company was established to maximize the flexibility and effectiveness of the MTA’s insurance program and is governed by a Board of Directors consisting of members of the MTA. The Company’s financial position and results of operations are included in the MTA’s Comprehensive Annual Financial Report. The MTA is a component unit of the State and is included in the State of New York’s Comprehensive Annual Financial Report of the Comptroller as a public benefit corporation.

The New York captive insurance statute requires \$250 minimum unimpaired paid-in-capital and surplus be maintained by a pure captive insurance company. The capital can be maintained by a Letter of Credit, issued by an approved bank and/or cash.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting — The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

In accordance with Governmental Accounting Standards Board (“GASB”) Statement No. 20, *Accounting and Financial Reporting for Proprietary Fund Accounting*, the Company applies all applicable GASB pronouncements as well as all Financial Accounting Standards Board (“FASB”) Statements and Interpretations issued on or before November 30, 1989, that do not conflict with GASB pronouncements. Subsequent to November 30, 1989, the Company exclusively applies all applicable GASB pronouncements.

Use of Management’s Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ significantly from those estimates.

Cash — include highly liquid investments. Cash is stated at cost, which approximates fair value.

Investments — Investments are recorded on the balance sheet at fair value which is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. All investment income, including changes in the fair value of investments, is reported as revenue (either as net investment income or unrealized gain (loss) on investments) on the statement of revenues, expenses and changes in net assets.

Net Assets — Net assets are restricted for payment of insurance claims

Operating Revenues —

Premiums — Earned premiums are determined over the term of their related policies, which approximates one year, or for certain Owner Controlled Insurance Programs (“OCIP”), as a percent of completed construction costs. Accordingly, an unearned premium liability is established for the portion of premiums written applicable to the unexpired period of policies in force or uncompleted construction projects. The Company does not directly pay premium taxes in accordance with its relationship as a component of New York State.

Operating Expenses —

Loss and Loss Adjustment Expenses — Loss and loss adjustment expenses are established for amounts estimated to settle incurred losses on individual cases and estimates for losses incurred but not reported.

Loss and loss adjustment expenses are based on loss estimates for individual claims and actuarial estimates and, therefore, the ultimate liabilities may vary from such estimates. The Company does not yet have sufficient historical loss experience to determine whether the actual incurred loss and loss adjustment expenses will reasonably conform to the assumptions used in determining the liability. Any adjustments to these estimates, which could be significant, will be reflected in income in the period in which the estimates are changed or payments are made.

Non-Operating Revenues and Expenses — Investment income and unrealized gain (loss) on investments account for FMTAC’s non-operating revenues and expenses.

Income Taxes — The Company is not subject to income taxes arising on profits since it is a wholly owned subsidiary of the MTA. The MTA and its subsidiaries are exempt from income taxes.

3. CASH

At December 31, 2010 and 2009, cash consisted of (in thousands):

	2010		2009	
	Carrying Amount	Bank Balance	Carrying Amount	Bank Balance
Insured deposits	\$ 5	\$ 19	\$ 25	\$ 25
Loss escrows	3,174	3,174	2,874	2,874
Restricted Funds for Security Trust	28,588	28,588	-	-
Uninsured deposits	67,634	67,633	68,024	68,024
	<u>\$ 99,401</u>	<u>\$ 99,414</u>	<u>\$ 70,923</u>	<u>\$ 70,923</u>

The Company is required to set aside funds in escrow accounts that are used to settle claims on behalf of the Company. The account balances of the target escrow are \$3,174 and \$2,874 for the years ended December 31, 2010 and 2009, respectively.

As outlined in the above schedule, the carrying amounts differ from the bank balance due to outstanding checks and/or deposits in transit.

All other funds are invested by the Company as described in Footnote 4.

4. INVESTMENTS

The market value and cost basis of investments consist of the following at December 31, 2010 and 2009 (in thousands):

	2010		2009	
	Market	Cost	Market	Cost
Restricted for claim payments	\$ 266,559	\$ 259,021	\$ 273,391	\$ 276,232
Security Trust Funds	49,631	47,968	42,079	41,437
Restricted Funds for Letter of Credit	<u>41,593</u>	<u>41,467</u>	<u>-</u>	<u>-</u>
	<u>\$ 357,783</u>	<u>\$ 348,456</u>	<u>\$ 315,470</u>	<u>\$ 317,669</u>

All investments are registered and held by the Company or its agent in the Company's name.

The Company makes funds available to claims processors to allow for adequate funding for submitted claims. The funds, labeled as Restricted Investments and Security Trust Funds in the above table, are invested primarily in fixed income investments such as U.S. Government Bonds. All investments outlined above are restricted per the balance sheet and are to be used to pay claims or pay administration expenses of the Company or as collateral for letter of credit obligations.

All funds of the Company not held as cash are invested by the Company in accordance with the Company's investment guidelines. Investments may be further limited by individual security trust agreements. The Company's investment policies comply with the New York State Comptroller's guidelines for such policies. Those policies permit investments in fixed income securities that are investment grade or higher and the policy also allows for the investment in equities.

Investments maturing and expected to be utilized within the year of December 31 have been classified as current assets in the financial statements.

All investments are recorded on the balance sheet at fair value and all investment income, including changes in the fair value of investments, is reported as revenue/(expense) on the statement of revenues, expenses and changes in net assets. Fair values have been determined using quoted market values at December 31, 2010 and 2009.

The fair value of the above investments consists of \$266,559 and \$273,391 in 2010 and 2009 in investments restricted for claim payments, respectively, \$49,631 and \$42,079 in 2010 and 2009 in security trust funds, respectively and \$41,593 for letter of credit obligations in 2010. The yield to maturity rate on the above investments was 3.76% for the year ended December 31, 2010, and 3.85% during the year ended December 31, 2009. The net unrealized gain (loss) on investments for the years ended December 31, 2010 and 2009, was \$11,525 and \$26,344, respectively.

Interest Rate Risk — Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of the investment. Duration is a measure of interest rate risk. The greater the duration of a bond or portfolio of bonds, the greater its price volatility will be in response to a change in interest rate risk and vice versa. Duration is an indicator of bond price's sensitivity to 100 basis point change in interest rates.

Foreign Currency Risk — Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. Each investment manager, through the purchase of units in a commingled investment trust fund or international equity mutual fund establishes investments in international equities.

5. INSURANCE PROGRAMS

Property and Terrorism Coverage — Effective May 1, 2010, FMTAC renewed the all-agency property insurance program. For the period May 1, 2010 through May 1, 2011, FMTAC directly insures property damage claims of the related entities in excess of a \$25,000 per occurrence self-insured retention (“SIR”), subject to an annual \$75,000 aggregate. Losses occurring after the retention aggregate is exceeded are subject to a deductible of \$7,500 per occurrence. The total program limit has been maintained at \$1,075,000 per occurrence covering property of the related entities collectively. With the exception of acts of terrorism (both domestic and foreign), and subject to certain parts of the program limit that have been retained by FMTAC as discussed in the next paragraph, FMTAC is fully reinsured in the domestic, London, European and Bermuda marketplaces for this coverage.

The property insurance, which was subject to a renewal on May 1, 2010, provides replacement cost coverage for all risks of direct physical loss or damage to all real and personal property, with minor exceptions. The policy also provides extra expense and business interruption coverage. This coverage expires on May 1, 2011.

With respect to acts of terrorism, FMTAC is reinsured by the United States Government for 85% of such “certified” losses, as covered by the Terrorism Risk Insurance Act of 2007 (originally introduced in 2002). Under the 2007 extension, terrorism acts sponsored by both foreign and domestic organizations are covered. Until 2007, the Act only provided coverage for acts sponsored by foreign organizations.

The remaining 15% of MTA losses would be covered under an additional policy described below. Additionally, no federal compensation will be paid unless the aggregate industry insured losses exceed a \$100,000 (“trigger”).

To supplement the reinsurance to FMTAC through TRIA 2007, the MTA obtained an additional commercial reinsurance policy with Lexington Insurance Company part of Chartis. That policy provides coverage for (1) 15% of any “certified” act of terrorism — up to a maximum recovery of \$161,250 for any one occurrence, or (2) 100% of any “certified” terrorism loss which does not reach the \$100,000 trigger” — up to a maximum recovery of \$100,000 for any occurrence. This coverage expires on May 1, 2011. Recovery under this policy is subject to retention of \$25,000 per occurrence and \$75,000 in the annual aggregate — in the event of multiple losses during the policy year. Should the MTA’s retention in any one year come to a total \$75,000, then future losses in that policy year are subject to retention of \$7,500.

Excess Loss Fund (“ELF”) — On October 31, 2003, the Company assumed the existing ELF program on both a retrospective and prospective basis. The retrospective portion contains the same insurance agreements, participant retentions and limits as existed under the ELF program for occurrences happening on or before October 30, 2003. The coverage limit will remain \$50,000 per occurrence or the proceeds of the program whichever is less. On a prospective basis, effective October 31, 2003, the Company issued insurance policies indemnifying the MTA, its subsidiaries and affiliates above their specifically assigned Self-Insured Retention with a limit of \$50,000 per occurrence with \$50,000 annual aggregate. The balance of the ELF, \$77,000 was transferred to and invested by the Company in order to secure any claims assumed from the ELF, as well as to capitalize the prospective programs and insure current and future claims. FMTAC charges appropriate annual premiums based on loss experience and exposure analysis to maintain the fiscal viability of the program. The premium for the one-year policy effective October 31, 2010, is \$4,100.

MTA also maintains an All-Agency Excess Liability Insurance Policy that affords the MTA and its subsidiaries and affiliates additional coverage limits of \$350,000, for a total of \$400,000 (\$350,000 excess of \$50,000). In certain circumstances, when the assets in the program are exhausted due to payment of claims, the All-Agency Excess Liability Insurance will assume the coverage position of \$50,000.

Effective October 31, 2010, the Company provides limits of \$100,000 excess \$200,000 that will be 100% reinsured by XL Insurance Europe and Torus Insurance (Bermuda) Limited., with the exception of claims arising from acts of terrorism. As of October 31, 2010, the Company provides limits of \$100,000 excess of \$300,000 reinsured by AIG Cat Excess with the exception of claims arising from acts of terrorism.

Stations and Force Liability — Effective December 15, 2010, the Company renewed its direct insurance for the first \$9,000 per occurrence losses for Long Island Rail Road Company and Metro-North Commuter Railroad Company with no aggregate stop loss protection.

All Agency Protective Liability — The Company issued a policy to cover MTA’s All Agency Protective Liability Program (“AAPL”), which is designed to protect the MTA and its agencies against the potential liability arising from independent contractors working on capital and noncapital projects. The net retention to the Company is \$2,000. The Company also issued a policy for \$6,000 excess of \$2,000 per occurrence with a \$12,000 annual aggregate. Effective June 1, 2010, the Company extended its current AAPL for an additional six months to January 1, 2011.

Paratransit — Effective March 1, 2010, the Company renewed its deductible reimbursement policy, insuring the auto liability on the NYCT Paratransit operations, to expire on March 1, 2011. The Company renewed its one-year policy on March 1, 2010, with USF&G (Discover Re). The Company is responsible for the first \$1,000 per occurrence of every claim covered by the policy. The limits are \$3,000 per occurrence.

Non-Revenue — Effective March 1, 2010, the Company renewed a deductible reimbursement policy, insuring the auto liability for the MTA and some of its agencies for the non-revenue fleet. The Company is responsible for the first \$500 per occurrence of every claim covered under the USF&G (Discover RE) policy. The limits are \$ 9,000 per occurrence for all participating agencies except MTA Long Island Bus where the per occurrence limit is \$2,600.

Owner-Controlled Insurance Programs — The MTA purchases Owner-Controlled Insurance Programs (“OCIP”) under which coverage is provided on a group basis for certain agency projects. The Company provides the collateral required by the OCIP insurers to cover deductible amounts. The Company records in the OCIP liability account the amount of principal paid by the MTA to the program. The interest earned is not recognized in the statements of operations. Rather, the amounts are recorded as Deferred Incentive Award Payable as the Company may have to make payments to contractors with favorable loss experience.

OCIP liability consists of the following at December 31, 2010 and 2009 (in thousands):

	2010	2009
NYCT structures lines	\$ 532	\$ 532
LIRR/MNCR 2000-2004 Capital Improvement Program	(893)	8,017
NYCT 2000-2004 line structures/shops, yards and depots Capital Improvements Program	5,697	27,452
NYCT 2000-2004 stations and escalators/elevators Capital Improvements Program	2,234	9,961
LIRR/MNR 2005-2009 Capital Improvement Program	3,577	3,628
CCC Second Ave. Subway	<u>20,252</u>	<u>17,026</u>
OCIP liability	<u>\$ 31,399</u>	<u>\$ 66,616</u>

OCIPs Covering 2000-2004 Capital Program — The Company entered into three agreements with AIG covering portions of the 2000-2004 MTA Capital Program effective October 1, 2000: (1) LIRR/MNCR 2000-2004 capital improvement program; (2) NYCT 2000-2004 lines structures/shops, yards and depots capital improvement program; and (3) NYCT 2000-2004 stations and escalators/elevators capital improvement program. The combined collateral requirements are \$86,094 — \$10,384 for the LIRR/MNCR OCIP; \$52,709 for the NYCT 2000-2004 lines structures/shops, yards and depots capital improvement program; and \$23,000 for the NYCT 2000-2004 stations and escalators/elevators capital improvement program. The collateral posted by the Company to secure its reimbursement of the insurer’s payments is invested by the insurer with interest returning to the Company at a guaranteed annual rate of return. The Company earned \$444 and \$889 during the years ended December 31, 2010 and 2009, respectively. The interest earned will be used to make the Contractor Safety Incentive program payments to contractors with favorable loss experience. Any monies not used to pay losses or utilized for the Contractor Safety Incentive Program will be returned to the agencies at the end of the OCIPs. As part of the initial agreement and as amended in 2005, the Company was required to make additional contributions of \$2,368 to the LIRR/MNR capital

improvement program. In 2010 and 2009, respectively, the Company made claims payments totaling \$4,372 and \$8,911.

OCIP-LIRR/MNCR 2005-2009 Capital Improvement Projects — Effective June 1, 2006, the Company entered into a new OCIP insurance program for LIRR/MNCR for capital projects in the 2005-2009 MTA Capital Program. The Company collected \$2,192 in premiums beginning in 2006. The OCIP contracts will expire on June 1, 2014. The Company made claim payments totaling \$870 and \$503 during 2010 and 2009, respectively. Like the other programs, the interest income generated from the funds being held will be used to pay Contractor Safety Incentive program payments. As of December 31, 2010, the Company has accrued \$23 in interest income.

Second Avenue Subway Project — Effective January 31, 2007, the Company entered into an OCIP program for the \$2,500,000 Second Avenue Subway Project. This is a multi-year agreement with AIG covering Workers' Compensation and General Liability for the Third Party contractors, MTA and all its subsidiaries up to \$500,000. This OCIP, like the others, requires the Company to post collateral for all losses related to workers' injuries. In 2010, \$20,252 has been set aside to cover this exposure. The Company earned \$123 in interest with \$617 in loss payments on this OCIP during 2010. All interest generated will be used to pay for additional loss control services and a contractor incentive program.

The activity of all funds held by the OCIP reinsurer consists of the following for 2010 and 2009 (in thousands):

	2010	2009
Funds held by OCIP insurers — beginning of year	\$ 72,292	\$ 72,693
Interest income	590	1,099
Reimbursement to the Company for Safety and Loss Control	-	-
Claims payments	(5,859)	(9,455)
Additional contributions/(returned), net	<u>(29,358)</u>	<u>7,955</u>
Funds held by OCIP reinsurer	<u>\$ 37,665</u>	<u>\$ 72,292</u>

East Side Access Project (“ESA”) — Effective April 1, 1999, the Company entered into an OCIP program for the \$6,340,000 East Side Access Project. It was a multi-year agreement with Liberty Mutual, the insurer, to insure third party contractors and the MTA and all its subsidiaries up to \$300,000 for Workers' Compensation and General Liability. The insurer required the Company to hold the collateral and loss funding for the first \$500 per occurrence.

Excess and Professional/Environmental — Kemper Insurance Company issued excess and professional/environment liability policies to the MTA and LIRR, on behalf of work performed on the ESA. The original policies issued by Kemper had effective dates of April 1, 1999 through December 31, 2010, and were cancelled effective June 30, 2003. Through novation and assumption agreements, effective June 30, 2003, the Company assumed 100% of the liabilities for the period of April 1, 1999 through June 30, 2003, from Kemper for the two insurance policies referenced above. The first policy issued has limits of \$48,000 excess of \$2,000 for liability coverage on an occurrence basis and the second policy is for professional and environmental coverage with limits of \$50,000 on a claim made basis. As of the date of this report, there are no known or reported claims. The company retained no premium for these programs, since the Company will seek reimbursement from the original insured if a claim arises.

NYCT 2005-2009 Capital Improvements Projects — Effective August 1, 2006, the Company entered into a multi-year agreement with Liberty Mutual whereby the Company will hold the collateral and loss funding for the first \$500 per occurrence resulting from Workers' Compensation and General Liability losses during the NYCTA's 2005-2009 Capital Improvement Projects.

Builder's Risk — Effective October 1, 2001, the Company renegotiated the terms and conditions of the reinsurance coverage it purchased from Zurich for the Builder's Risk Insurance Program (BR) provided to cover the following 2000-2004 capital program OCIPs:

1. Long Island Rail Road/Metro North Commuter Railroad Capital Improvement Program;
2. NYCT's Lines Structures/Shops, Yards & Depots Capital Improvement Program, and
3. NYCT's Stations & Elevators Capital Improvement Program

The Company's policy and reinsurance agreements provide the capital projects listed above with limits of \$50,000 in the aggregate. In consideration of \$950 in net retained premium, the Company issues a deductible reimbursement policy with limits of \$75 excess of \$25.

Similar to the above BR program, effective July 31, 2006, the Company entered into a new BR program for the following 2005-2009 capital program OCIPs:

1. Long Island Rail Road/Metro North Commuter Railroad Capital Improvement Program and
2. NYCT's 2005-2009 Capital Improvement Program

The Company's policy and reinsurance agreements from Zurich provide the capital projects listed above with limits of \$50,000 in the aggregate. In consideration of \$7,500 in net retained premium, the Company issues a deductible reimbursement policy with limits of \$475 excess of \$25.

In 2005, the Company received approval to expand its Builder's Risk Insurance Program to directly insure the MTA and its agencies for property claims while various capital improvement projects are under construction. The policy will cover selected capital improvement projects and was bound June 1, 2005, with limits of \$300,000 per occurrence PO subject to the \$100,000 self-insured retention. In consideration of a ceded premium of \$12,750, the Company purchased reinsurance for the East Side Access Project from Zurich limiting its exposure to the \$100,000 PO self-insured retention. In 2007, this limit was bought down to \$50,000 for an additional premium of \$5,053. The Company also purchased reinsurance for the Second Avenue Subway Project. In consideration of ceded premium of \$13,362, reinsurance covering losses up to \$500,000 excess of \$50,000 was purchased from Zurich. The reinsurance purchased by the Company will include an aggregate stop loss provision, whereby the Company will limit its total liability to \$125,000 in the aggregate.

6. LOSS AND LOSS ADJUSTMENT EXPENSES AND REINSURANCE

The following schedule presents changes in the loss and loss adjustment expense liabilities during 2010 and 2009 (in thousands):

	2010	2009
Loss and loss adjustment expenses — beginning of year	\$ 239,470	\$ 179,117
Loss reinsurance recoverable on unpaid losses and loss expenses	<u>(25,454)</u>	<u>(21,111)</u>
Net balance — beginning of year	214,016	158,006
Loss and loss adjustment expenses	99,813	72,851
Payments attributable to insured events of the current year	<u>(48,098)</u>	<u>(16,841)</u>
Net balance — end of year	265,731	214,016
Plus reinsurance recoverable on unpaid losses and loss expenses	<u>28,683</u>	<u>25,454</u>
Loss and loss adjustment expenses — end of year	294,414	239,470
Less current portion	<u>29,825</u>	<u>24,469</u>
Long-term liability	<u>\$ 264,589</u>	<u>\$ 215,001</u>

7. RELATED PARTY TRANSACTIONS

The Company provides insurance coverage for the MTA and its component and subsidiary units. The premium revenue from related parties during the period and receivable for the years ended December 31, 2010 and 2009, was as follows (in thousands):

	2010		2009	
	Receivable	Earned	Receivable	Earned
LIRR	\$ 8,959	\$ 11,611	\$ 9,153	\$ 12,946
MNCR	6,822	8,482	6,207	9,055
MTA	<u>49,078</u>	<u>78,490</u>	<u>78,796</u>	<u>53,468</u>
	<u>\$ 64,859</u>	<u>\$ 98,583</u>	<u>\$ 94,156</u>	<u>\$ 75,469</u>

For the years ended December 31, 2010 and 2009, respectively, the MTA charged \$5,187 and \$5,000, respectively, to FMTAC for risk management services provided to the Company.

BLUE SHEET

Statement of Actuarial Opinion
Annual Statement of
First Mutual Transportation Assurance Company
For the Year Ended December 31, 2010

IDENTIFICATION

I, Derek A. Jones, am associated with the firm of Milliman, Inc. I am a member of the American Academy of Actuaries and meet its qualification standards for Statements of Actuarial Opinion regarding fire and casualty insurance company statutory Annual Statements. I am also a member in good standing and Fellow of the Casualty Actuarial Society. I was appointed by the Board of Directors of First Mutual Transportation Assurance Company ("FMTAC" or "the Company") on August 1, 2006 to render this opinion.

The loss and loss adjustment expense reserves are the responsibility of the Company's management; my responsibility is to express an opinion on those reserves based on my review.

SCOPE

I have examined the reserves listed in Exhibit A, as shown in the Annual Statement of the Company as prepared for filing with state regulatory officials, as of December 31, 2010. The items upon which I am expressing an opinion, as shown in Exhibit A, reflect the disclosures shown in Exhibit B.

In forming my opinion on the loss and loss adjustment expense reserves, I relied upon data and related information prepared by the Company. In this regard, I relied on Laureen Coyne, President of FMTAC, as to the accuracy and completeness of the data. I evaluated the data used directly in my analysis for reasonableness and consistency. My evaluation did not reveal any data points materially affecting my analysis that fell outside of the range of reasonable possibilities. In performing this evaluation, I have assumed that the Company (a) used its best efforts to supply accurate and complete data and (b) did not knowingly provide any inaccurate data. In other respects, the analysis underlying my opinion included the use of such actuarial assumptions and methods and such tests of calculations as I considered necessary.

My review was limited to the items included in Exhibit A, and did not include an analysis of any income statement items or other balance sheet items. My opinion on the reserves is based upon the assumption that all reserves are backed by valid assets which have suitably scheduled maturities or adequate liquidity to meet cash flow requirements.

Statement of Actuarial Opinion

Annual Statement of First Mutual Transportation Assurance Company For the Year Ended December 31, 2010

OPINION

In my opinion, the amounts carried in Items 3. and 5., as shown in Exhibit A:

- A. Meet the requirements of the captive insurance laws of the State of New York;
- B. Are consistent with reserves computed in accordance with Standards of Practice issued by the Actuarial Standards Board (including the Casualty Actuarial Society's Statement of Principles Regarding Property and Casualty Loss and Loss Adjustment Expense Reserves); and
- C. Make a reasonable provision for all unpaid loss and loss adjustment expense obligations of the Company under the terms of its contracts and agreements.

RELEVANT COMMENTS

Risk of Material Adverse Deviation

There are a variety of risk factors that expose the Company's reserves to significant variability. I have identified the major risk factors as the long-tailed nature of the liability coverages, the uncertainty of loss emergence patterns due to the immaturity of certain programs and the potential for catastrophic claims assumed by the Excess Loss Program ("ELP"). The potential impact of these risk factors is described in more detail in the following paragraphs and in the report supporting this opinion. The absence of other risk factors from this listing does not imply that additional risk factors will not be identified in the future as being a significant influence on the Company's reserves.

Historically, auto liability, general liability and workers compensation coverage have been subject to variability and uncertainty due to the long-tailed nature of the coverage. The payment of losses will likely be made over a long period of time and are subject to a number of uncertainties, such as inflation and the legal environment. Also, for the liability coverages, there may be significant time lags between the accident date, the claim reporting date and the claim settlement date. These time lags create considerable uncertainty regarding the ultimate value of claims incurred as of a particular date, particularly with regard to claims that have occurred but have not yet been reported.

The Company began operations in 1997. Lacking sufficient historical internal experience for the Company, especially for the Non-Revenue, Paratransit, and Capital Construction programs, which started after 2001, I have relied primarily upon industry data and data for Metropolitan Transportation Authority ("MTA") agencies' self-insurance programs as appropriate sources on which to base my assumptions regarding future loss emergence patterns. In my opinion, these data are relevant to the operations of the new program. However, the uncertainty of the resulting reserve estimates for the Company is increased due to the lack of sufficient internal experience. Further, it is likely that the Company's future loss emergence patterns will not develop exactly as anticipated by the benchmark patterns.

Statement of Actuarial Opinion

Annual Statement of First Mutual Transportation Assurance Company For the Year Ended December 31, 2010

Through the ELP, the Company retains a net limit of \$50 million per occurrence for coverage provided to MTA agencies above a self-insured retention. The agencies' self-insured retentions vary by program and year and are as large as \$9 million per occurrence. As a result, the potential exposure to the ELP is significant and increases the uncertainty of the Company's ultimate claim liabilities.

I believe that the risk factors above, coupled with the variability that is inherent in any estimate of unpaid loss and loss adjustment expense obligations, could result in material adverse deviation from the carried net reserve amounts. By this, I mean that the probability of such a deviation occurring is not so low as to be remote. In making this determination, I have considered a material adverse deviation to be one in which the actual net outstanding losses and loss adjustment expenses exceed the amount carried in Item 5 in Exhibit A by an amount greater than \$14,889,570.

This materiality standard, shown as Item 5 in Exhibit B, is equal to 10% of the Company's capital and surplus. In selecting this materiality standard I considered several factors, such as the Company's reserve leverage ratio, the Company's history of reserve development, the policy limits and coverages written by the Company. My selection of the materiality standard (10% of capital and surplus) was based on the fact that this opinion is prepared for the regulatory review of the Company. Other measures of materiality might be used for reserves that are being evaluated in a different context.

Uncertainty

In evaluating whether the reserves make a reasonable provision for unpaid losses and loss expenses, it is necessary to project future loss and loss adjustment expense payments. Actual future losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections. Further, my projections make no provision for extraordinary future emergence of new classes of losses or types of losses not sufficiently represented in the Company's historical database or that are not yet quantifiable.

Reinsurance

The actuarial report in support of this opinion includes a summary of the Company's ceded reinsurance that is or could be material to the Company's ceded loss and loss adjustment expense reserves as of December 31, 2010. The Company has represented that the summary is materially accurate and complete, and that the Company has determined that these contracts should be accounted for as reinsurance. The assessment of whether a reinsurance contract meets the requirements for reinsurance accounting is a management and accounting decision. As such, I express no opinion as to whether the Company's ceded reinsurance contracts meet the requirements for reinsurance accounting.

Statement of Actuarial Opinion
Annual Statement of
First Mutual Transportation Assurance Company
For the Year Ended December 31, 2010

Based on my discussions with Company management and my understanding of the Company's ceded and assumed reinsurance, there are several assumed reinsurance treaties that are accounted for as financial reinsurance (defined as contractual arrangements that do not include transfer of both timing and underwriting risk) and, as such, use deposit accounting. Under an owner-controlled insurance program, MTA purchases insurance from Chartis and Liberty Mutual for the contractors' workers compensation, general liability and builders' risk exposures related to certain capital improvement projects. This underlying coverage is then reinsured by FMTAC. The maximum loss and loss adjustment expense assumed by FMTAC is equal to the assumed premium. Loss reserves carried by the Company for these programs are equal to the assumed premium. The majority of this exposure is 100% retroceded and the maximum loss to the retrocessionaire is equal to the premium paid under the retrocessional agreements. I am not aware of any other reinsurance contract that either has been or should have been accounted for as retroactive reinsurance or as financial reinsurance.

The Company has represented to me that it knows of no uncollectible reinsurance cessions and no disputed reinsurance balances. I also reviewed the ratings of the Company's reinsurers using the A.M. Best Insurance Reports published as of January 18, 2011. There are no material reinsurance recoverables with assuming companies that were rated vulnerable (B or lower) by A.M. Best or that were reported to be in liquidation, conservation or receivership. I have performed no additional review of the collectibility of the Company's reinsurance and am expressing no opinion on the financial condition of its reinsurers.

Based on the information cited above, my opinion on the loss and loss adjustment expense reserves net of ceded reinsurance assumes that all ceded reinsurance is valid and collectible. I am not aware of any reinsurance that the Company treated as collectible but should have treated as uncollectible. I have not anticipated any contingent liabilities that could arise if the reinsurers do not meet their obligations to the Company as reflected in the data and other information provided to me.

Other Disclosures

Discounting

I evaluated the loss and loss adjustment expense reserves on an undiscounted basis with regard to the time value of money. The Company has represented that it does not reduce reserves to reflect discounting.

Asbestos and Environmental Exposure

I have reviewed the Company's exposure to asbestos and environmental claims. In my opinion, there is a remote chance of material liability, since there has been no claim activity since the Company's inception in 1997.

Statement of Actuarial Opinion
Annual Statement of
First Mutual Transportation Assurance Company
For the Year Ended December 31, 2010

Contractual Liability for Service Contracts

The Company has represented that it does not provide contractual liability coverage for service contracts (vehicles, appliances, etc.).

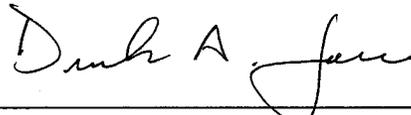

Salvage and Subrogation

The data underlying my review, and the resulting estimates, are net of subrogation and salvage recoveries. The Company has represented that its total carried reserves are net of anticipated salvage and subrogation recoveries. The Company has not quantified salvage and subrogation recoverable in the Annual Statement.

SUPPORTING DOCUMENTS AND USAGE

An actuarial report, including underlying actuarial work papers supporting the findings expressed in this Statement of Actuarial Opinion, will be provided to the Company to be retained for a period of seven years in the administrative offices of the Company and made available for regulatory examination.

This Statement of Actuarial Opinion is solely for the use of, and only to be relied upon by, the Company and the New York State Insurance Department, with which it files its Annual Statement.

- ◆ A minefield of risks is threatening the economy's growth outlook, and we have downgraded our full-year 2011 real GDP forecast to 2.8% from 3.5% as a result. While current economic momentum augurs for a 3.5% growth rate, we expect the data will begin to deteriorate a bit in coming months as a result of increased uncertainty and higher oil prices. If the data hold up, then our original forecast will probably be restored.
- ◆ The minefield of risks includes: global supply chain disruptions as a result of Japanese events; the potential for meaningful and lasting deterioration in Asian economic activity; rising oil prices as a result of unrest in the Middle East; the risk that U.S. involvement in the Middle East extends beyond the Libyan no-fly zone; the potential for a government shutdown as a result of expiring authorities for both spending and borrowing; the risk that the sovereign credit crisis in Europe escalates; the potential for a larger-than-expected decline in U.S. house prices; and the risk that financial markets are destabilized by these or other events. If any of these potential shocks escalates materially, then we may have to downgrade our forecast further.
- ◆ Fortunately, the economy is in fairly good shape and can withstand a significant amount of turbulence. Moreover, we expect monetary policymakers to err on the side of being overly accommodative as long as inflation expectations remain in check. Fiscal policymakers, however, are fighting over the steering wheel, and this is unsettling. If fiscal policy ends up being overly tight, then growth will be negatively impacted. If it is left excessively loose, then interest rates could rise materially.
- ◆ While monetary policy will remain highly accommodative this year, recent declines in the unemployment rate and increases in the core consumer inflation rate are consistent with a shift in the policy stance during the second half of the year. We expect QEII to be completed as currently designed, and then we expect the Fed to begin tightening policy during the second half of 2011 by ending reinvestment programs, adjusting the extended period language, and immobilizing a portion of excess reserves. Not until 2012 do we expect the Fed to raise the funds rate.
- ◆ The inflation outlook will determine the interest rate outlook. Headline consumer inflation has risen appreciably because of rising food and energy prices, and we now think it could top 3% this year. Core consumer inflation is likely to remain subdued, but it is rising and should reach 1.5% this year and the Fed's 2% target next year. We anticipate a bear flattening of the Treasury yield curve during the second half of 2011 in anticipation of tighter policy in 2012.
- ◆ If downside risks to our growth forecast materialize, we will probably shift our call for the first funds rate increase to later 2012 or possibly 2013 depending on the extent of the weakness and the inflation outlook. If upside risks materialize and there is a rise in inflation expectations, then we will bring forward our funds rate call.

Marsh Captive Solutions Group – Captive Management

Marsh Captive Solutions Group (“MCSG”), comprised of over 500 captive advisory and management experts located throughout the globe, provides specialized expertise, strategic resources and management services to help create a comprehensive, result-focused captive solution to meet a client’s risk management needs. Marsh has been an integral part of the captive industry for over 40 years, currently managing more than 1300 captives worldwide. MCSG has established a reputation for excellence in captive management services and is dedicated to the provision of quality client services at the highest level.

Marsh Captive Solutions New York currently provides management services to 17 of 47 captives in New York, making us the largest captive manager in New York State as measured by captives under management, premium volume under management and capital/surplus under management. We are also committed to maintaining offices in New York to ensure we are easily accessible to our New York based clients. Our services include comprehensive captive administration services, financial accounting and regulatory compliance.

First Mutual Transportation Assurance Company Marsh Captive Management Client Service Team

Nisala Weerasooriya, Head of Office, has the overall responsibility for the performance of your Marsh service team. Nisala will ensure that quality is maintained and that the staff on your team is comprehensively trained and perform to your requirements. Nisala holds a CPA and Chartered Accounting designation and has over 18 years of captive management experience in U.S. and foreign domiciles.

Gemma Mah, Senior Account Manager, has the primary responsibility to ensure smooth financial reporting, regulatory compliance and administration of the company. Gemma holds a Chartered Accountant designation and has over 11 years of captive management experience in U.S. and foreign domiciles.

Feiona Churaman, Account Manager, provides administration support to FMTAC in areas of general operating and cash processing oversight. Feiona successfully completed the Certified Public Accountant’s examination and has 5 years of captive management experience with Marsh.

Marsh USA Inc MTA – Master Broker

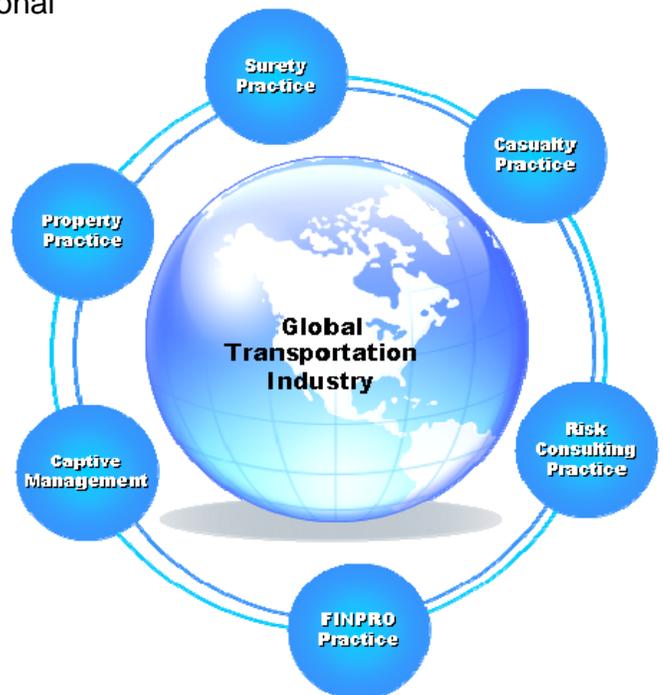

About Marsh

Marsh USA Inc., the world's leading risk and insurance services firm, has 26,000 employees and annual revenues approaching \$5 billion. Marsh provides global risk management, risk consulting, insurance broking, financial solutions, and insurance program management services for businesses, public entities, associations, professional services organizations, and private clients in over 120 countries. Marsh is the largest operating company of Marsh & McLennan Companies ("MMC), a publicly-traded company (NYSE Euronext: MMC).

MMC is a global professional services firm providing advice and solutions in the areas of risk, strategy and human capital. It is the parent company of some of the world's leading risk experts and specialty consultants. With more than 56,000 employees worldwide and annual revenue of approximately \$11 billion, MMC provides analysis, advice, and transactional capabilities to clients around the world.

Industry Resources

Marsh combines traditional Risk Practices with Industry Specializations. The MTA is serviced by risk professionals in Marsh's Property, Casualty, Financial, Professional Liability, Surety, and Risk Consulting departments, while benefiting from the expertise of the Global Transportation Industry Practice. This structure enables Marsh to provide focused insurance advice founded on a solid understanding of the MTA.

MTA Client Service Team

ACCOUNT MANAGEMENT

Jerry Harley – Client Executive

Mr. Harley is a specialist in transportation and construction risk management. He is responsible for the overall account strategy and delivery of the risk management support services to the MTA.

CLIENT ADVISORY SERVICES

Michaela Grasshoff/Ryan O'Connor – Casualty Insurance Advisors

Kathy Bettencourt/Brian Simons – Property Insurance Advisors

These individuals provide support and expertise in coverage, exposures, and financial analysis with the goal of providing maximized coverage while reducing the MTA's total cost of risk. They also provide the MTA with information on emerging risk issues and industry, carrier and market trends.

GLOBAL PLACEMENT SERVICES

Martin Gould – Global Markets Coordinator

Keith Hennessey – Zurich

Vincent Guarino – Bermuda

Tom Davies – London

Jonathan Fennelly - Dublin

Marsh's Global Placement teams interact with the Client Advisors to design and place insurance for and reinsurance of FMTAC. Global Placement Specialists support the MTA in the placement of numerous general liability, environmental, automobile, property, terrorism, and excess liability coverages.

MARSH'S RISK CONSULTING PRACTICE

Tom Ryan – Team Leader

John Kanouse – Casualty Loss Control Manager

Carl Patchke – Casualty Claims Manager

These individuals support the MTA's pre- and post-loss initiatives with over 20 team members who specialize in risk analysis and cost of risk reduction. They are specialists in their respective disciplines and apply their knowledge of the transportation industry to create effective workforce, loss control, claims, and business continuity solutions for the MTA.

- Founded in 1983 and located in Burlington, VT
- Team management structure
- Single focus on institutional fixed income

Relationships

Dwight Asset Management Company focuses exclusively on fixed income investment services for institutional clients, including retirement plans, insurance companies, Taft-Hartley plans, endowment funds and foundations.

Dwight provides First Mutual Transportation Assurance Company with investment management, custom benchmarking, custom performance analysis and reporting services.

Client Service Team:

Sean Saia	Ted Sisson
Senior Vice President	Assistant Vice President
Head of Insurance	Associate Client Portfolio Manager

Perspective

From offices overlooking Lake Champlain, we have created an open environment that fosters the free exchange of ideas and a clear perspective.

Solutions

Our team of experienced professionals customizes solutions to meet the unique needs of each client.

Consistent and Competitive Performance

Dwight has broad investment capabilities across all sectors of the core fixed income market, bringing multiple sources of excess return to the investment process.

Total Return Fixed Income

We focus on spread sectors of the fixed income market, emphasizing security selection and sector rotation techniques, with the goal of adding value to a complete range of fixed income strategies.

Insurance

We combine more than 20 years of institutional fixed income investment experience with the industry knowledge required to meet the specific needs of insurance companies.

Stable Value

We offer high-quality stable value solutions with the goal of providing competitive returns while preserving capital.

MILIMAN, INC.

Milliman was founded in 1947, and was officially incorporated on July 5, 1957. We provide a full range of actuarial and other consulting services to our clients in the areas of Property & Casualty Insurance, Employee Benefits & Investment Consulting, Healthcare, and Life Insurance & Financial Services. Founded by Wendell Milliman and Stuart Robertson, Milliman has grown into a global firm of consultants and actuaries with more than 40 offices in the US and overseas.

In the alternative insurance market, Milliman advises clients on establishing and maintaining reserves for high-deductible retentions, self-insurance retentions, captive insurance companies and risk retention groups. Our services include independent evaluations of loss and loss adjustment expense liabilities and reserve opinions similar to what we provide to First Mutual Transportation Assurance Company. We also assist various agencies of the Metropolitan Transportation Authority, FMTAC's parent, in managing their self-insured claim obligations.

Our New York Metro practice is among the largest property/casualty insurance consulting practices in the Northeast and consists of over 35 actuaries, plus other highly qualified consulting professionals in several other fields, including: economics, claims management and underwriting management. With wide-ranging expertise, practical business intelligence, and the depth of resources to manage projects of any size, we deliver solutions tailored to our clients' needs. Our experience includes: mass tort reserve reviews, expert testimony, insurance product design and pricing, funding level estimation, financial forecasting, asset/liability management, and operational reviews.

Client Service Team:

Will Carbone, ACAS, is an Associate Actuary responsible for data management and implementation of the actuarial models that underlie our analyses of claim liabilities for FMTAC as well as developing reserve estimates for the captive.

Derek Jones, FCAS and Principal, manages the day-to-day operation for Milliman and signs the Statement of Actuarial Opinion for the captive.

Rick Soulsby, FCAS and Actuary, is the lead analyst for Milliman's actuarial review and is responsible for developing reserve estimates for the captive.

TAB G

Glossary of Captive Insurance Terms

Actuarial Report - An analysis intended to project ultimate loss costs using probability theory and other methods of statistical analysis. Used to determine the adequacy of a property and casualty insurer's statutory loss reserves and life insurer's unearned premium (technical) reserves.

Adjuster - A person who settles claims for insurers or self-insurance pools who may be either an employee of the insurance company or an independent contractor engaged by the insurer or self-insured.

Admitted Company - A company licensed or authorized to sell insurance to the general public. In the U.S., admitted companies are licensed on a state-by-state basis and differentiated from surplus lines insurers, which are authorized to sell insurance in a state on a non-admitted basis,

Affiliated Risk - The risks of the owners of the captive or their affiliates or of the participant in a captive cell when describing risks insured in a captive,

Aggregate - The greatest amount recoverable under a policy or reinsurance agreement from a single loss or all losses incurred during the contract period (can be multiyear or annual).

Aggregate Excess - Short for aggregate excess of loss. A method by which an insurer may recover excess losses after a policy or reinsurance aggregate or underlying deductible has been exhausted.

Broker - An intermediary who represents the insured in the purchase of insurance or reinsurance. Therefore, the broker's compensation should be from the insured, not the insurer, to prevent conflicts of interest.

Captive - An insurance company that has as its primary purpose the financing of the risks of its owners or participants. Typically licensed under special purpose insurer laws and operated under a different regulatory system than commercial insurers. The intention of such special purpose licensing laws and regulations is that the captive provides insurance to sophisticated insureds that require less policyholder protection than the general public.

Case Reserves - Loss reserves set up for an identified claim, with each claim assigned a case number.

Claims-made Insurance - Insurance that provides coverage for claims made against an insured within the policy period, regardless of when the action or accident giving rise to the claim occurred. The insured must have been notified of the claim after the retroactive date and must report it to the insurer before the expiration of the policy or any extended reporting period.

Deductible - An amount that an insured agrees to pay, per occurrence or on a per-policy basis, toward the total amount of the insured loss or losses. Insurance is written on this basis at reduced rates since the insured is responsible for the deductible payments as losses occur.

Deferred Acquisitions Cost - The amount of an insurer's acquisition costs incurred as premium is written but earned and expensed over the term of the policy. The deferred portion is capitalized and recognized as an asset on the insurer's balance sheet.

Deferred Tax Asset - The amount of loss reserves or unearned premium that is not deducted from an insurer's income when calculating income taxes. The deferral in the tax deduction arises because of the requirement to discount loss and unearned premium reserves. The insurer records an asset equal to the expected future amount of the tax deduction,

Earned Premium - The amount of premium covering the period a policy has been in force. Usually property, casualty, and health premium is earned in equal proportion to the amount of time elapsed since policy inception, i.e., 1/12 per month, but life insurance and some property and casualty policies insuring seasonal risks may earn in proportion to the amount of exposure.

Gross Written Premium (GWP) - The total premium written and assumed by an insurer before deductions for reinsurance and ceding commissions.

Incurred but not reported (IBNR) - The loss reserve value established by insurance and reinsurance companies in recognition of their liability for future payments on losses that have occurred but that have not yet been reported to them.

Incurred Loss - Total amount of a loss, including amounts paid and reserves for future payments.

Insured - Person or organization covered by an insurance policy, including the "named insured" and any additional insureds for-whom protection is provided under the policy term.

Liability Limits - The stipulated sum or sums beyond which an insurance company is not liable for payments due to a third party. The insured remains legally liable above the limits.

Limitation of Risk - The maximum amount an insurer or reinsurer must pay in any one loss event.

Loss - The destruction, reduction, or disappearance of value of tangible or intangible property; bodily or emotional injury; or reduction in income

Loss Adjustment Expense (LAE) - The expense incurred by the insurer in the investigation, defense, and settlement of claims under its policies.

Occurrence - An accident or incident, including continuous or repeated exposure to conditions that result in a loss neither expected nor intended from the standpoint of the insured, or an act or related series of acts that result in the same.

Premium - The sum paid for an insurance policy or consideration in the insurance contract. As income to the insurer, it is therefore the basis for taxes on the insurer.

Pure Premium - The amount of premium calculated for the risk to be insured, net of policy expenses. The amount of premium available to pay losses and allocated loss adjustment expenses (ALAEs).

Sponsor - The legal entity that contributes statutory capital to from a sponsored or association captive.

Standard Premium - Premium established by using rates believed by underwriters to reflect the standard or average risk for the class, before application of retrospective rating formulas. When debits and credits based on the insureds loss history or exposure are applied, the standard premium equals the pure premium.

Underwriting Expenses - 1. The cost incurred by an insurer when deciding whether to accept or decline a risk; may include meetings with the insureds or brokers, actuarial review of loss history, or physical inspections of exposures. 2. Expenses deducted from insurance company revenues (including incurred losses and acquisition costs) to determine underwriting profit.

Underwriting Profit- Insurer profit before investment income and income taxes.

Underwriting Risk - Uncertainty about whether or when a loss will occur and its amount.

Unearned Premium (UEP) - In property and casualty insurance, the fraction of written premium corresponding to the unexpired paid-up portion of the policy. If a policy has cancellation provisions, this is reserved on either a gross or short-rate basis (both discounted for income tax calculations).

Yellow Book - The annual reporting form for property and casualty insurers in the U.S.
