BUDGETWATCH February 2019 Flash Report

Overall Latest Condition (reporting on operations through January and subsidies through February):

Overall, preliminary results early in 2019 are favorable. In January, farebox revenue was on target, and B&T toll revenues were modestly favorable. Preliminary expenses were favorable, reflecting lower OPEB current payment expense – the result of having negotiated lower prescription medication pricing in addition to greater rebates – and savings from vacancies and underspending in non-labor categories. Overtime costs were unfavorable, primarily for station and track work at NYCT. Debt service savings were timing-related. Through February, subsidies were \$92 million, or 18.1% favorable; Payroll Mobility Tax collections were \$3 million unfavorable, while Petroleum Business Tax collections were \$1 million favorable and real estate transaction tax collections were \$94 million favorable.

Toll revenues were up by 2.5%, reflecting higher traffic volume due in part to favorable weather conditions and increased tunnel traffic following the completion of Sandy-related restoration work.

Total Operating Expenses before Non-Cash Liability Adjustments

B&T	34.8	41.6	6.8	16.4%
Total	\$1,060.3	\$1,124.1	\$63.8	5.7%

Overall expenses for January were favorable by \$63.8 million, or 5.7%. NYCT generated close to 60% of that variance and was driven mainly by lower OPEB current payment costs due principally to higher negotiated rate discounts as well as greater rebates for prescription drugs, partly offset by higher overtime and paratransit expenses. The LIRR was favorable primarily due to vacancy-related savings, higher overhead credits due to increased capital project activity, timing, and underspending in a myriad of non-labor expense categories. B&T was favorable mostly due to

vacancies and revised timing assumptions for major maintenance projects, while MTA Bus was favorable primarily as a result of timing and revised spending assumptions for a variety of non-labor categories of expense, including maintenance and professional services. MNR was favorable mostly due to lower energy costs and the timing of maintenance and professional service contracts.

NYCT	\$54.5	\$46.4	(\$8.1)	-17.4%

B&T	<u>2.3</u>	2.6	0.3	10.2%
Total	\$85.8	\$76.5	(\$9.3)	-12.2%

Preliminary overtime costs exceeded the budget by \$9.3 million, or 12.2%. NYCT comprised the lion share of the overage which was driven by station and track work required by the Subway Action Plan. MTA Bus was unfavorable because of winter storm preparation work and weather conditions that existed on January 18th.

Debt Service

Debt services expenses for January were \$229.7 million, which was \$11.3 million, or 4.7%, favorable due to timing related to the issuance of new debt and timing of debt service deposits.
