Interior Wall Construction at 38<sup>th</sup> St Ventilation Facility – September 2014

Contract CM005 - Manhattan South Structures

An aerial photograph showing the interior wall construction of a large facility. The walls are made of grey concrete and are surrounded by a complex network of rebar. A wooden formwork structure is visible in the foreground, and a window is visible on one of the walls. The date '12/03/2014' is printed in the bottom right corner.

PHOTOGRAPHER AND SUBMITTER:  
**REHEMA TRIMIEW**

**EAST SIDE ACCESS PROJECT,  
NEW YORK CITY**

Taking pictures on MTA's \$10.1-billion East Side Access project, Trimiew says she was struck by the "kind of weird, surreal environment" in a tunnel. The project official pictured "looks like he's walking off into an unknown yellow wonderland," she says.
